

BETTERLIFE · ANDROID

UI design reference

Every screen of the app, drawn with the project's own theme tokens: navigation, skeleton loading, motion and empty / error states. Built from the 30 playbook prompts and context.md.

66 screens | 7 motion studies (35 frames) | Design tokens | Components | Mascot moods & stages

FOR THE AI BUILDING THE APP

Use this as the visual target when a prompt builds a screen. context.md and agent.md still win on behaviour. Colours, radii and spacing map to `ui/theme` (Color.kt, Shape.kt, Dimens.kt); values marked **proposed** are not in the theme yet and must be added there as tokens, never hard-coded. The live, clickable prototype is `docs/design/prototype/index.html`.

Contents & how to use

Foundations

- Colour tokens
- Type, shape & spacing
- Components
- Navigation
- Motion system
- Motion studies (frame strips)
- Skeleton loading
- Mascot: moods and stages

States	2

Rules that apply to every screen

• **Dark / AMOLED only.** Background `#1A0A0D`, cards `#2A1116` with a 1 dp border at 12% text.

• **Never colour alone.** Priority = flag + word; status = icon + word; habit boxes = colour + check mark.

• **Rounded everything.** Cards 24 dp, sheets 28 dp, pop-up 32 dp, buttons fully round, chips 10 dp.

• **Touch targets ≥ 48 dp.** Primary actions 48–56 dp tall.

• **Every list has three extra states:** skeleton (same geometry), empty (mascot + line + one action), error (what happened, data is safe, one fix).

• **Motion everywhere, but optional.** Each animation has a reduced-motion version (system animation scale 0 → fades of 1 frame).

• **Edge-to-edge.** Content runs under the status bar and gesture bar with correct insets; the floating nav sits above the gesture area.

• **Names come from data.** "Sanjith", "Blip" and all items here are sample data.

Reading a screen page

Each screen shows the frame, its prototype id (`?s=id`), the playbook prompt(s) that build it, its purpose, the layout from top to bottom and the motion.

Usage. Yellow is for the one main action, today markers, focus and "top" items. Cherry is selection (tabs, chips, nav pill) and secondary buttons. Tints of category colours are 15–20% fills with a 3–4 dp solid stripe. Yellow text on Cherry passes contrast only at 14 sp bold or larger: use Text on Cherry for small labels.

PROGRESS

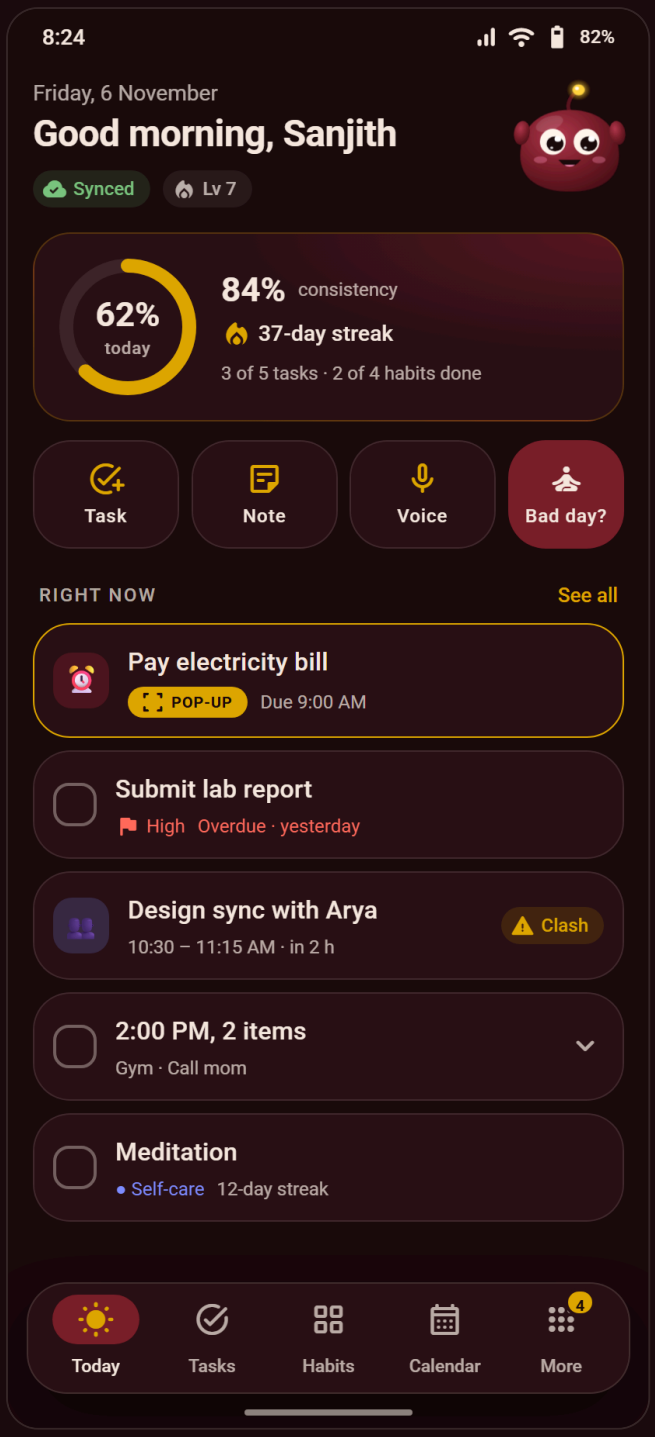

68%

CARDS

FEEDBACK

Task completed Undo

Saved to Inbox

Floating bottom bar (Prompt 17)

Five destinations: **Today · Tasks · Habits · Calendar · More**. Floating card 72 dp tall, radius 26, 12 dp side inset, 92% Surface with blur and a soft shadow, sitting above the gesture bar. Active item: Cherry pill 56×32 behind a filled yellow icon, label in Text. Inactive: outlined icon, muted label.

Badge on **More** = unprocessed Inbox count (yellow, 2 dp ring in Surface). A red "!" on the Health tile when a Reminder Health row is red.

Motion: on select the pill springs from 40% width (400 ms, overshoot) and the icon fills. Destination content cross-fades 250 ms; it never slides between tabs.

Hierarchy

TAB	OPENS
Today	Minimum Day, Comeback, Pause sheet, check-in
Tasks	Task editor, Projects, Search
Habits	Habit detail, editor, celebrations
Calendar	Day · Week · Month · Agenda, event editor, day sheet
More	Inbox, Notes, Journal, Body, Photos, Dashboard, Reminder Center, Health, Vault, Trash, Backup, Sync, Settings

Screen transitions

Push (detail, editor): slide 28 dp from the right + fade, 380 ms emphasized. Full-screen flows (onboarding, Minimum Day, celebrations, recorder): rise 40 dp + fade, 420 ms. Back uses predictive back (Android 16): the screen scales to 90% and follows the gesture. Close (×) flows never also show a Back arrow.

Motion system

Proposed motion tokens (add as constants next to the theme). All durations scale with the system animator duration scale; at 0 every animation becomes an instant state change and loops stop.

TOKEN	VALUE	USED FOR
`durationShort`	150 ms	Colour, state layers, icon fill
`durationMedium`	250 ms	Cross-fades, switches, list item removal
`durationLong`	400 ms	Sheets, nav pill, screen push
`durationXL`	600 ms	Progress bars
`easeEmphasized`	cubic-bezier(.2, 0, 0, 1)	Screens, sheets, rings
`easeBounce`	cubic-bezier(.34, 1.56, .64, 1) / spring(dampingRatio 0.6, stiffness ~400)	Cards in, pops, ticks, pop-up card
`staggerStep`	60 ms (cards), 40 ms (chips)	Lists entering

PATTERN	SPEC	REDUCED MOTION
Card enter	translateY 18 dp + scale 0.97 → 1, fade, 520 ms bounce, 60 ms stagger (first 8 only)	fade 1 frame
Tick (task / habit)	scale 0.6 → 1.18 → 1, fill colour, check draws, haptic CONFIRM; task row strikes through then collapses 250 ms	instant fill
Progress ring	sweep from 0, 1.1 s emphasized; re-animates only on value change	final value
Reminder pop-up	scrim 300 ms; card scale 0.82 → 1 + rise 24 dp, 520 ms bounce; 700 ms tap guard shown as a filling bar	fade 150 ms
Bottom sheet	slide up 420 ms emphasized, scrim fade 300 ms; drag to dismiss follows the finger	appear
Snackbar	spring up 360 ms; 6 s timer line shrinks; Undo restores with the reverse animation	appear
Skeleton	warm shimmer band, 1.3 s loop, left → right; content cross-fades in 250 ms	static blocks
Celebration	confetti (≈46 pieces, 2.4–4.4 s fall), glow pop, number pop, text stagger	mascot + text only
Mascot idle	breathe 3.2 s, blink every 4 s, bulb glow 2.2 s; cheering hops 0.9 s and waves	static pose
Charts	line draws 1.4 s; bars grow from baseline with overshoot, 50 ms stagger	final chart

Compose mapping: `spring()` for bounce, `tween(…, FastOutSlowInEasing)` or `CubicBezierEasing(.2f,0f,0f,1f)` for emphasized, `AnimatedVisibility` + `animateItem()` for lists, Canvas for grids, heatmaps, charts and confetti. Check `Settings.Global.ANIMATOR_DURATION_SCALE` (already read by core/MotionSettings.kt).

Motion studies 1/4

Reminder pop-up entrance

?s=popup&t=…

Scrim fades, card scales up with overshoot, mascot pops, tap-guard bar fills before buttons work.

0 ms 90 ms 180 ms 300 ms 700 ms

Cards bounce in (Today)

?s=today&t=…

Greeting first, then cards rise and settle 60 ms apart; ring sweeps.

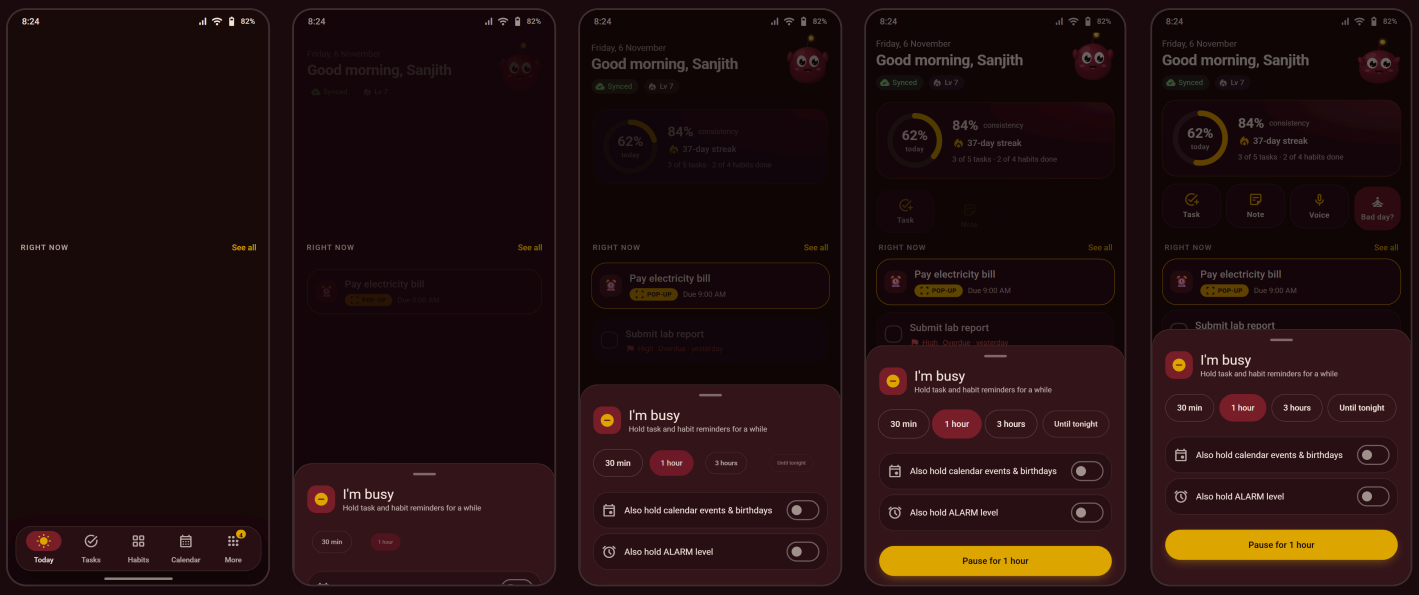

0 ms 120 ms 240 ms 400 ms 900 ms

Motion studies 2/4

Bottom sheet

?s=today-pause-sheet&t=…

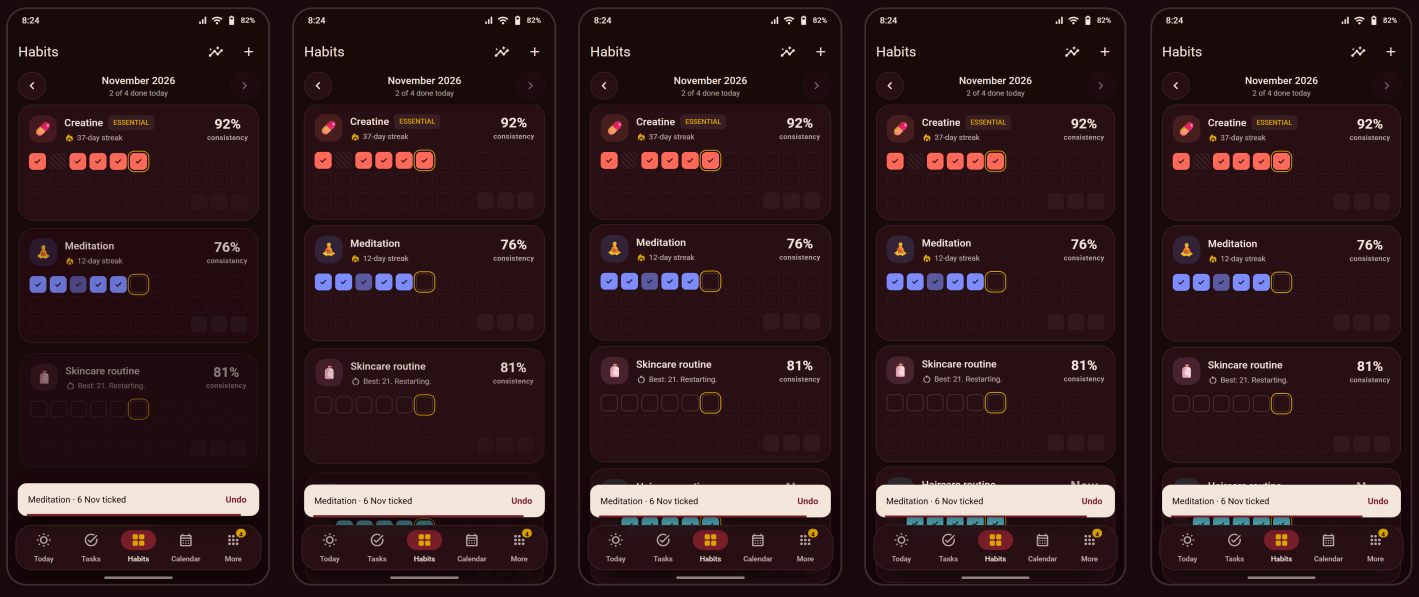

Scrim + sheet slide; duration chips pop in after the sheet lands.

Habit tick + snackbar

?s=habits&t=…

Today box pops 0.6 → 1.18 → 1 and fills; Undo snackbar springs up.

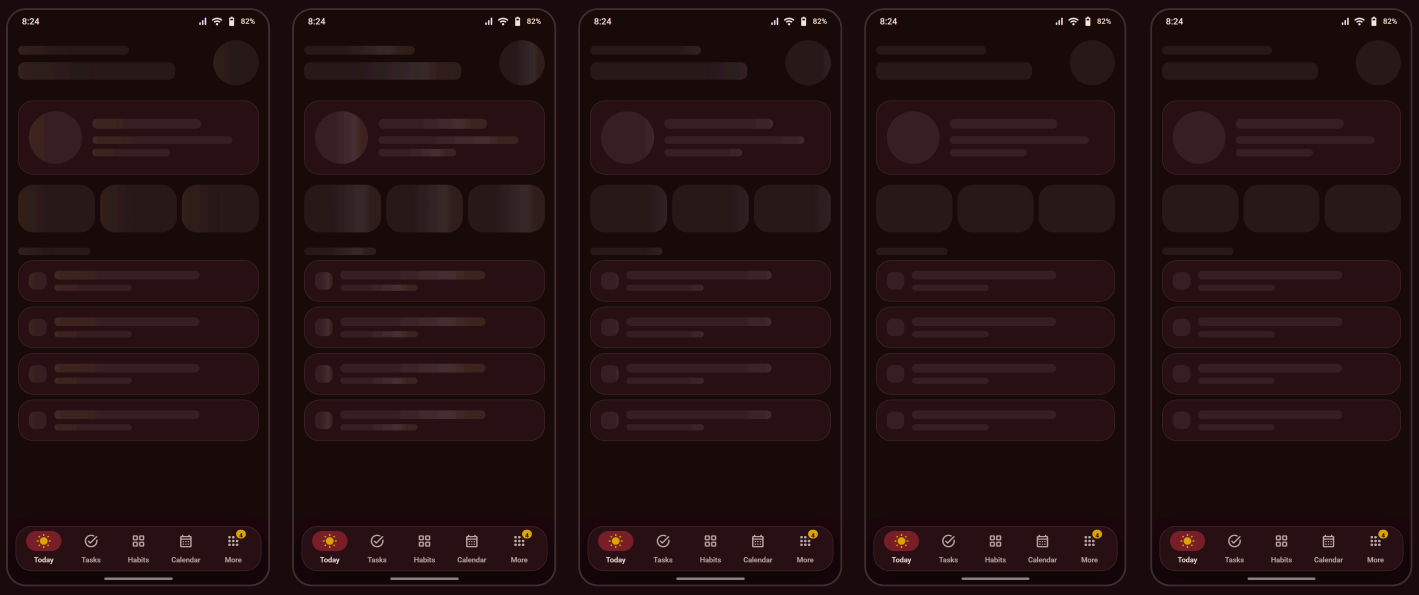

Motion studies 3/4

Skeleton shimmer

?s=today-loading&t=…

One warm band sweeps every 1.3 s across all blocks at once.

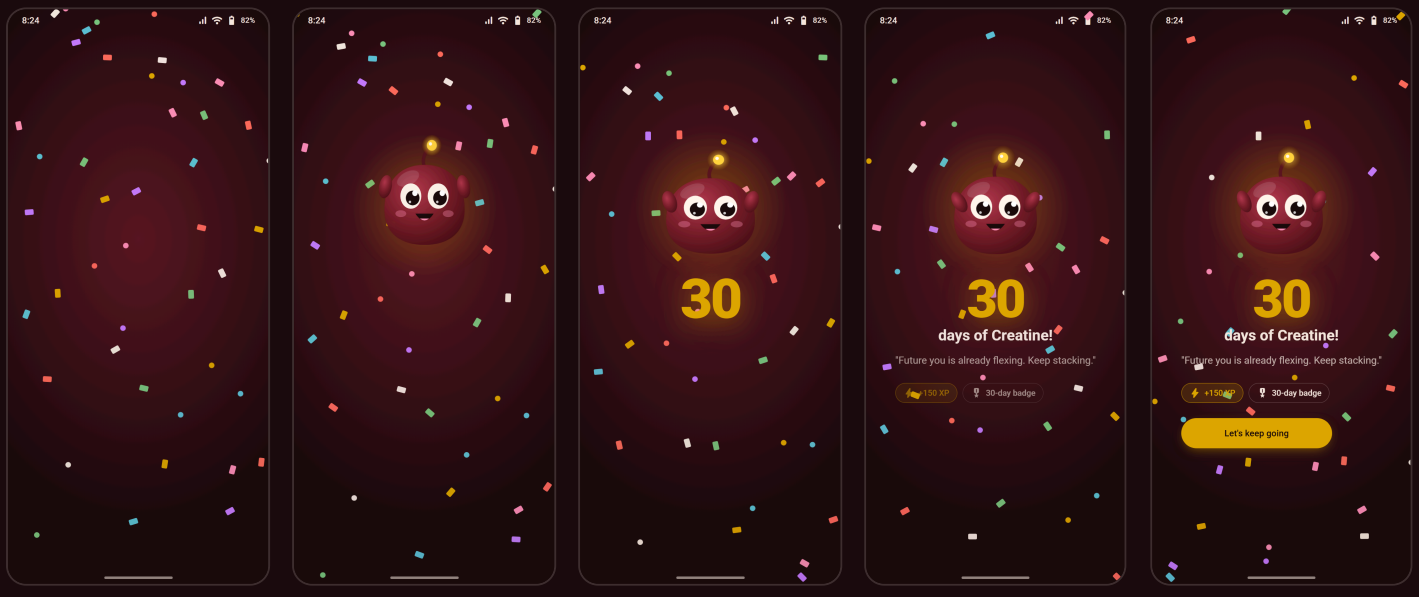

100 ms · 400 ms · 700 ms · 1000 ms · 1300 ms

Celebration

?s=celebration&t=…

Glow, mascot, number pop in sequence; confetti keeps falling.

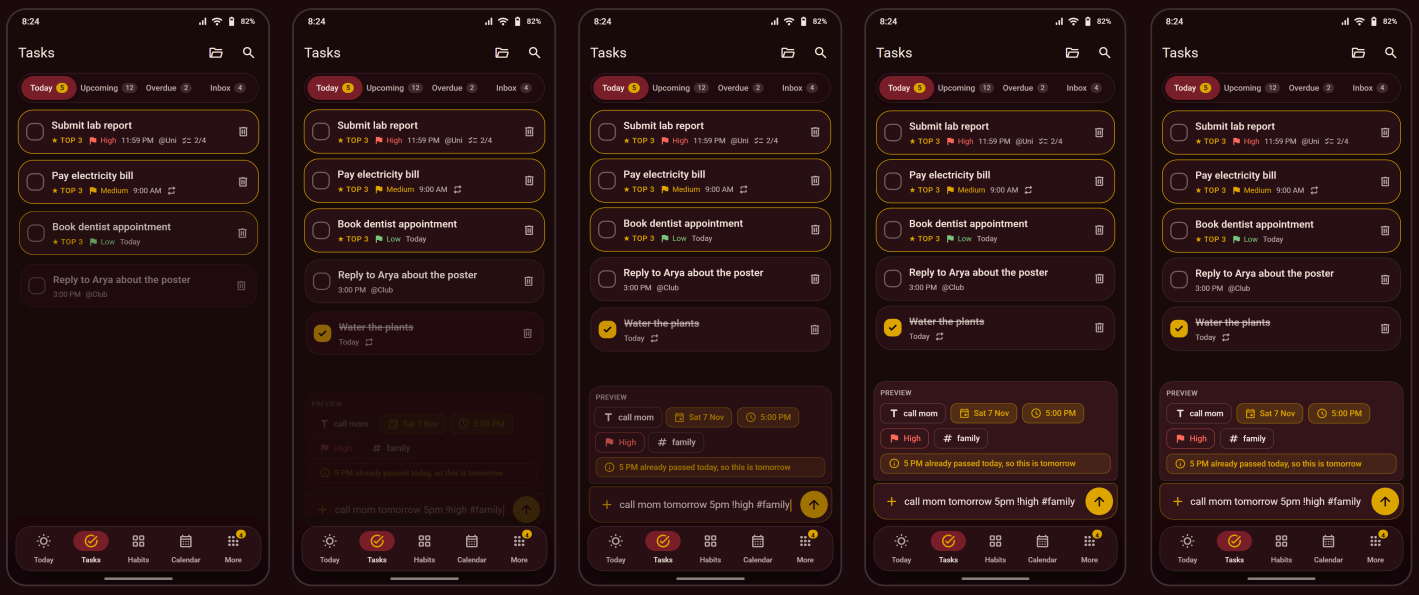

0 ms · 150 ms · 350 ms · 700 ms · 1600 ms

Motion studies 4/4

Quick-add chips

?s=tasks-quickadd&t=…

Preview chips pop in as the parser recognises each part.

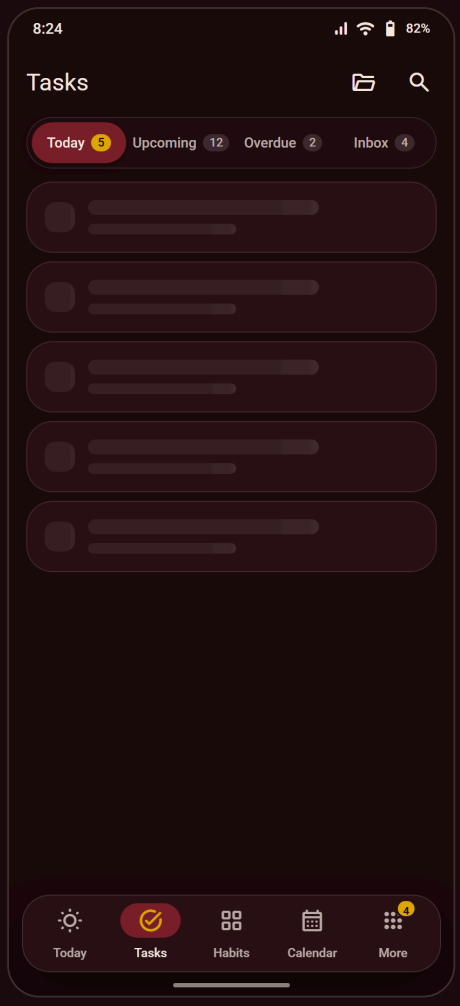

300 ms 380 ms 460 ms 560 ms 900 ms

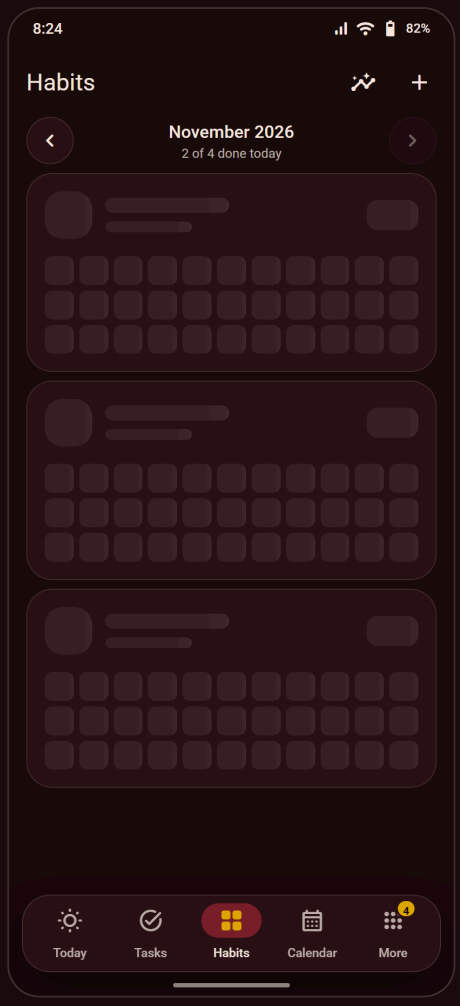

Skeleton loading

Today `?s=today-loading`

Tasks `?s=tasks-loading`

Habits `?s=habits-loading`

- Skeletons copy the **exact geometry** of the loaded content (same card padding, heights, radii) so nothing jumps when data arrives.
- Only content is skeletoned. App bar, tabs, nav bar and FAB are real and usable at once.
- Blocks are Text at 7% on the card surface; a single warm shimmer band (Text 9% → Yellow 6%) sweeps every 1.3 s.
- Show a skeleton only if loading takes longer than ~150 ms (Room is usually faster); never show a spinner for local data.
- Swap to content with a 250 ms cross-fade, then the normal card-enter stagger. Reduced motion: no shimmer, instant swap.

Mascot: Blip

Round maroon alien blob, big glossy eyes, stubby arms, one antenna with a glowing yellow bulb (the mood light). Drawn with Compose Canvas (no Lottie). Mood reflects only the last 24–72 hours; stage never goes down.

MOODS

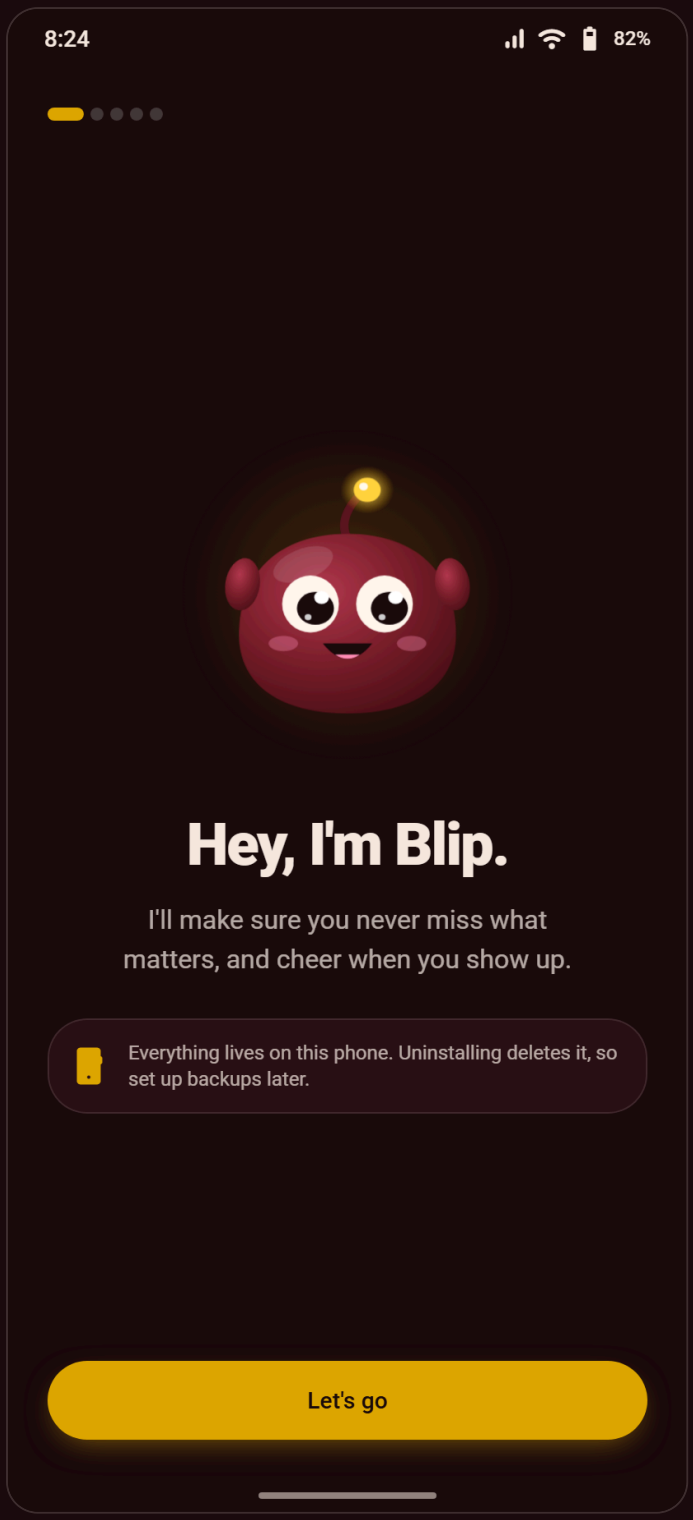

Cheering	Arms up and waving, open grin, hops (0.9 s). Habits / tasks done, celebrations.
Proud	Happy closed eyes, arms on hips, gentle hop. Report card, Minimum Day.
Curious	Idle: breathes, blinks every 4 s, small "o" mouth. Default, pop-ups.
Sleepy	Closed eyes, bulb dim, floating "z". Late night, app lock, paused days.
Down	Sits lower, eyes look down, bulb dim, small frown. Never shows blaming text; perks up the moment something is done.

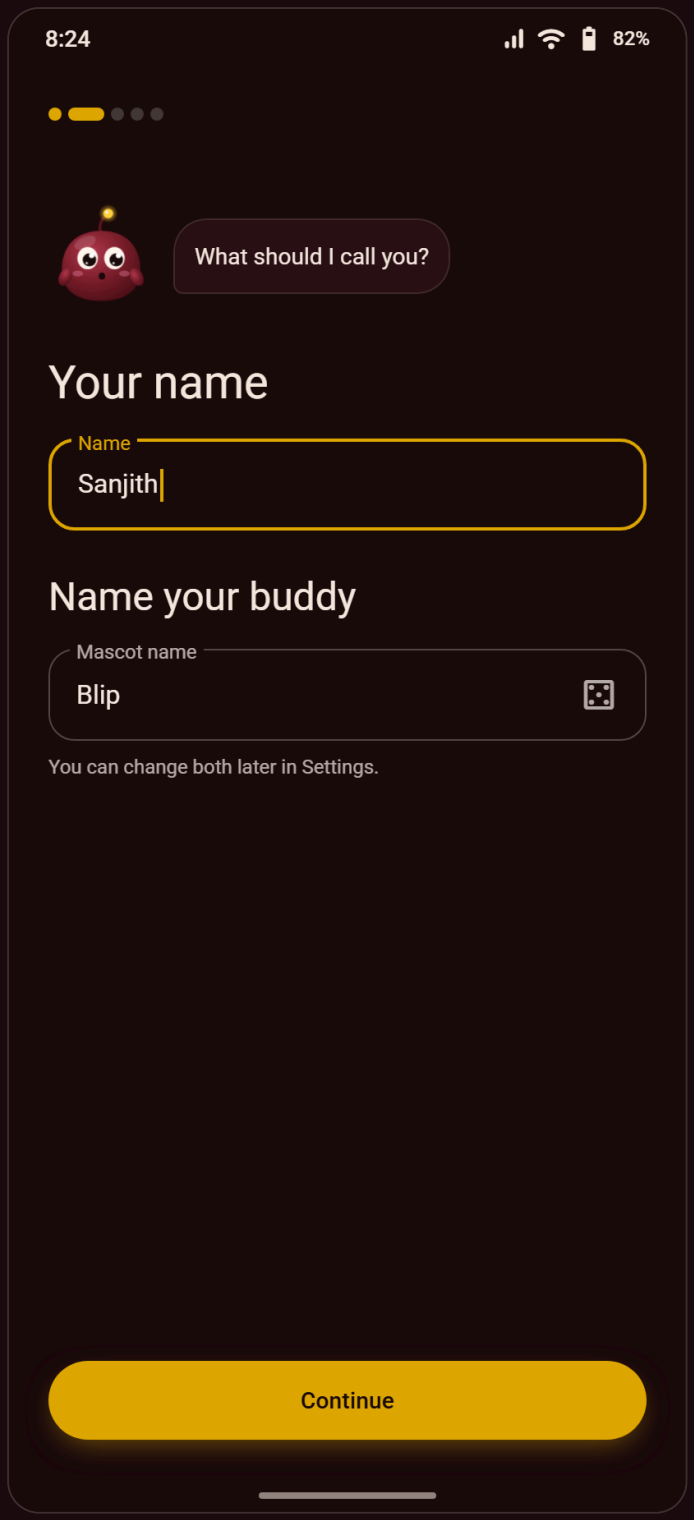

EVOLUTION STAGES (FROM TOTAL CONSISTENT DAYS)

1 glowing pod · 2 baby blob · 3 teen: bigger antenna, small legs · 4 adult: cape and glowing markings · 5 legend: full glow and aura. Thresholds are set in Prompt 27.

Welcome · Your name

Welcome P 27

`?s=onboarding-welcome`

First run. Introduces Blip and says data lives on the phone.

- Step dots (5) + Skip
- Mascot (cheering) on a yellow glow
- Display headline + one-line promise
- Info card: uninstall deletes data
- Primary button pinned to bottom

Motion Screen rises in (420 ms emphasized); mascot pops; text fades in staggered 60 ms.

Your name P 27

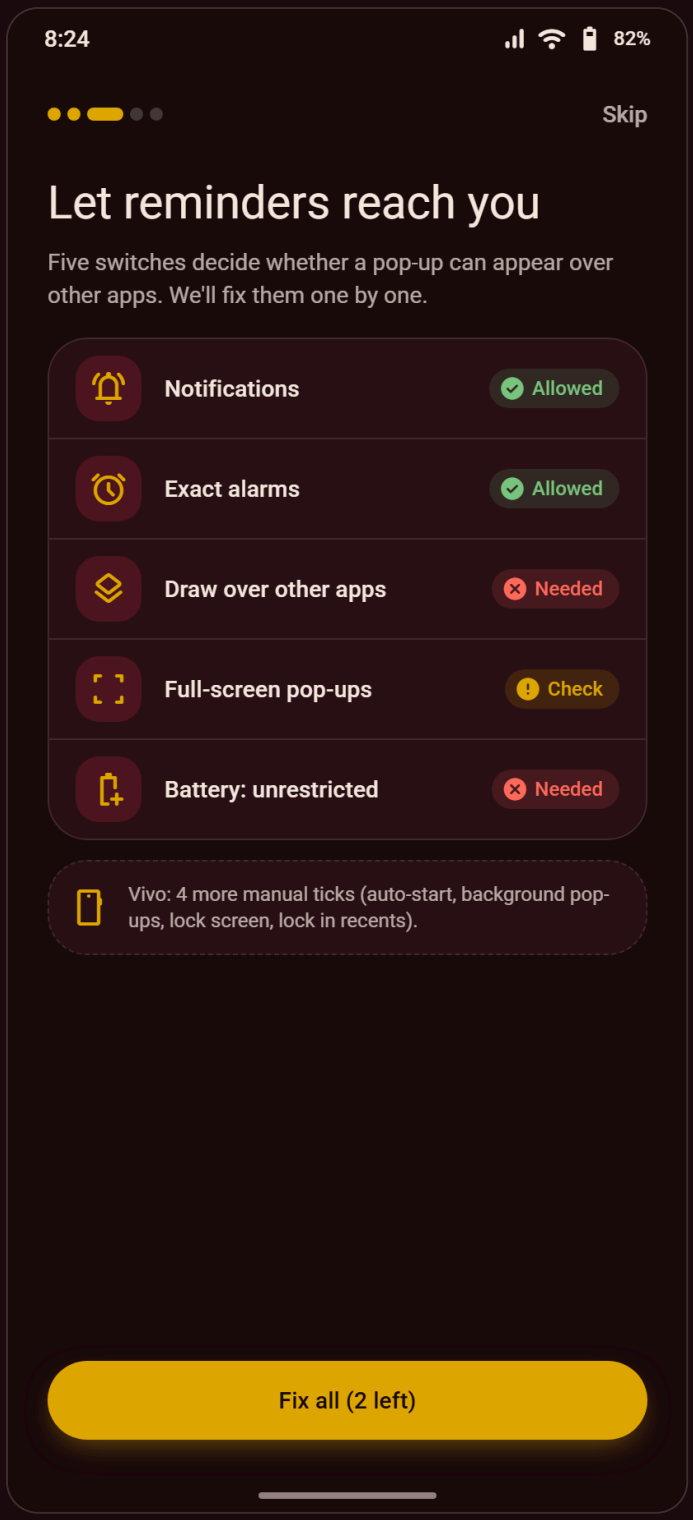

`?s=onboarding-name`

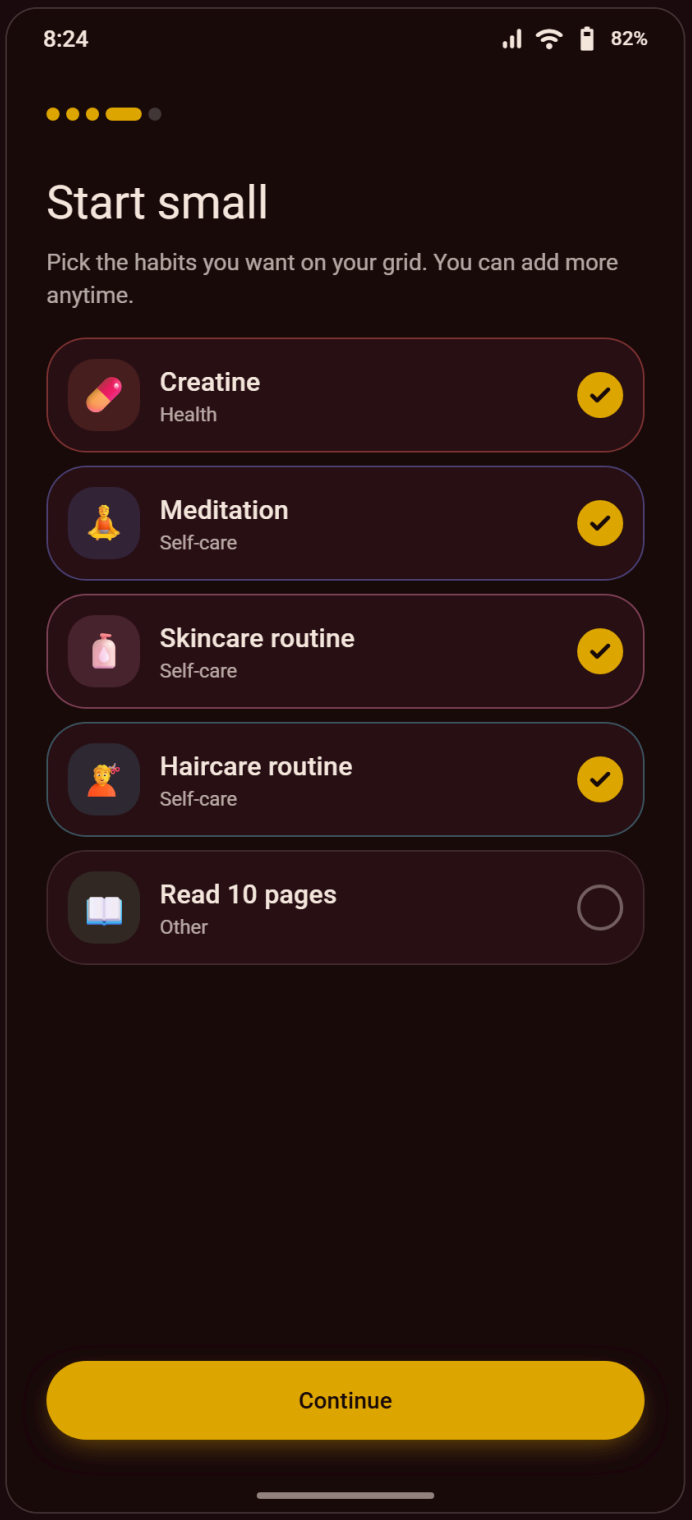

Owner name (used in the greeting, never hard-coded) and mascot name.

- Mascot with speech bubble
- Outlined field: Name (focused, yellow 2 dp border)
- Outlined field: Mascot name with dice to randomise
- Helper text

Motion Fields bounce in staggered; caret blinks.

Permission walkthrough · Pick starter habits

Permission walkthrough P 2, 11, 27

`?s=onboarding-permissions`

Guided Reminder Health walkthrough. "Fix all" visits each red row.

- Title + why it matters
- Card list: icon, name, status chip (icon + word, never colour only)
- Dashed card: Vivo manual ticks
- Button: Fix all (n left)

Motion Rows bounce in; a row turning green cross-fades its chip.

Pick starter habits P 27

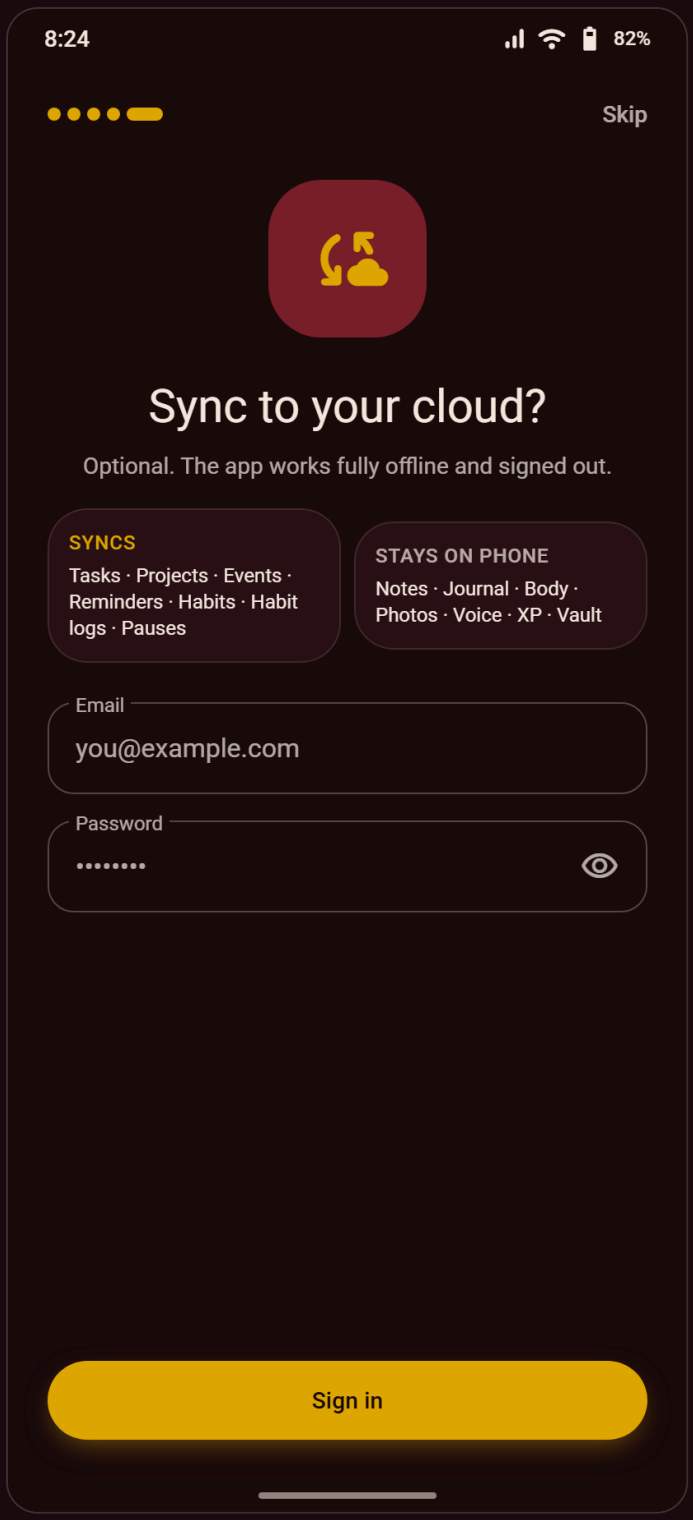

`?s=onboarding-habits`

Choose starter habits; the four defaults are pre-selected.

- Title + helper
- Habit cards: avatar (habit colour 15%), name, category, round tick
- Selected card border = habit colour

Motion Tick pops (420 ms overshoot) and fills.

Optional sync sign-in · App lock

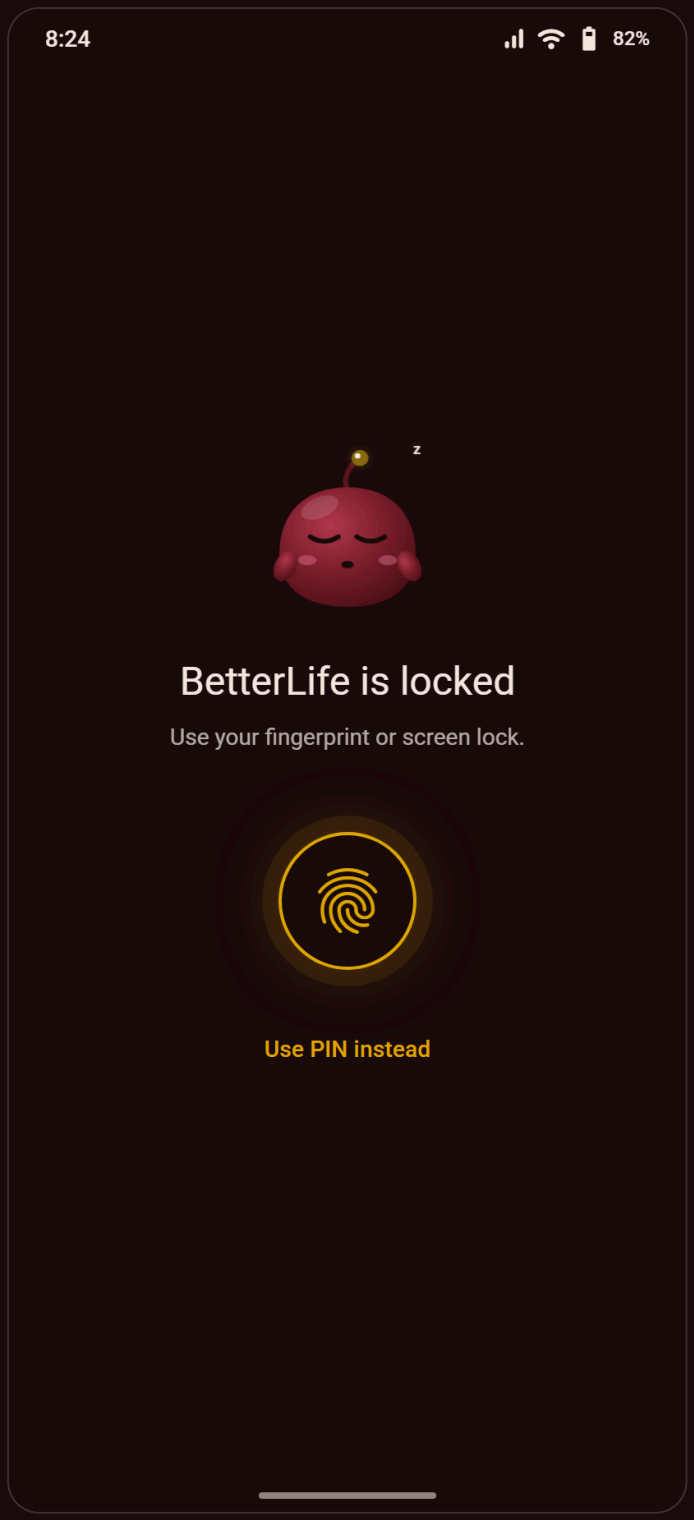

Optional sync sign-in P S1, 27

`?s=onboarding-sync`

Optional sign-in. Says exactly what syncs and what stays local.

- Icon tile
- Title + "optional" line
- Two cards: SYNCS / STAYS ON PHONE
- Email + password fields
- Sign in + Skip

Motion Icon tile pops; standard field focus.

App lock P 28

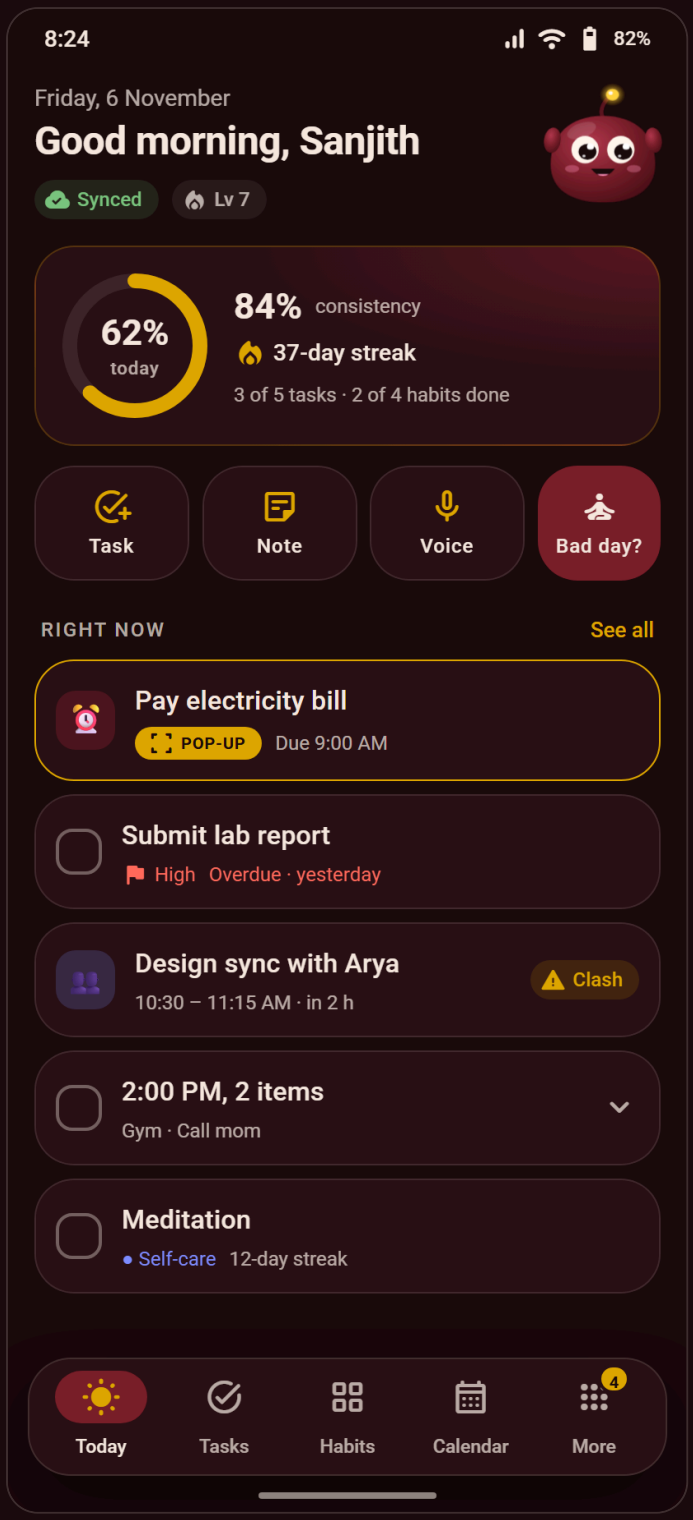

`?s=lock`

Biometric app lock with device-credential fallback.

- Sleepy mascot
- Title + hint
- Fingerprint target with yellow halo
- Text button: Use PIN

Motion Halo pulses slowly; on success the screen fades out 250 ms.

Today (home) · Today: skeleton loading

Today (home) P 17

`?s=today`

Home. Answers "what should I do right now?" using the Today ranking rule.

- Date, greeting with owner name, sync + level chips, mascot (mood)
- Hero card: progress ring (today) + consistency first, streak beside
- Quick capture row: Task, Note, Voice, Bad day?
- Section "Right now": ranked rows; same-time items collapse ("2:00 PM, 2 items")
- Floating bottom nav (5 items, More has Inbox badge)

Motion Cards bounce in staggered 60 ms; ring sweeps 1.1 s; nav pill springs on select.

Today: skeleton loading P 17, 27

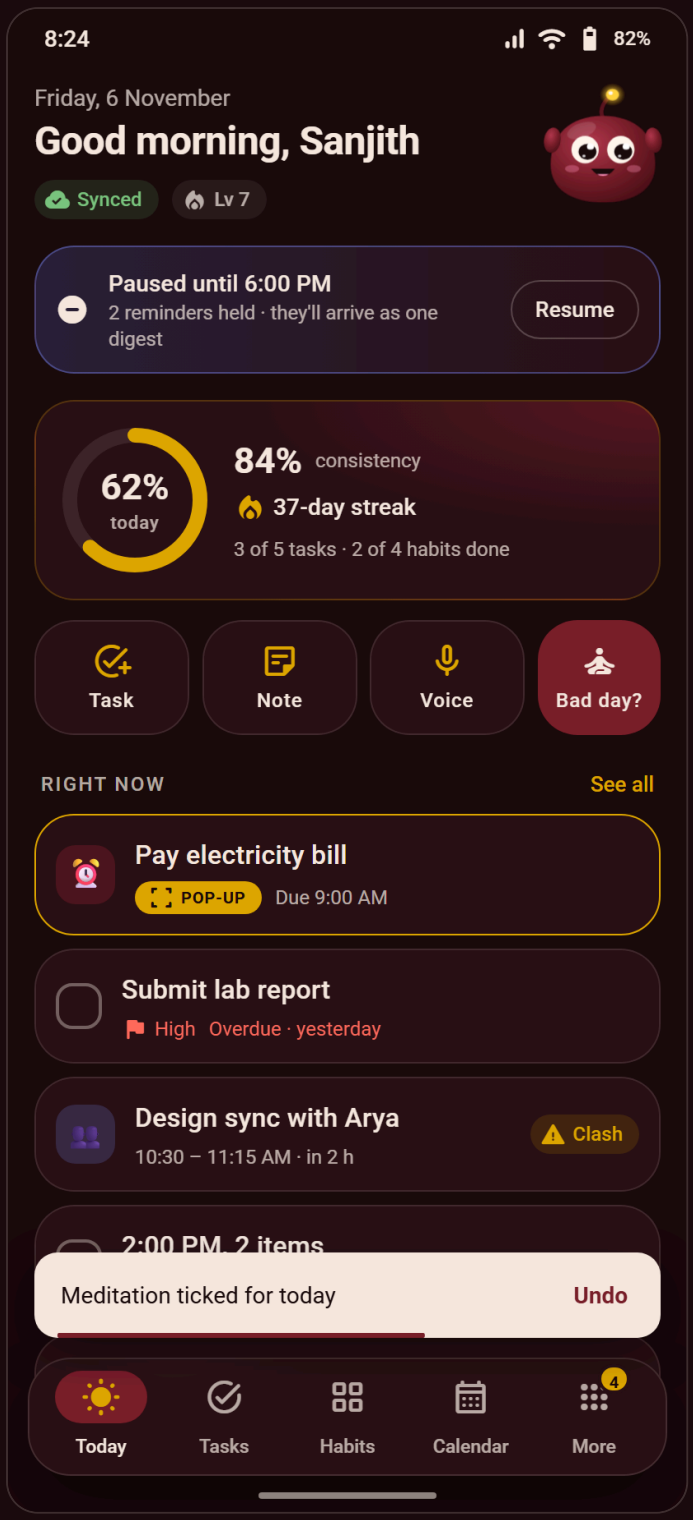

`?s=today-loading`

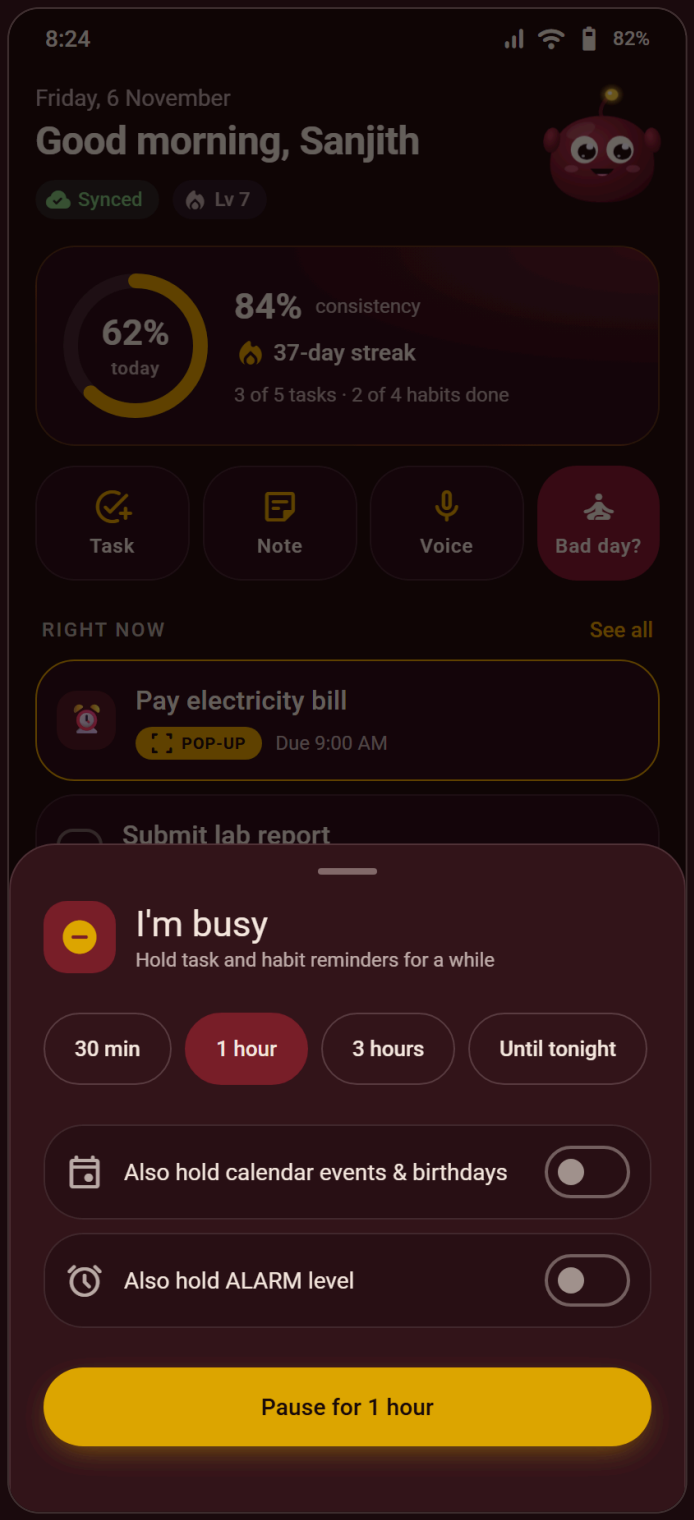

Skeleton while the first Room query runs. Same geometry as the loaded screen so nothing jumps.

- Greeting bars + round mascot slot
- Hero card skeleton (ring + 3 lines)
- 3 capture tiles
- 4 row skeletons

Motion Shimmer sweeps left to right every 1.3 s (warm tint). Content replaces it with a 250 ms cross-fade. Reduced motion: static blocks.

Today: paused banner + undo · Pause sheet ("I am busy")

Today: paused banner + undo P 12, 17

`?s=today-paused`

Pause banner with Resume, plus the 6-second Undo snackbar pattern.

- Pause banner card under the greeting
- Snackbar: light surface, Cherry action, shrinking timer line

Motion Snackbar springs up 360 ms; timer line runs 6 s linear.

Pause sheet ("I am busy") P 12

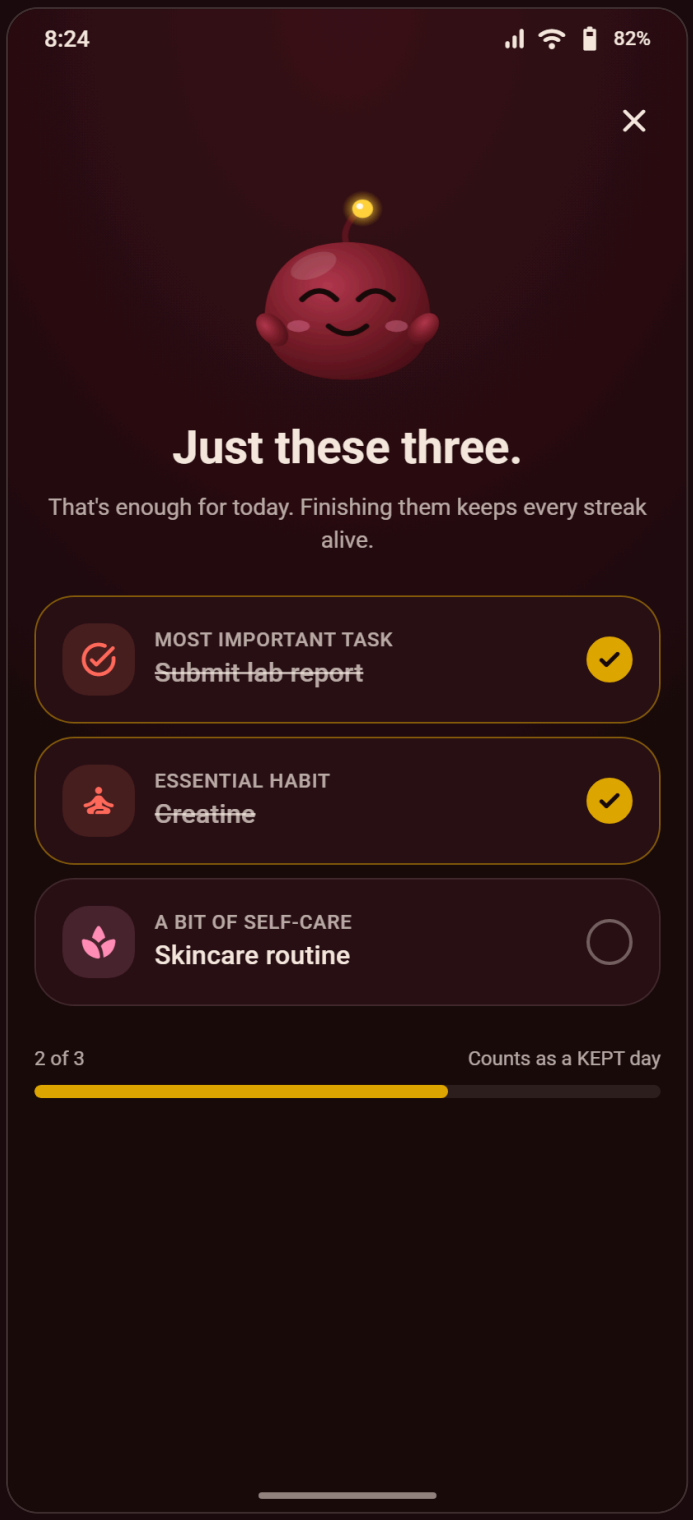

`?s=today-pause-sheet`

"I am busy" sheet: 30 min, 1 h, 3 h, until tonight; exemptions as switches.

- Grab handle
- Icon + title + subtitle
- Duration chips (pill, 44 dp)
- Switch rows for exemptions
- Primary button

Motion Scrim fades 300 ms; sheet slides up 420 ms emphasized; chips pop staggered.

Minimum Day · Comeback mission

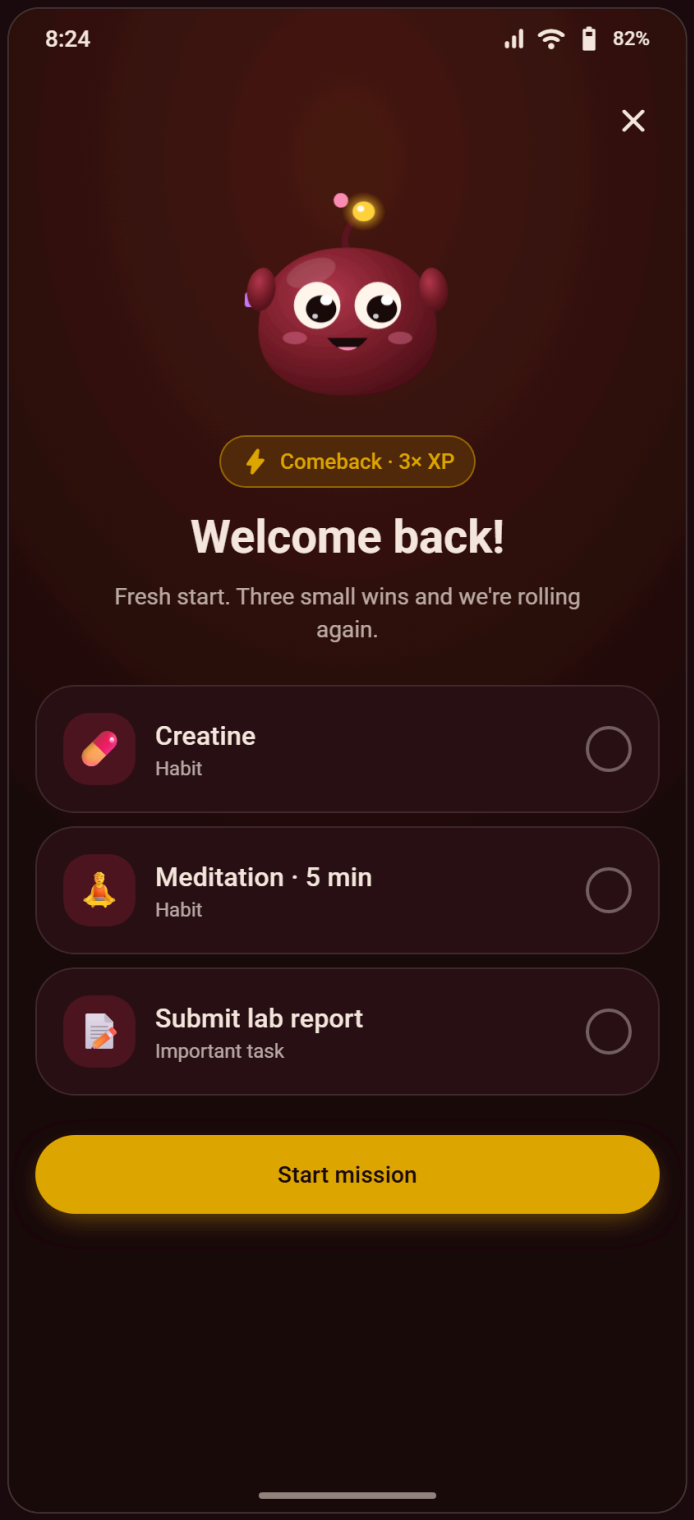

Minimum Day P 17

`?s=today-minimum`

Minimum Day: three things by rule. Completing them is a KEPT day.

- Close only (no Back)
- Proud mascot + "Just these three."
- 3 cards: kind label, item, round tick
- Progress bar + "Counts as a KEPT day"

Motion Each tick pops; when all three are done the mascot cheers.

Comeback mission P 17, 26

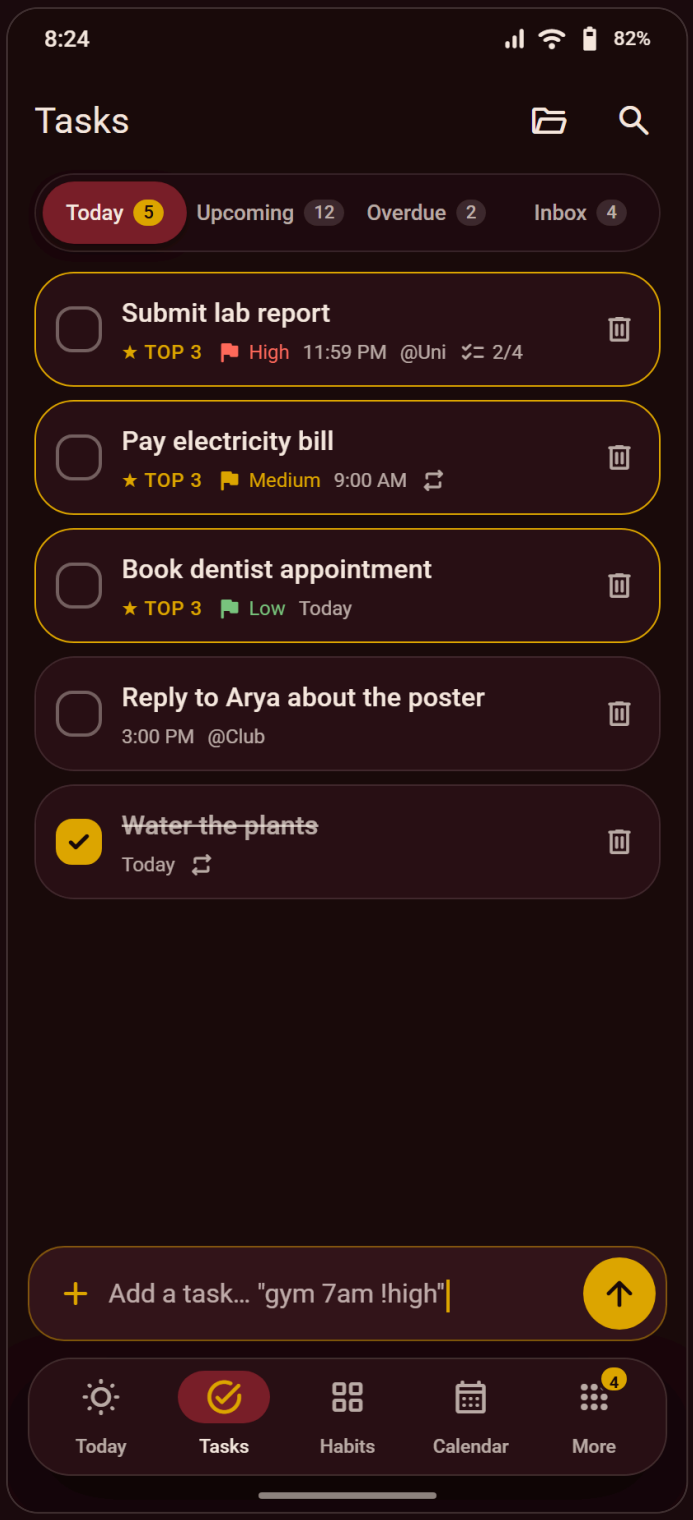

`?s=today-comeback`

Comeback mission. Never lists missed days.

- Mascot cheering with light confetti
- Chip: Comeback · 3× XP
- Title + kind line
- 2 habits + 1 important task
- Start mission

Motion Confetti falls behind the mascot; cards bounce in.

Tasks: Today tab · Tasks: skeleton loading

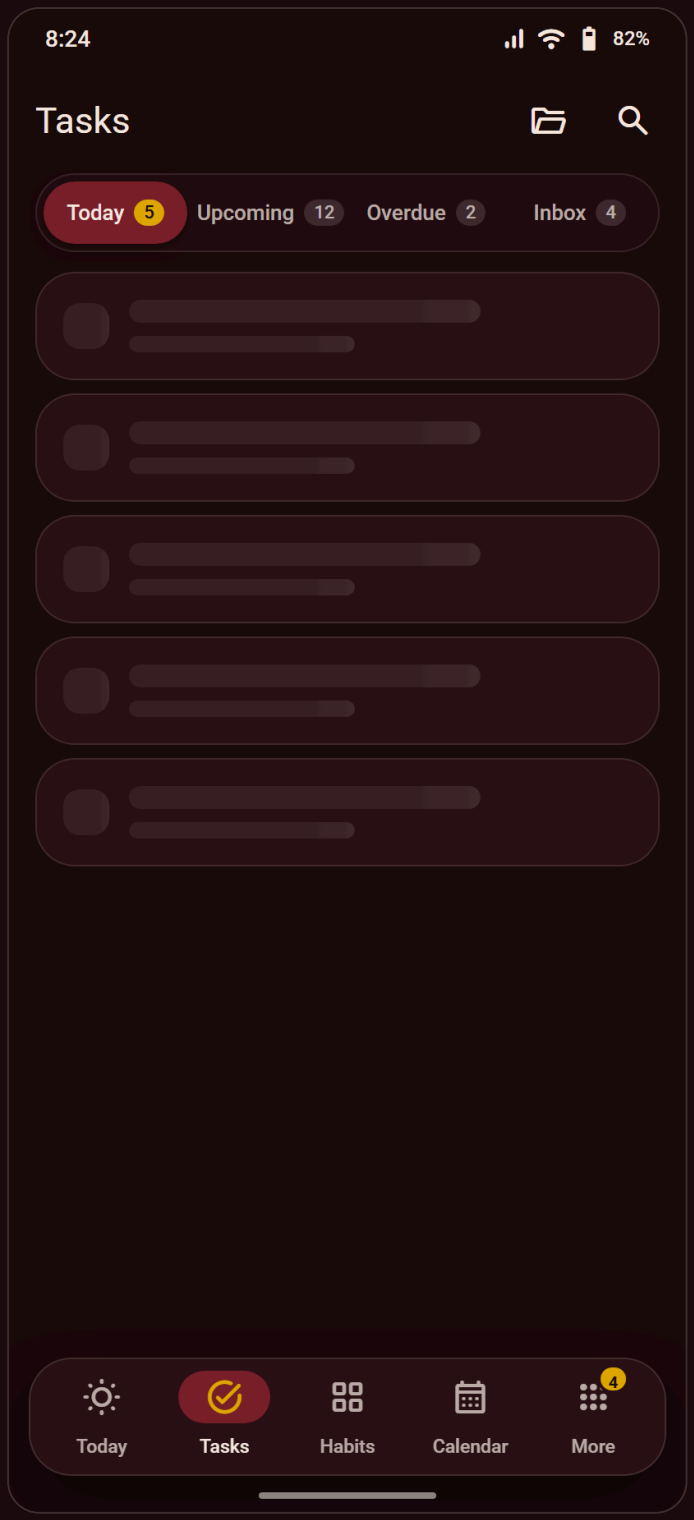

Tasks: Today tab P 9

`?s=tasks`

Task list with Today / Upcoming / Overdue / Inbox and the always-visible quick-add bar.

- App bar: Projects, Search
- Segmented pill tabs with counts
- Task cards: tick, title, Top 3 / priority flag + word / due / repeat / @project / subtasks, delete
- Top 3 cards get a yellow border
- Quick-add bar floating above the nav

Motion Tick: pop + strike-through, row then collapses 250 ms; Undo snackbar.

Tasks: skeleton loading P 9, 27

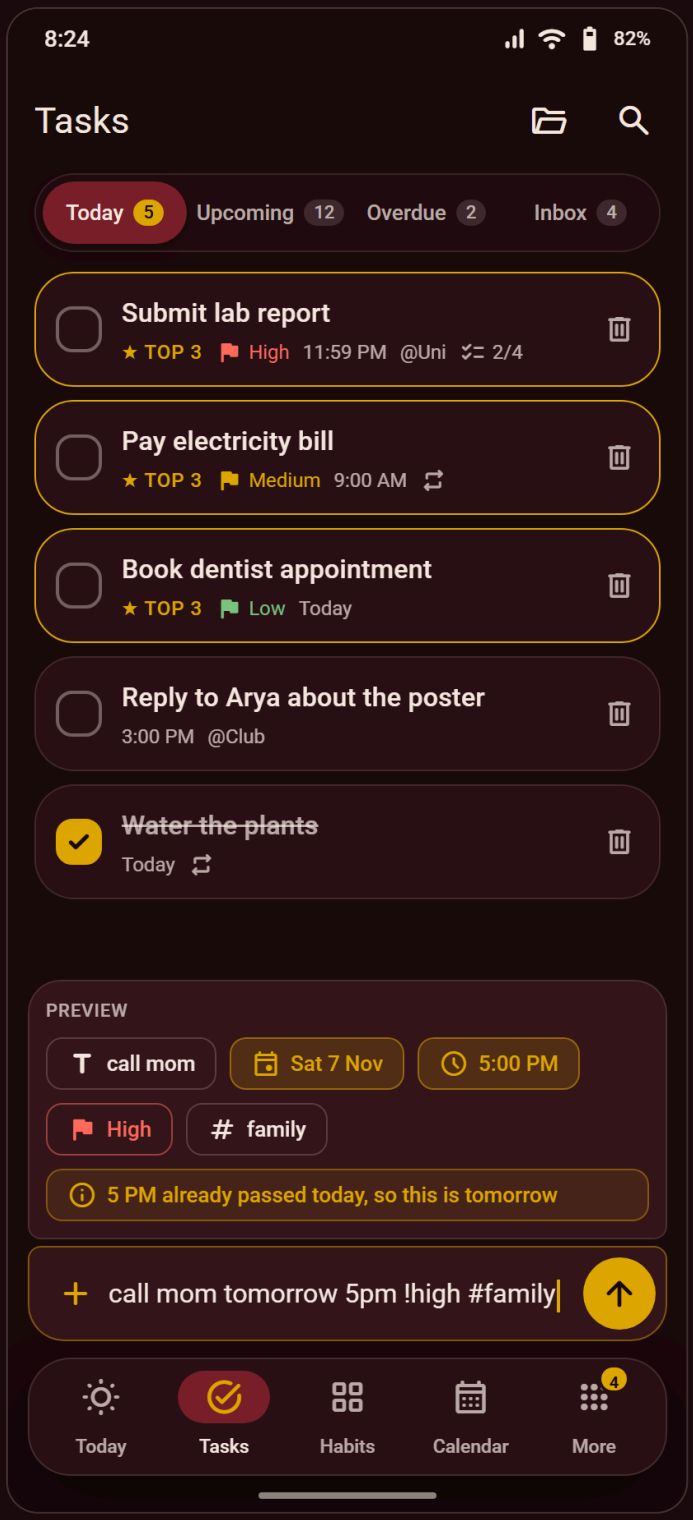

`?s=tasks-loading`

Task list skeleton.

- Real app bar + tabs (no skeleton for chrome)
- 5 row skeletons

Motion Shimmer 1.3 s.

Quick-add live preview · Quick-add AM/PM question

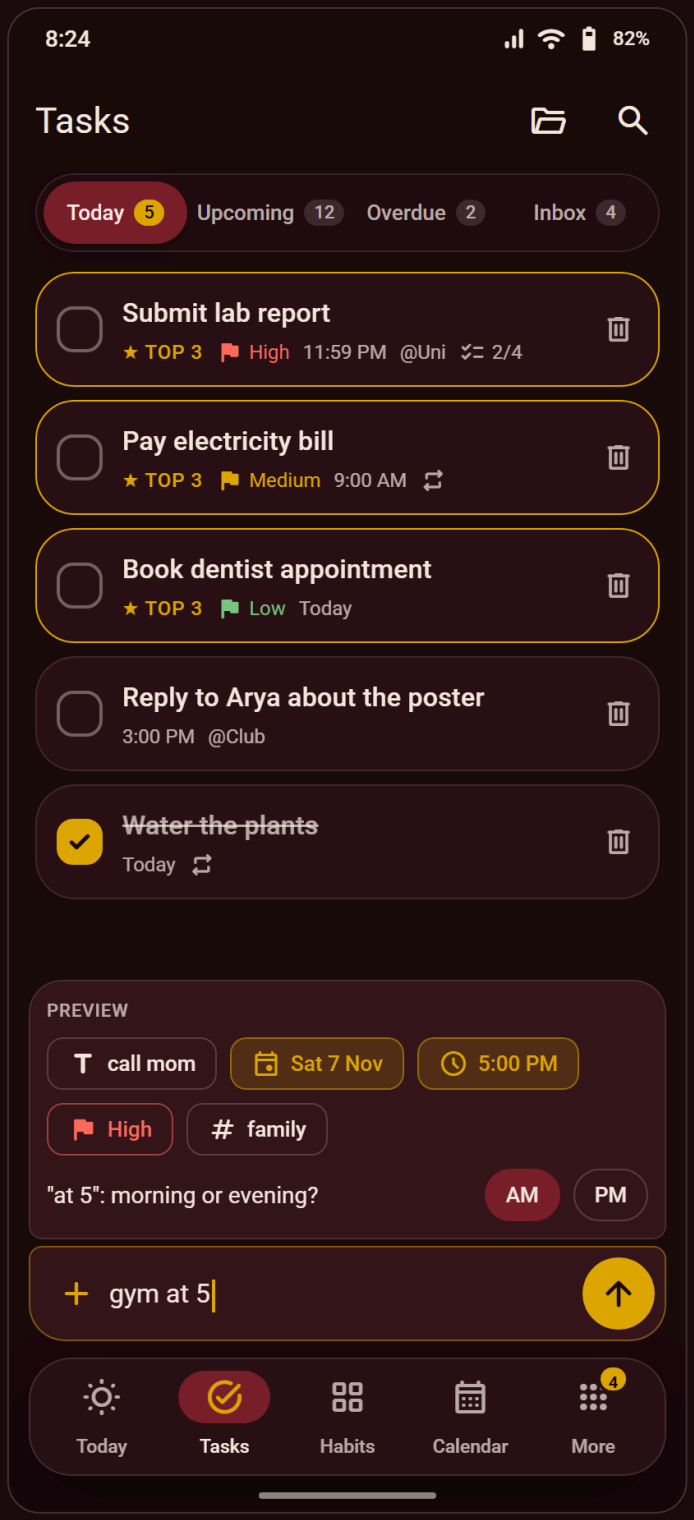

Quick-add live preview P 9

`?s=tasks-quickadd`

Quick-add with the live parser preview chips and a warning.

- Preview card above the field: title, date, time, priority, tags
- Warning chip ("moved to tomorrow")
- Field with yellow border + send button

Motion Each recognised chip pops in as it is parsed (40 ms stagger).

Quick-add AM/PM question P 9

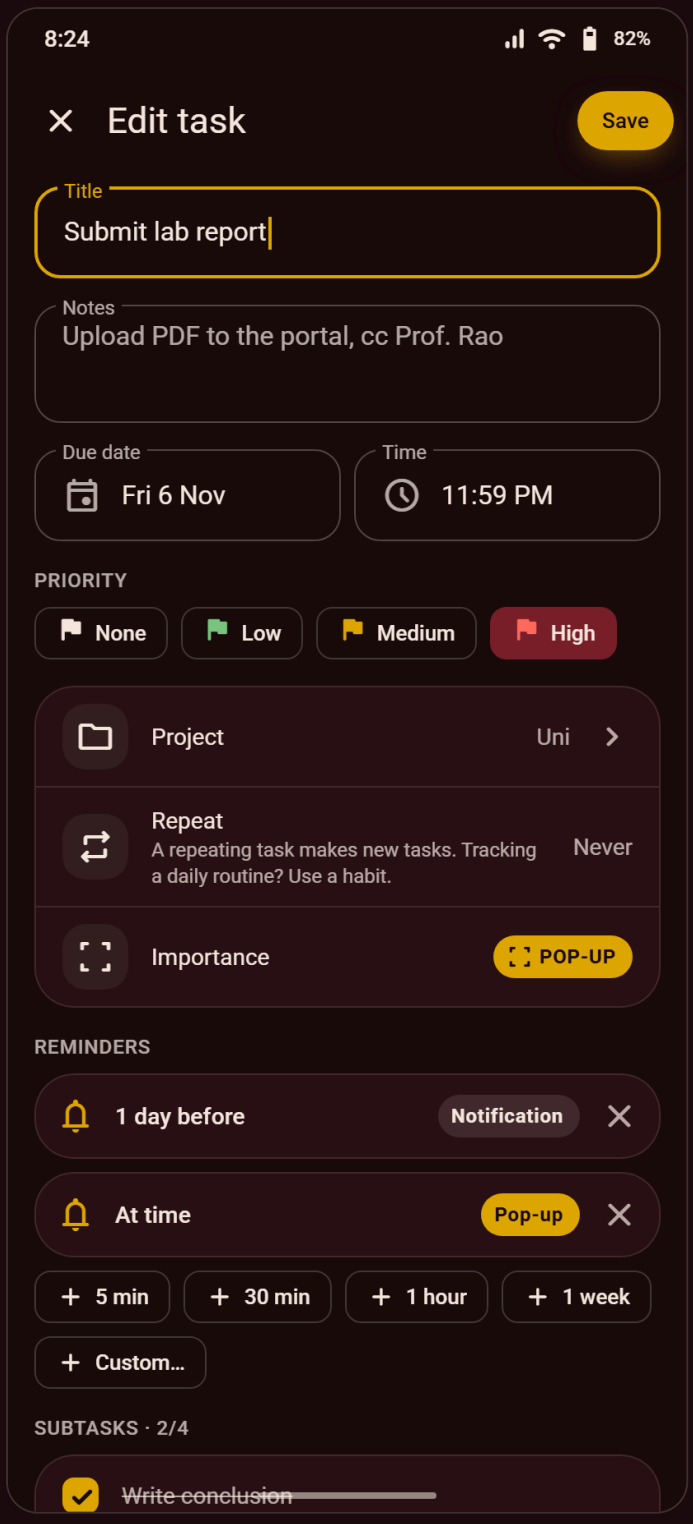

`?s=tasks-ambiguous`

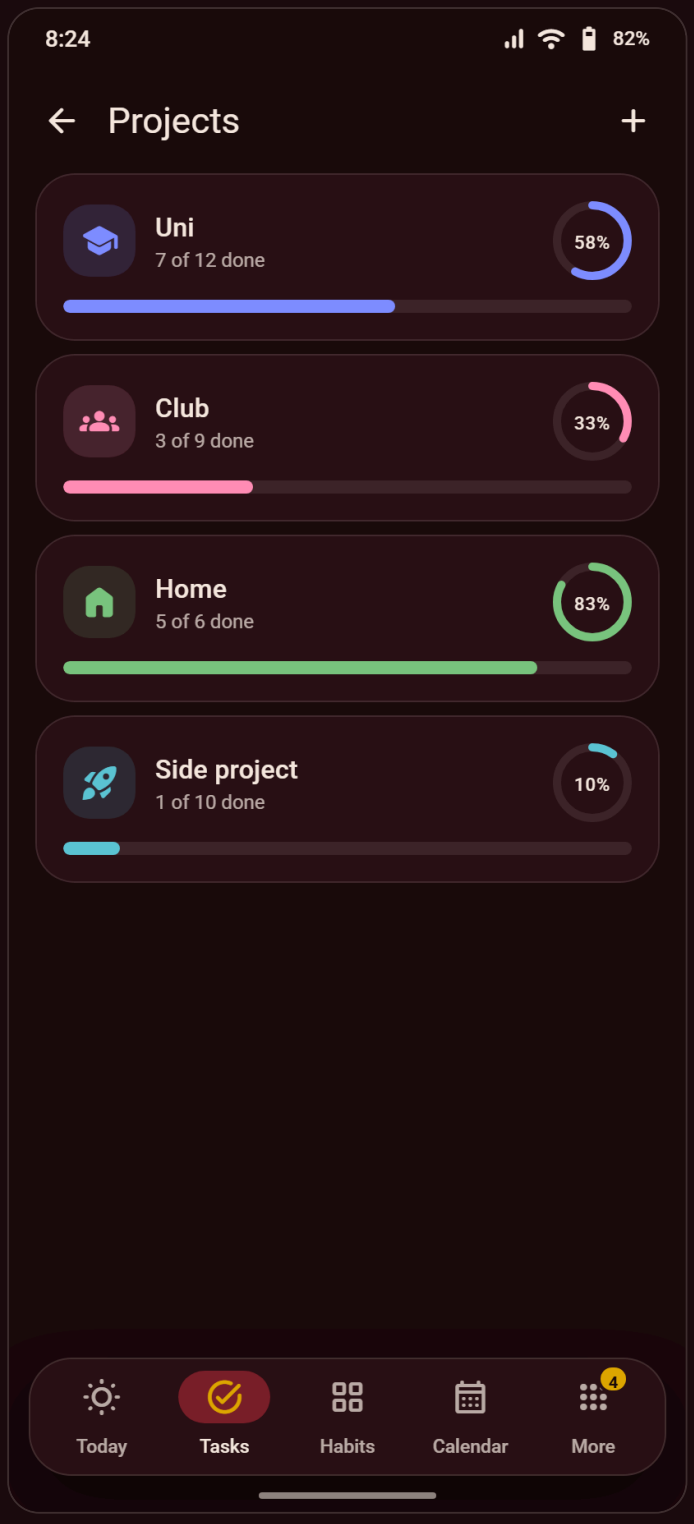

Ambiguous "at 5" asks AM / PM inline before saving.

- Question line with AM / PM pills inside the preview card

Motion Question row expands 250 ms.

Task editor · Projects

Task editor P 9

`?s=task-editor`

Full task editor.

- Close, title, Save (primary small)
- Title, Notes fields
- Due date + time fields
- Priority segmented chips with flag + word
- Card: Project, Repeat (habit-vs-task explanation), Importance
- Reminder rows with per-offset level + add-offset chips
- Subtasks list

Motion Screen slides in from the right 380 ms.

Projects P 9

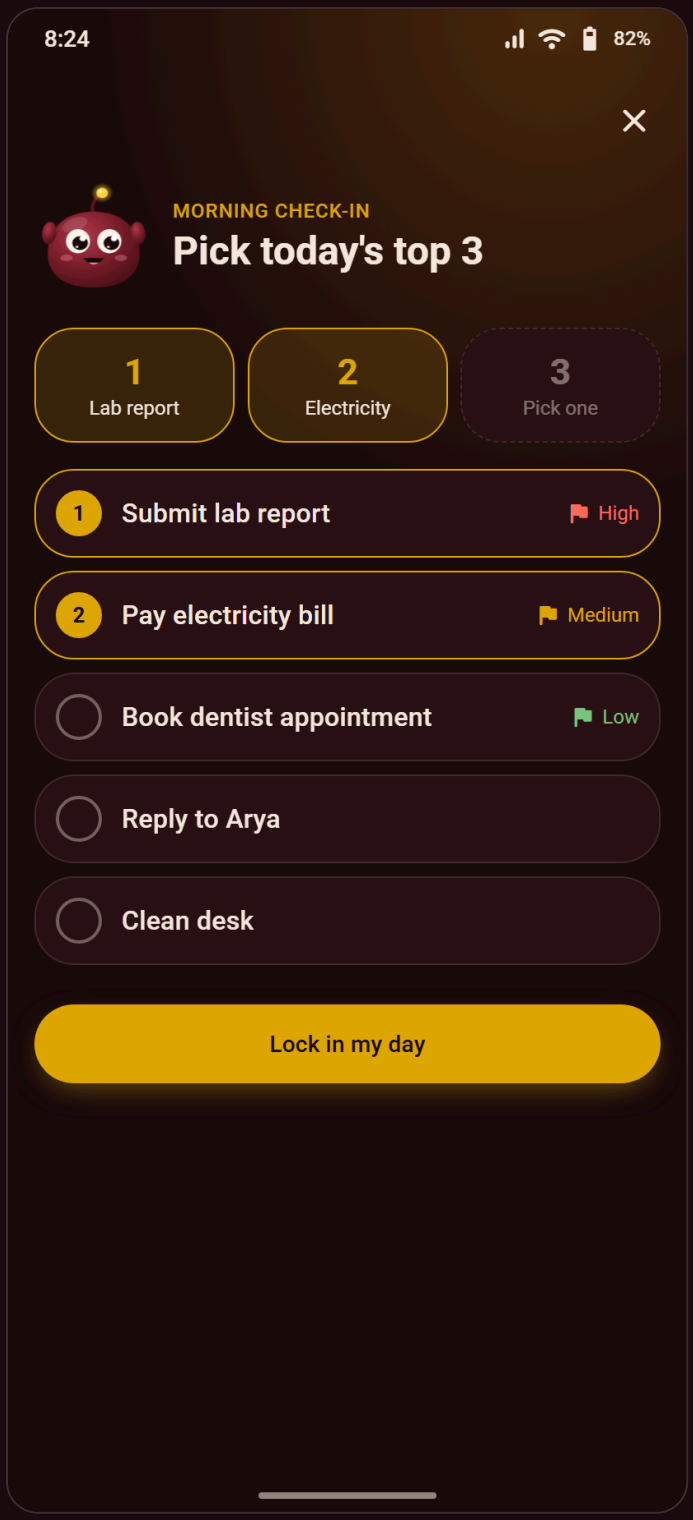

`?s=projects`

Projects with progress.

- Project cards: icon tile in project colour, name, "n of m done", ring %, bar

Motion Rings and bars grow on enter.

Morning check-in (top 3)

Morning check-in (top 3) P 9

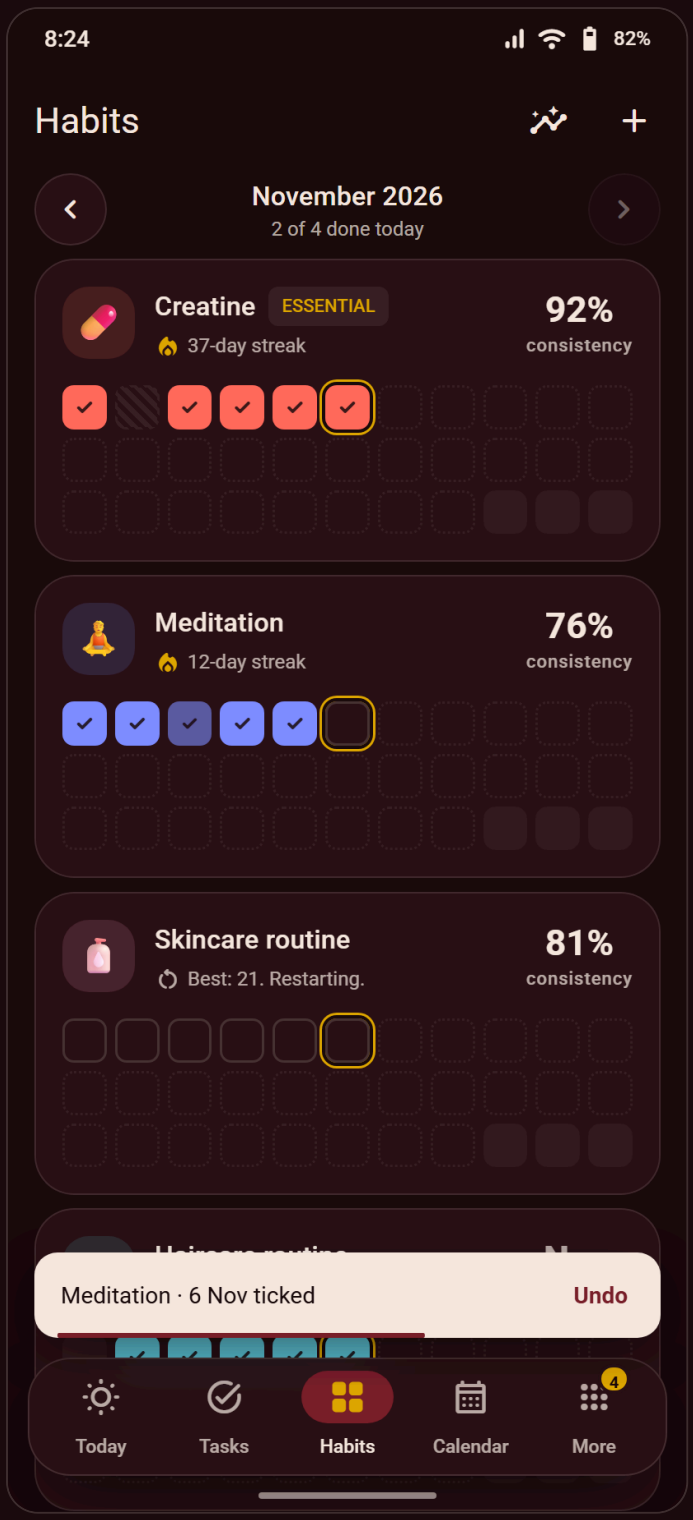

`?s=checkin`

Morning check-in: pick top 3.

- Mascot + label + title
- Three numbered slots (filled = yellow tint, empty = dashed)
- Selectable task list, numbers in the tick
- Lock in my day

Motion Picked task flies into its slot (shared-element style, 400 ms).

Habit grids (month) · Habit grids: skeleton

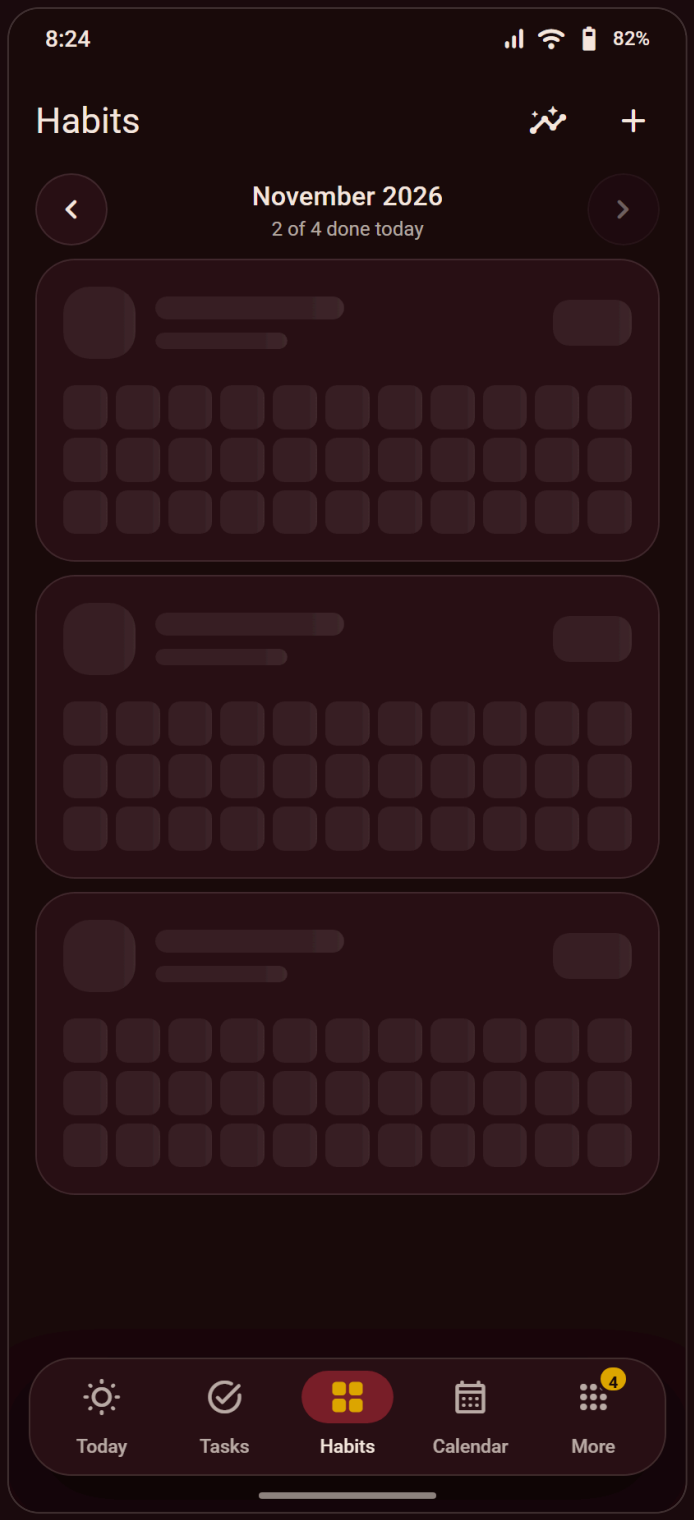

Habit grids (month) P 15

`?s=habits`

Monthly habit grids, 31 boxes (not a labelled calendar).

- Month switcher (future month disabled)
- Habit card: avatar, name, Essential tag, streak line (or "Best: N. Restarting."), consistency % leads (or "New")
- 11-column box grid: done = habit colour + check, today = yellow ring, future dotted, before-start / extra days greyed, paused hatched, KEPT dashed

Motion Tick box: 0.6 → 1.18 → 1 scale (520 ms) + fill + haptic; Undo snackbar.

Habit grids: skeleton P 15, 27

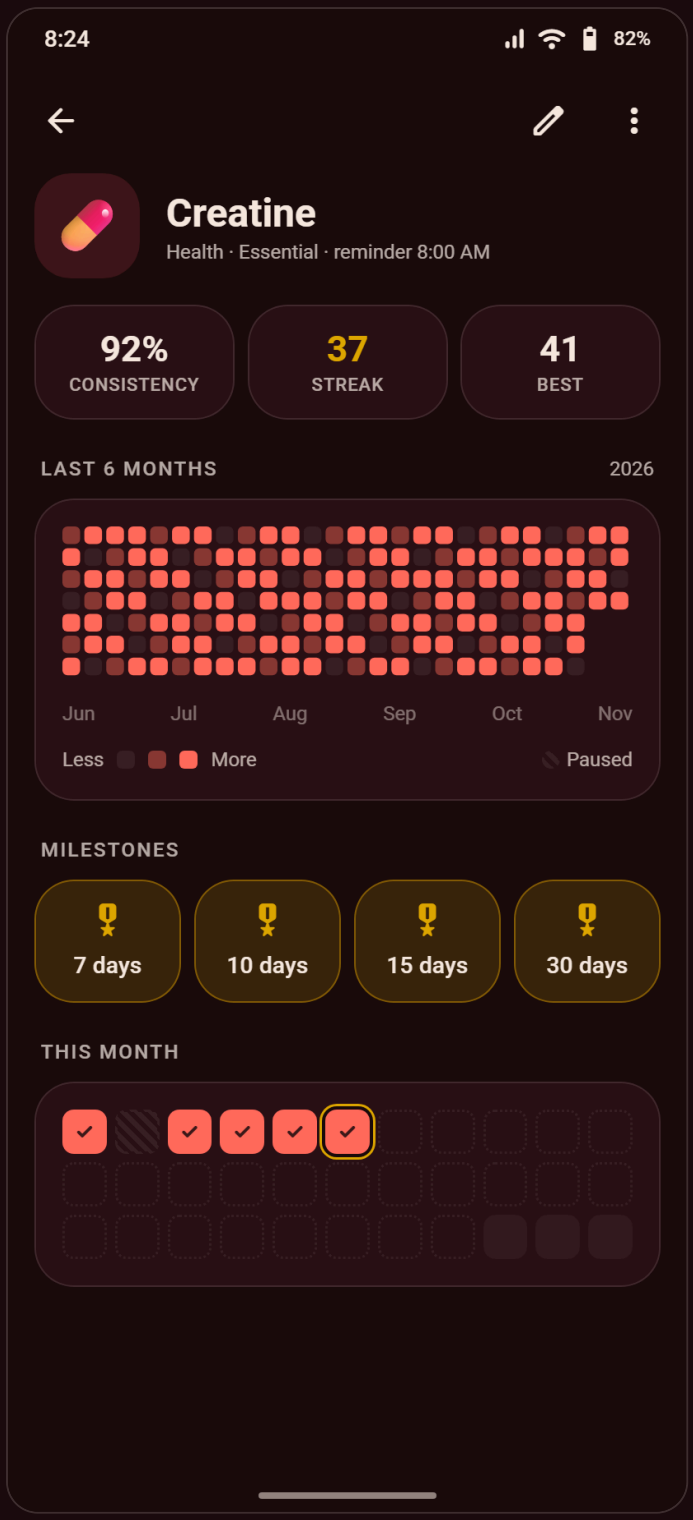

`?s=habits-loading`

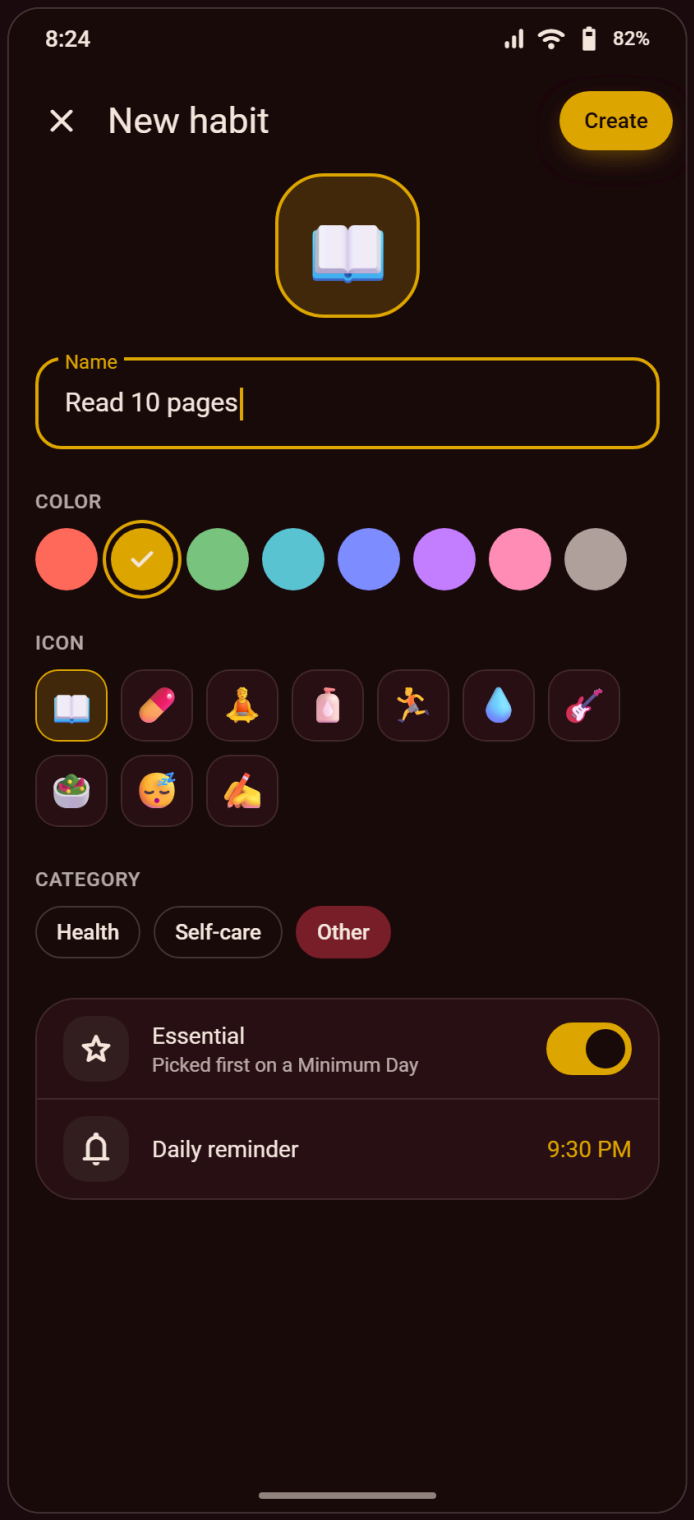

Habit grid skeleton (box grid kept, so the layout does not shift).

- Card skeleton with 33 small boxes

Motion Shimmer 1.3 s.

Habit detail + yearly heatmap · Create / edit habit

Habit detail + yearly heatmap P 15

`?s=habit-detail`

One habit: stats, 6-month heatmap (Canvas), milestones, this month.

- Avatar + name + meta
- Three stat tiles: consistency, streak, best
- Heatmap card with legend + paused key
- Milestone badges 7/10/15/30
- Month grid

Motion Heatmap fades in column by column (Canvas, one draw).

Create / edit habit P 15

`?s=habit-editor`

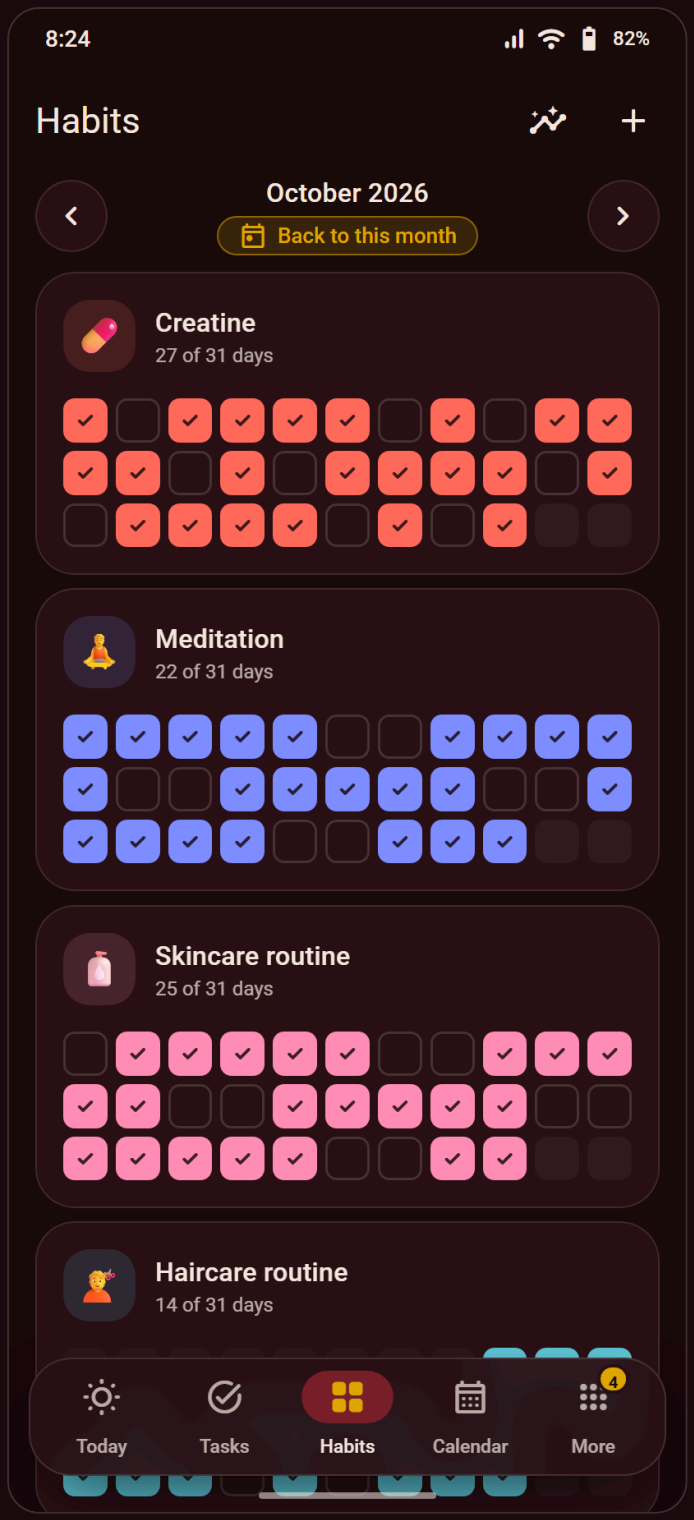

Create / edit habit.

- Big avatar preview
- Name field
- Colour swatches (selected has ring + check)
- Icon picker
- Category segmented
- Essential switch, daily reminder time

Motion Avatar recolours with 250 ms cross-fade.

Milestone celebration · Habit grids: a full past month

Milestone celebration P 16

`?s=celebration`

Milestone celebration (7, 10, 15, 30), once per milestone per streak.

- Confetti layer
- Glow + cheering mascot
- Huge yellow number
- Custom message
- XP + badge chips
- Primary button

Motion Confetti 2.4–4.4 s loops; number pops; text staggers 60 ms. Reduced motion: no confetti, static mascot.

Habit grids: a full past month P 15

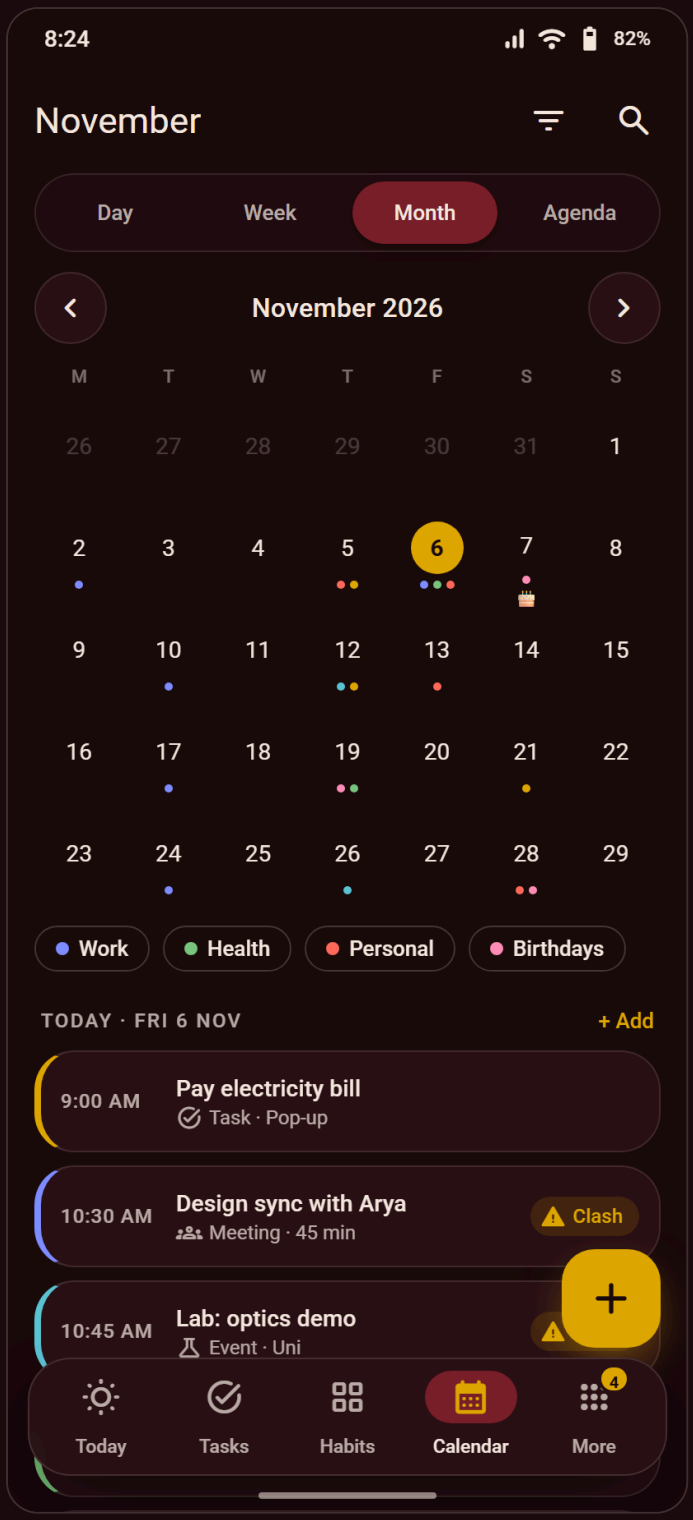

`?s=habits-past`

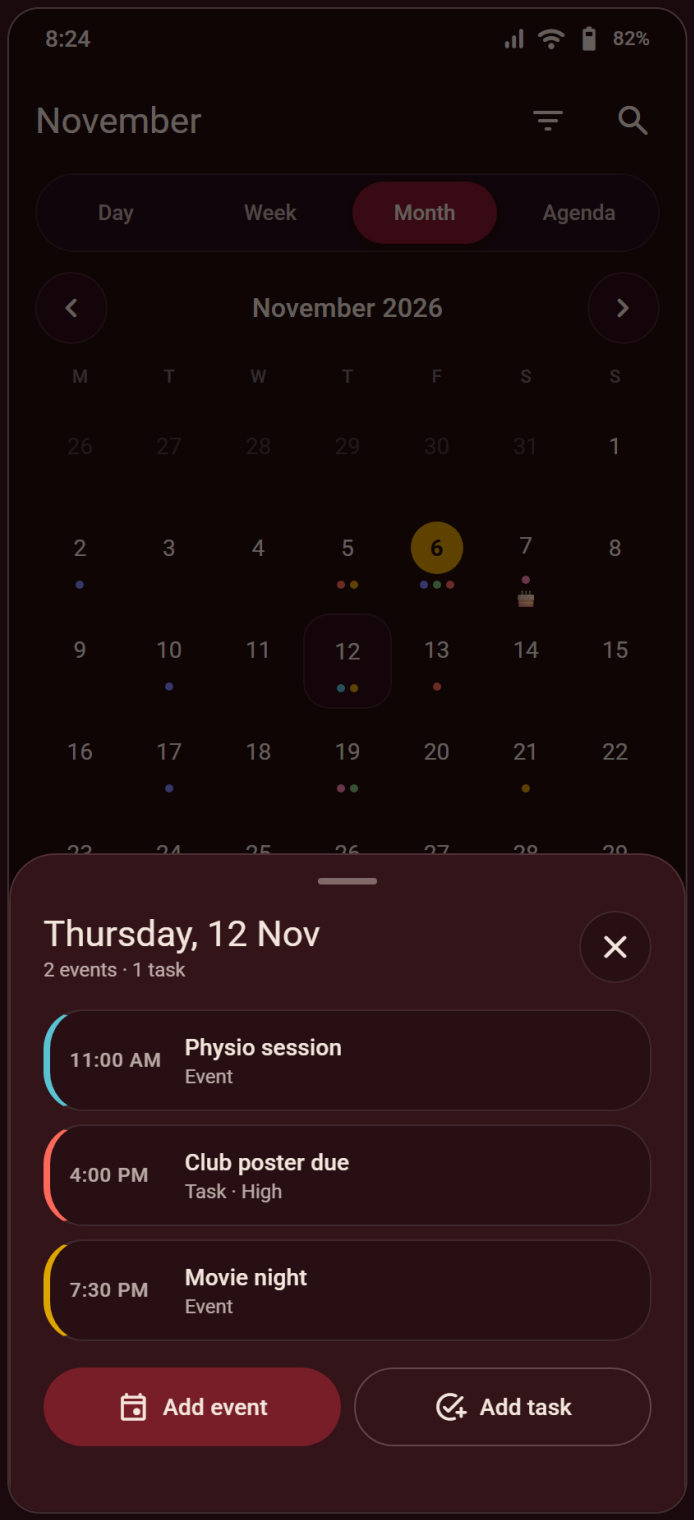

A full past month (previous months are editable, future days are not).

- "Back to this month" chip
- Full grids, "n of 31 days" summary

Motion Month change slides horizontally 300 ms.

Month view · Tap a day: bottom sheet

Month view P 18

`?s=calendar-month`

Month view with dots per category, today filled yellow, birthday glyph.

- Day / Week / Month / Agenda pill tabs
- Month switcher
- 7-column grid, dots under numbers
- Category filter chips
- "Today" list with stripe colour + Clash badge
- FAB

Motion Swipe changes month (slide 300 ms).

Tap a day: bottom sheet P 18

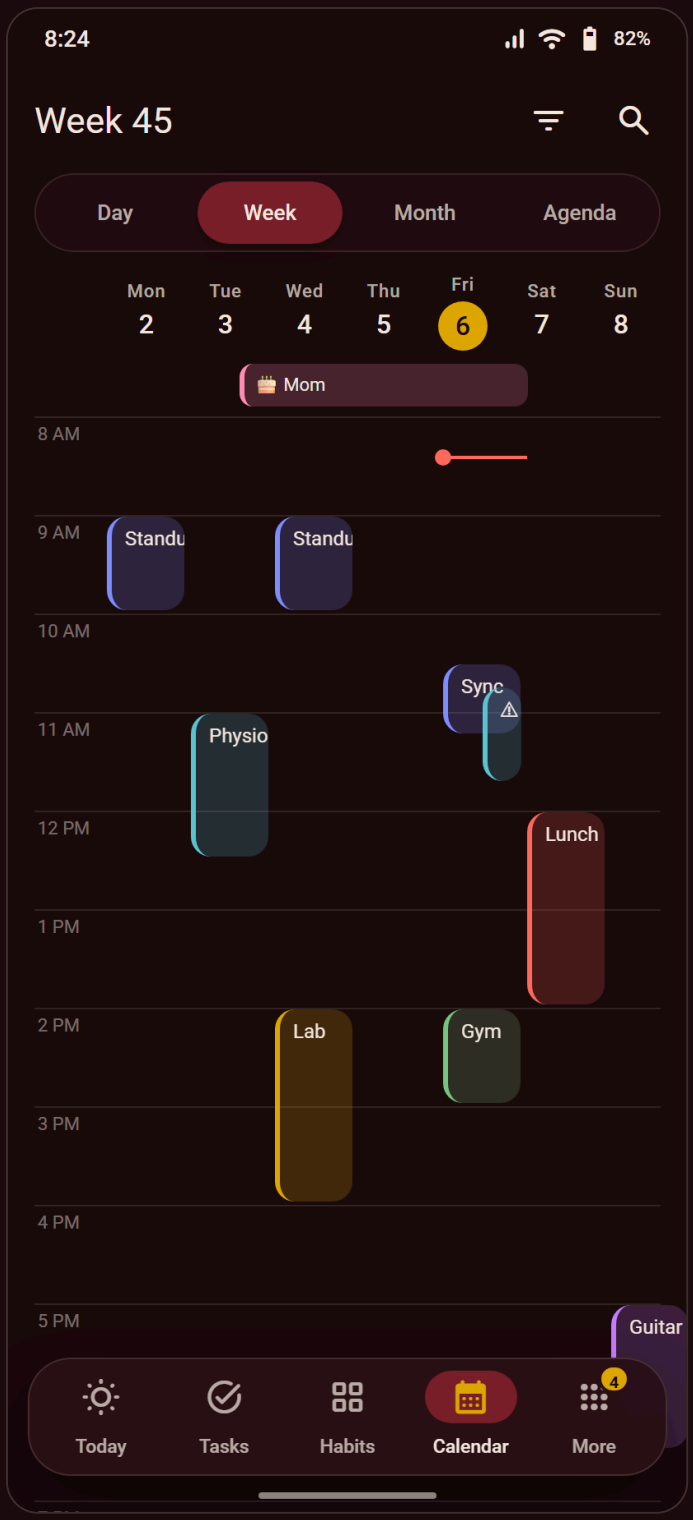

`?s=calendar-daysheet`

Tapping a day shows events AND tasks together, with quick add.

- Selected day outlined
- Sheet: date title + counts, item rows, Add event / Add task

Motion Sheet up 420 ms; rows bounce in.

Week view · Day view

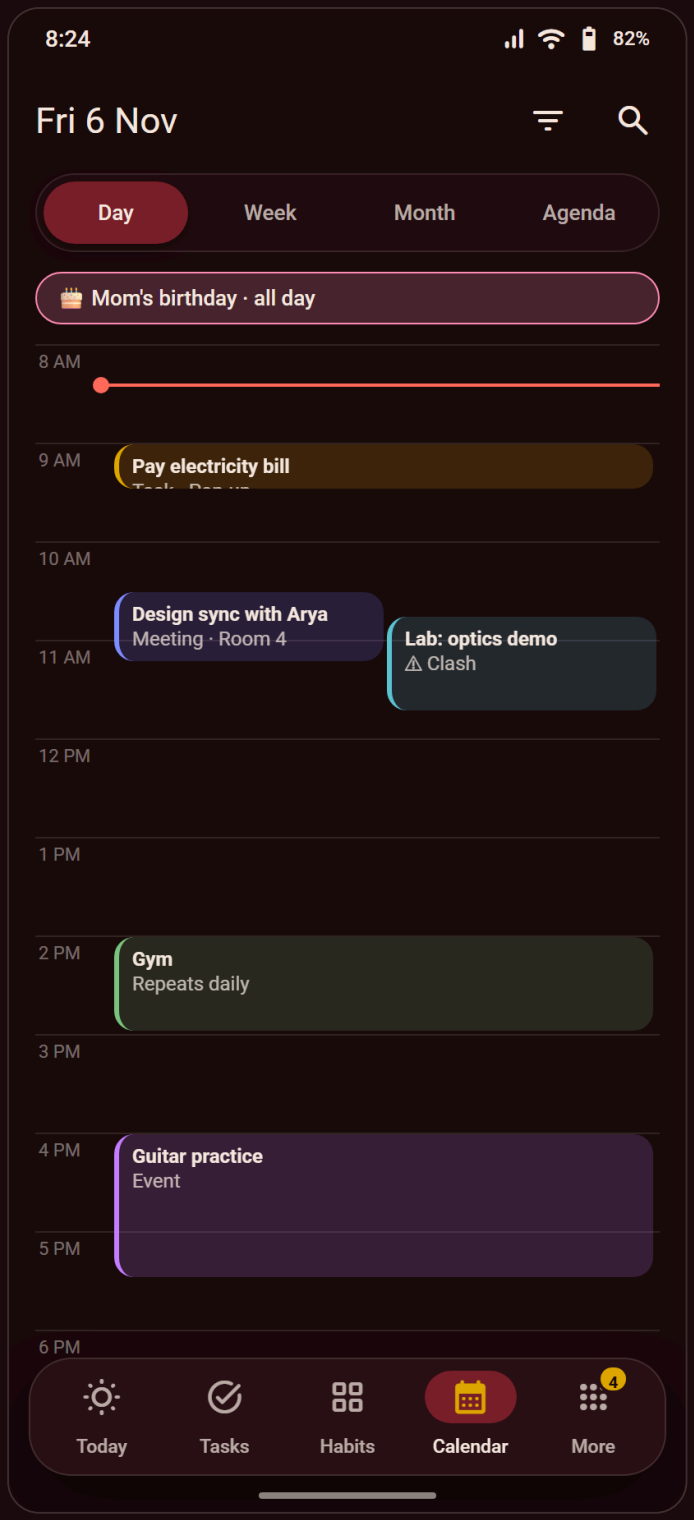

Week view P 18

`?s=calendar-week`

Week time grid with all-day strip, now line, side-by-side overlaps.

- Weekday header (today yellow circle)
- All-day strip
- Hour grid 60 dp/h, events tinted 20% with 3 dp left border
- Red now line in today's column

Motion Events fade in; now line moves each minute.

Day view P 18

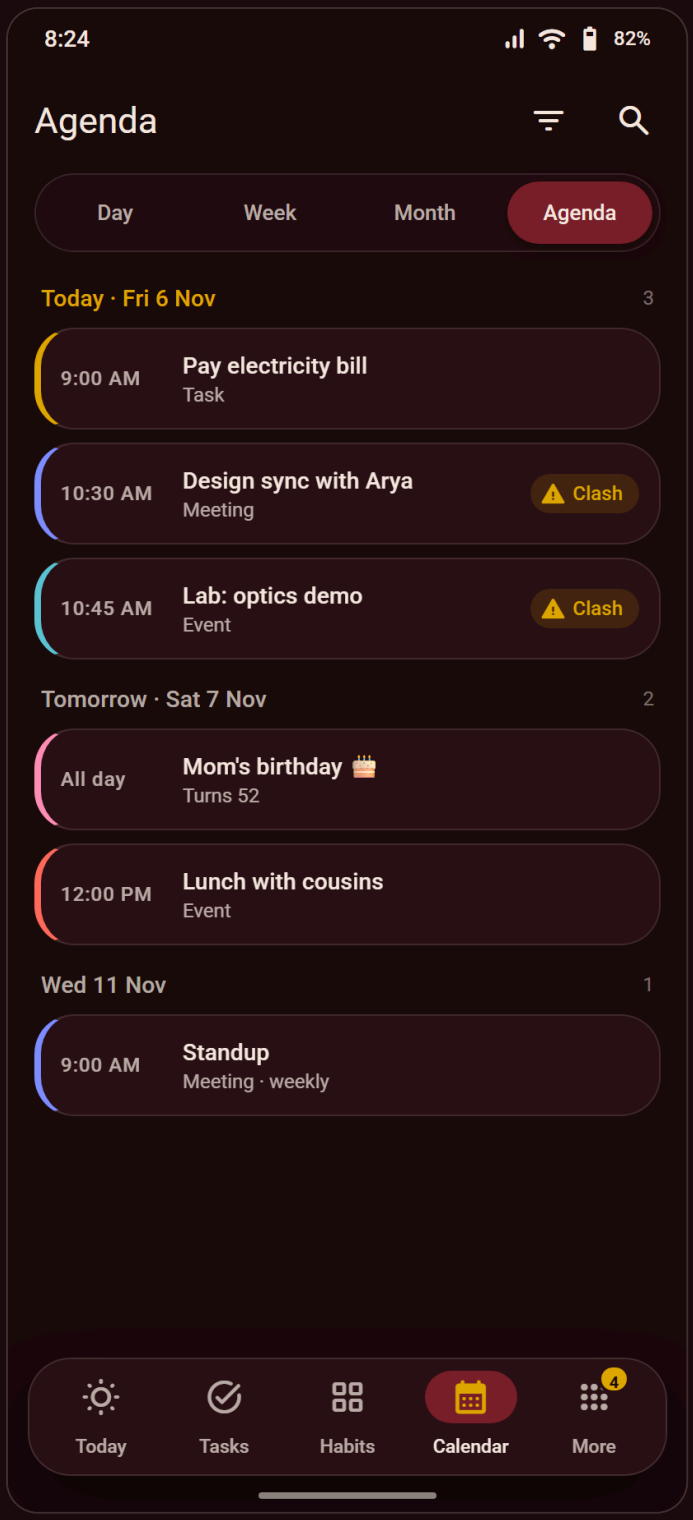

`?s=calendar-day`

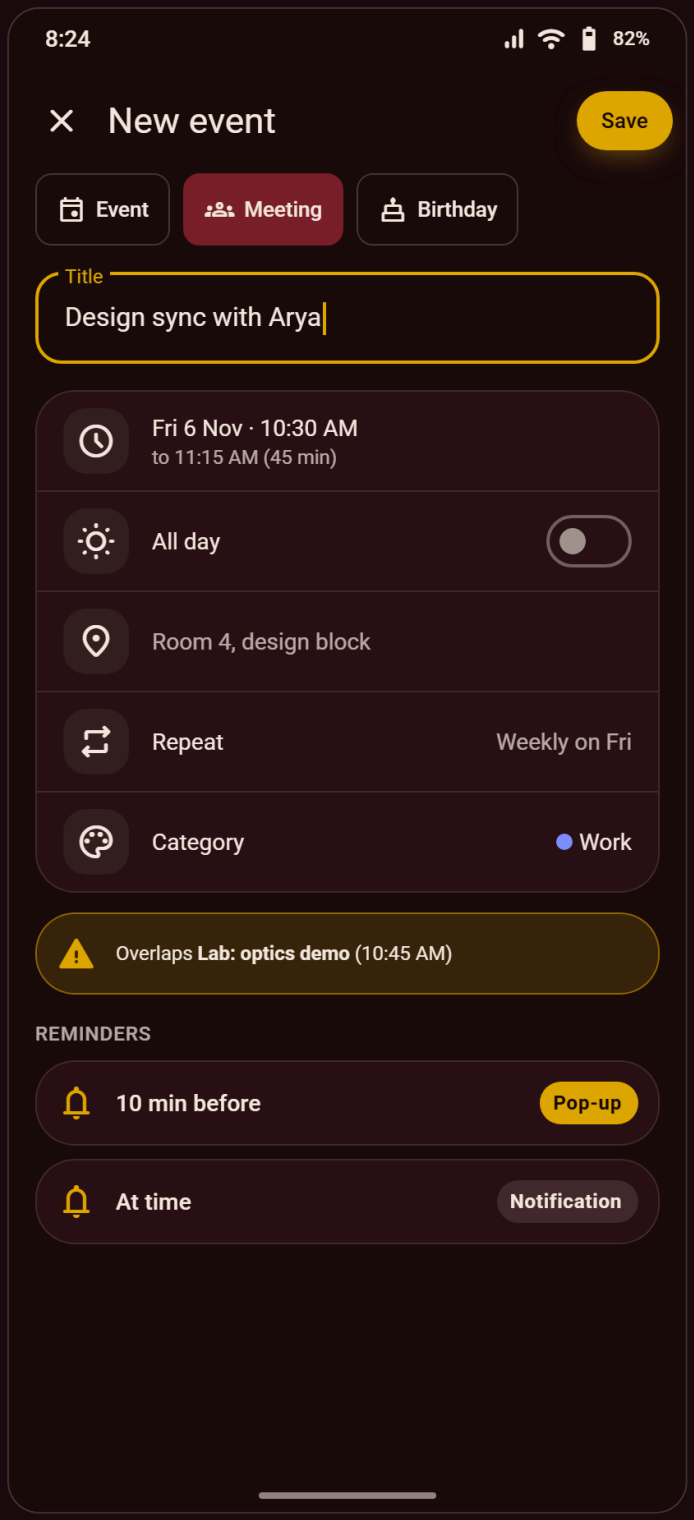

Day time grid.

- All-day chip
- Hour grid, overlapping events split width + Clash
- Now line across

Motion Same as week.

Agenda (sticky headers) · Event editor

Agenda (sticky headers) P 10, 18

`?s=calendar-agenda`

Agenda with sticky date headers.

- Sticky header per day (today in yellow) + count
- Rows: time column, title, type, Clash

Motion Headers stick; rows bounce in.

Event editor P 10

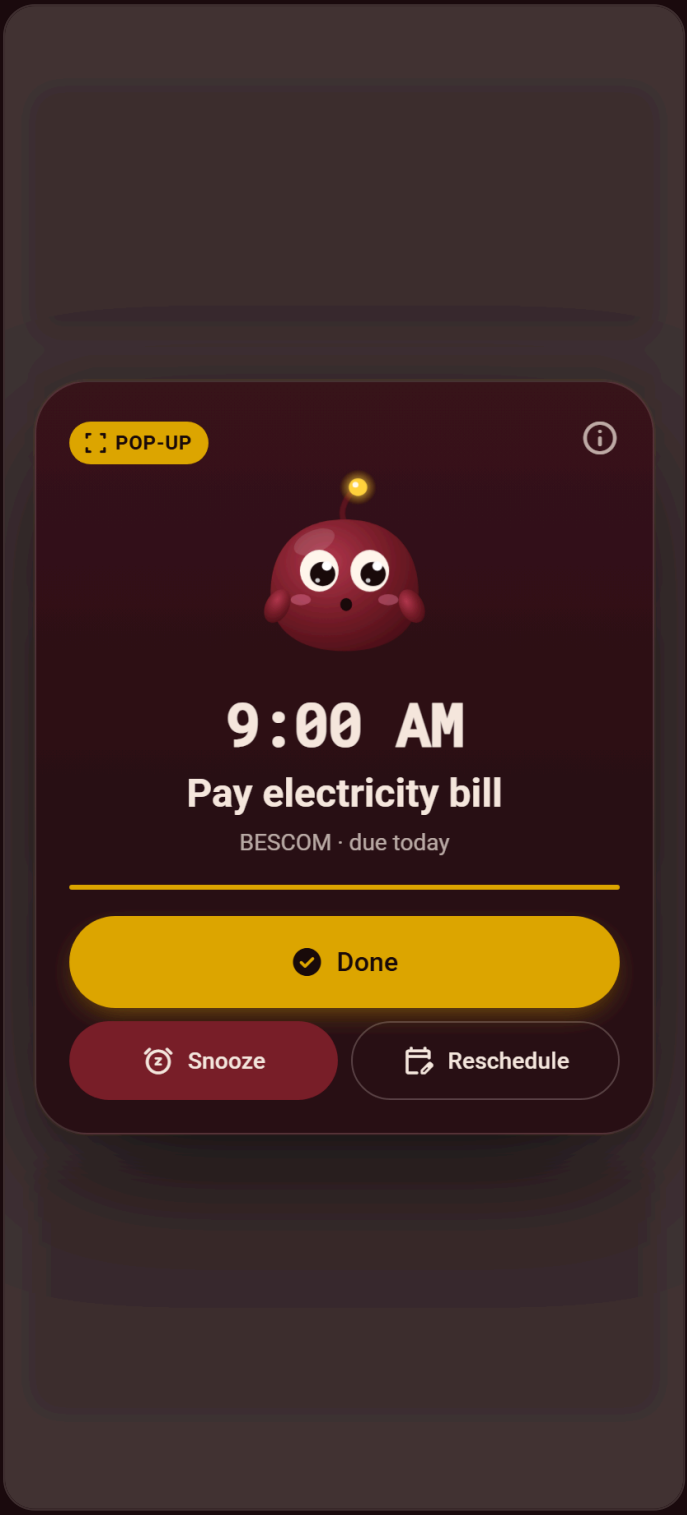

`?s=event-editor`

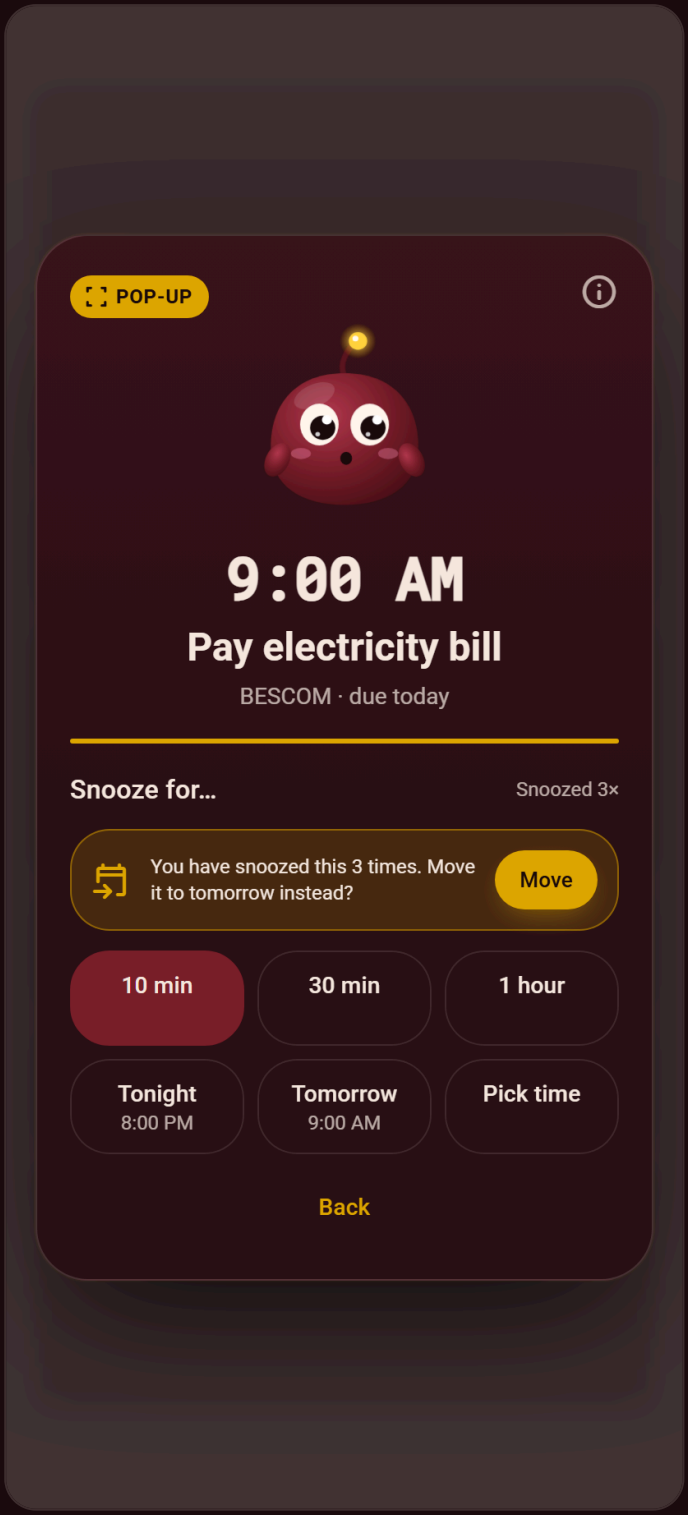

Event / meeting / birthday editor.

- Type segmented (icon + word)
- Title
- Card: time range, all-day, location, repeat, category
- Inline conflict warning
- Reminders with level per offset

Motion Rises in 420 ms.

Full-screen pop-up over another app · Pop-up: snooze options

Full-screen pop-up over another app P 8

`?s=popup`

Signature full-screen reminder over any app (overlay window).

- Blurred dimmed app behind (scrim 82%)
- Card r=32: level badge, info button
- Curious mascot
- Big mono time, title, notes preview
- 700 ms tap-guard bar
- Done (56 dp), Snooze, Reschedule

Motion Card scales 0.82 → 1 with overshoot (520 ms); buttons ignore taps for 700 ms while the bar fills. Reduced motion: fade only.

Pop-up: snooze options P 8

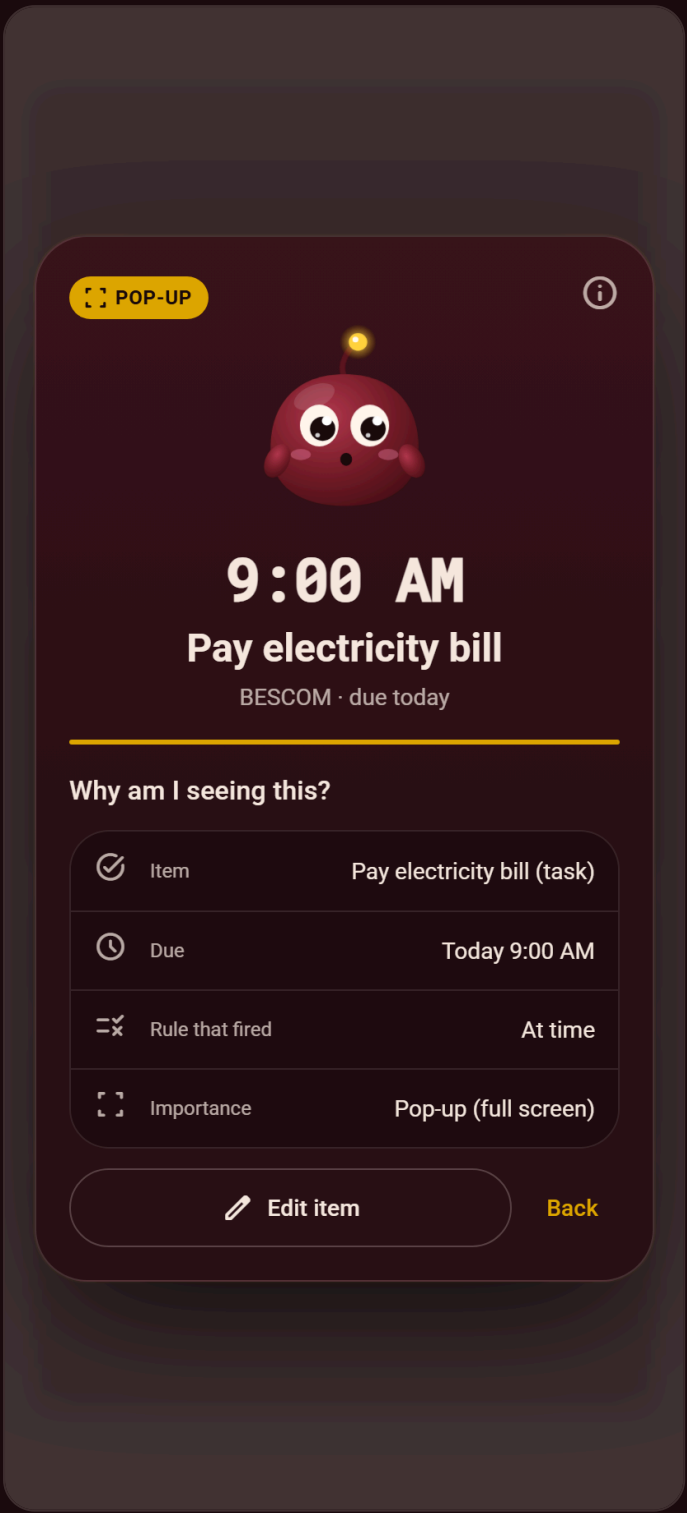

`?s=popup-snooze`

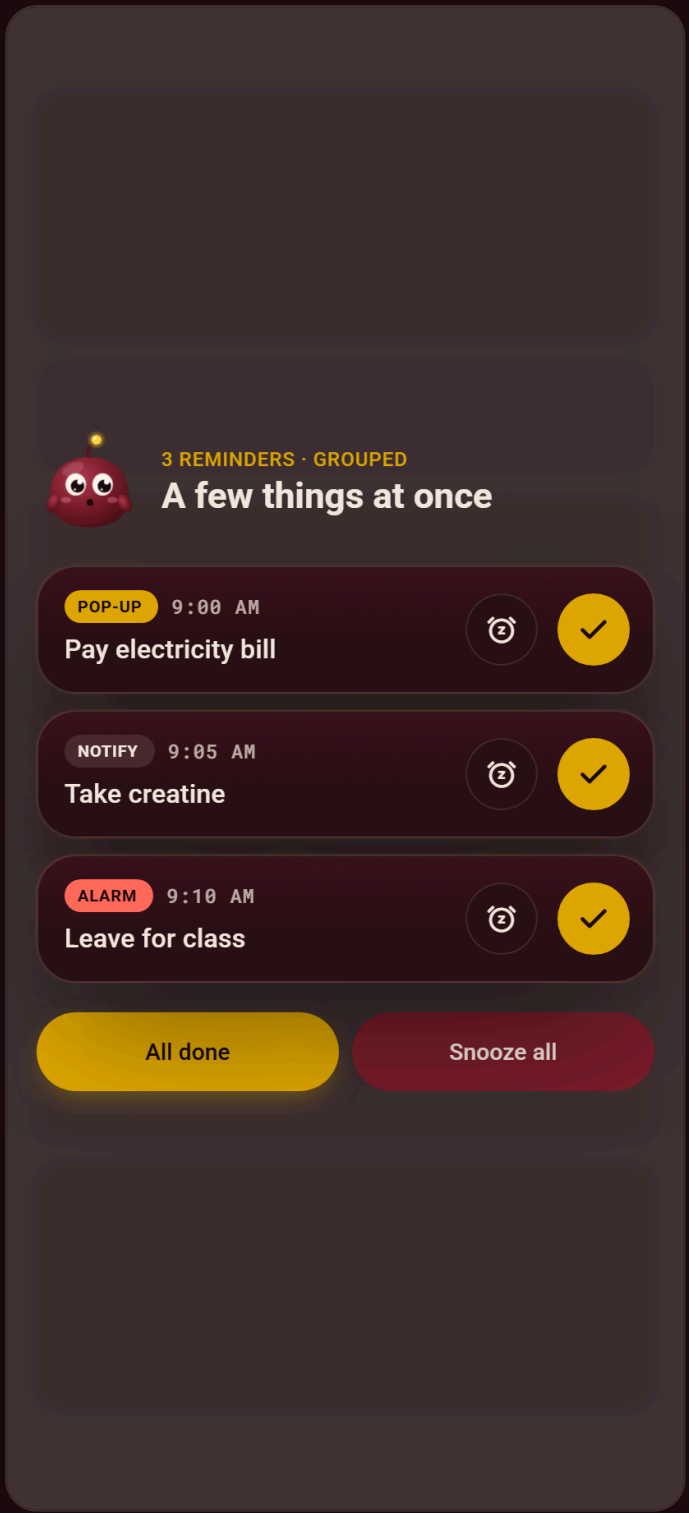

Snooze options inside the card; 3-snooze suggestion.

- Suggestion card: Move to tomorrow?
- 3×2 grid: 10 min, 30 min, 1 hour, Tonight 8 PM, Tomorrow 9 AM, Pick time
- Back

Motion Panel swaps with a fade; options pop staggered.

Pop-up: "Why am I seeing this?" · Pop-up: grouped stack

Pop-up: "Why am I seeing this?" P 8

`?s=popup-why`

"Why am I seeing this?": item, due, rule, importance, edit link.

- Sunken card with 4 label/value rows
- Edit item + Back

Motion Panel cross-fade 250 ms.

Pop-up: grouped stack P 8, 12

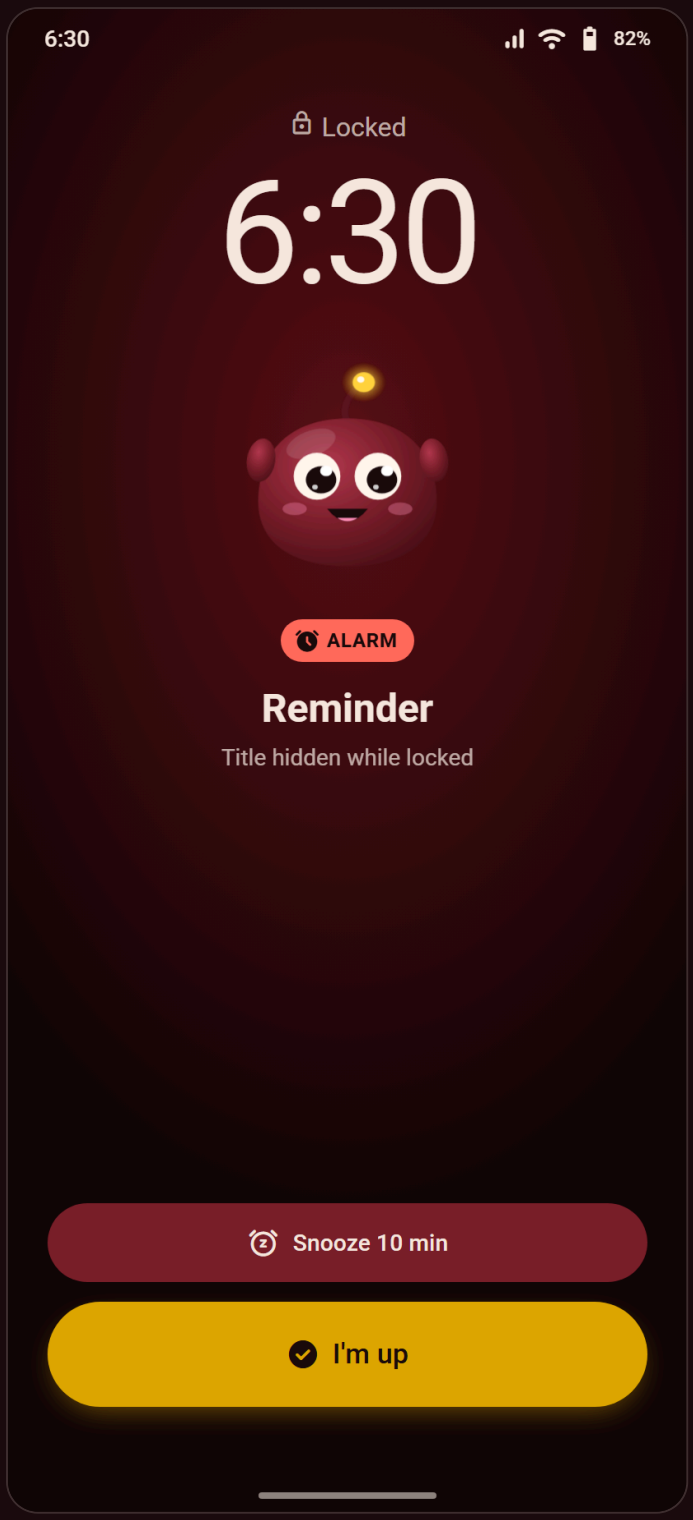

`?s=popup-stack`

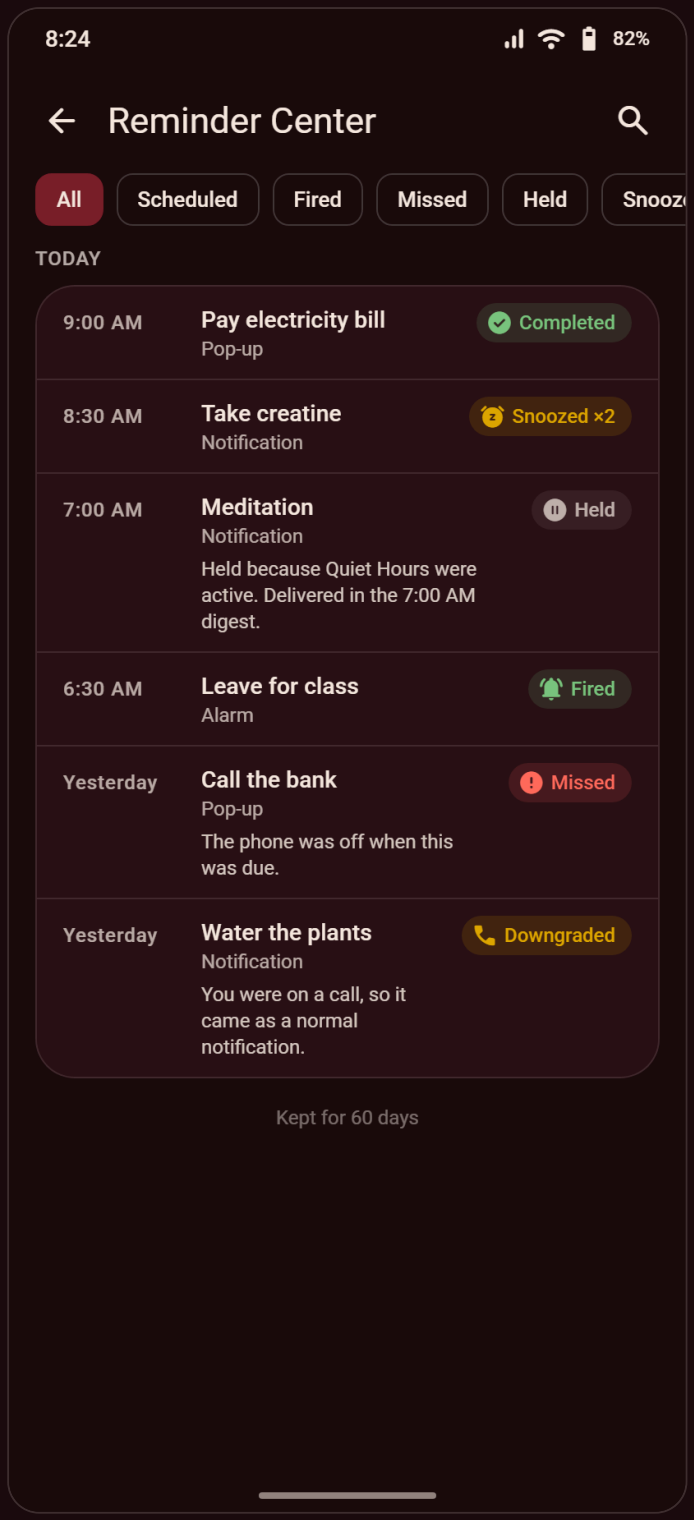

Several reminders in ONE window (grouped within 10 min).

- Mascot + "3 reminders · grouped"
- Compact cards: level, time, title, snooze, done
- All done / Snooze all

Motion Cards drop in 90 ms apart.

Locked phone: private ALARM · Reminder Center

Locked phone: private ALARM P 8

`?s=popup-locked`

Locked screen / full-screen intent; title hidden by the privacy setting.

- Lock time
- Mascot + ALARM badge
- "Reminder" + "Title hidden while locked"
- Snooze 10 min + big I'm up

Motion Mascot bounces until a button is pressed; sound stops on any press.

Reminder Center P 11

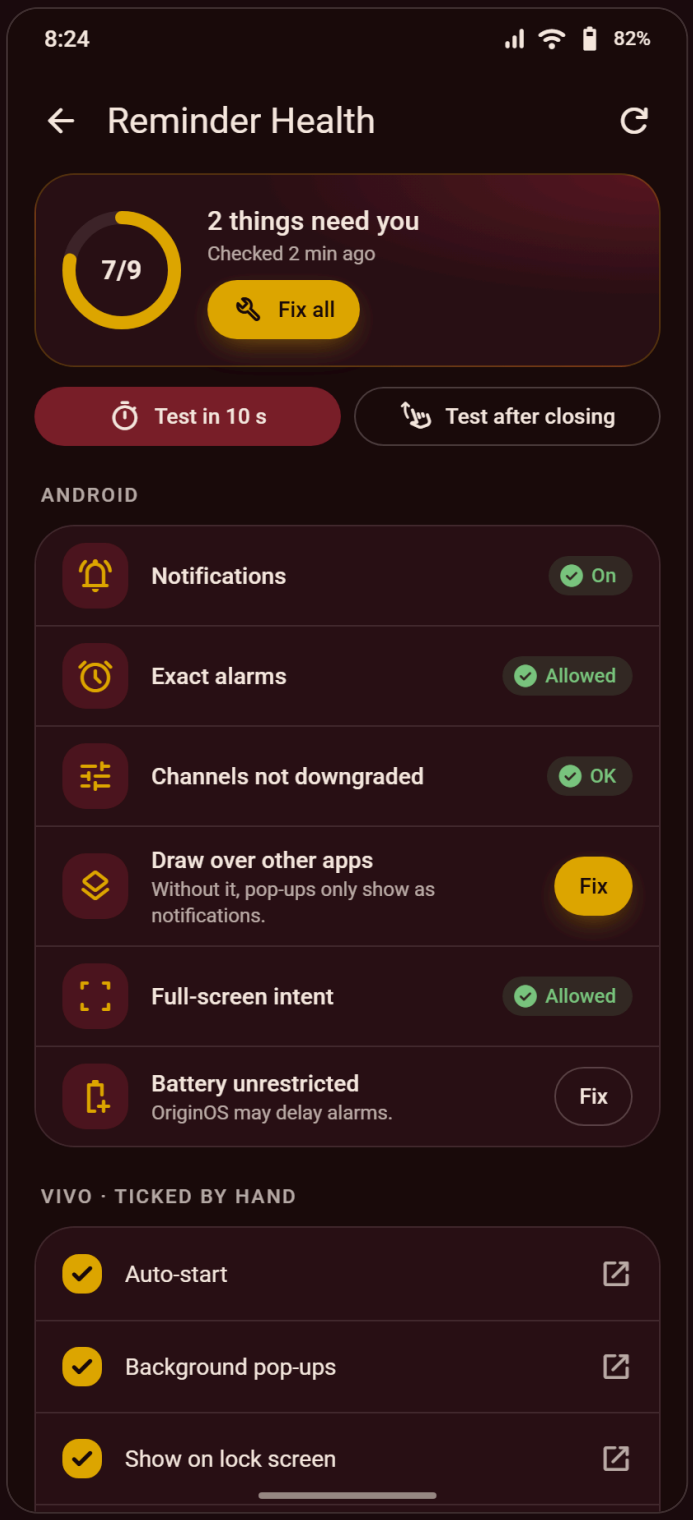

`?s=reminder-center`

Log of every reminder with status and plain-language reason.

- Filter chips: All, Scheduled, Fired, Missed, Held, Snoozed, Failed
- Rows: time, item, level, reason sentence, status chip (icon + word)
- "Kept for 60 days"

Motion Rows bounce in.

Reminder Health · Quiet Hours, Pause & fatigue settings

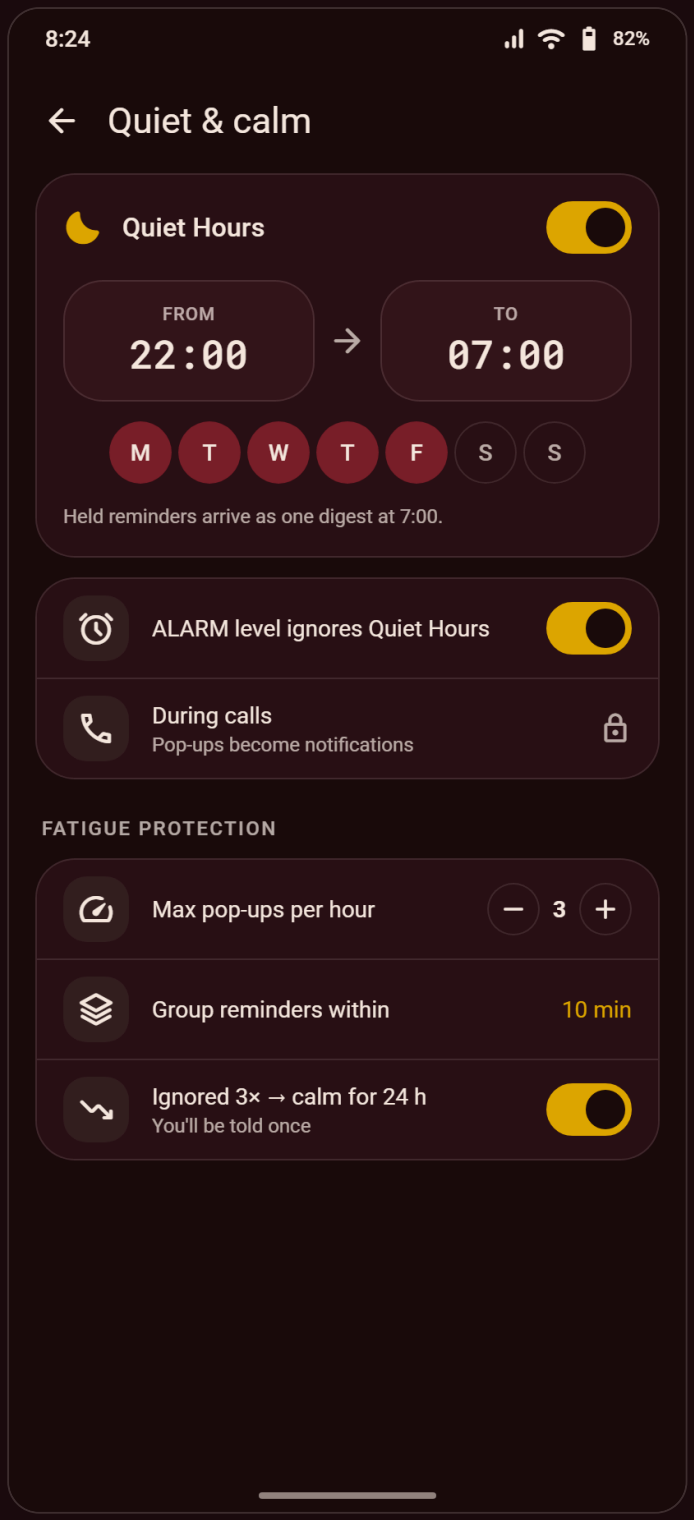

Reminder Health P 11

`?s=reminder-health`

Green / yellow / red health with Fix all and test buttons.

- Hero: ring n/9, summary, Fix all
- Test in 10 s / Test after closing
- Android rows with Fix buttons
- Vivo manual ticks

Motion Ring animates to the new score after a re-check.

Quiet Hours, Pause & fatigue settings P 12

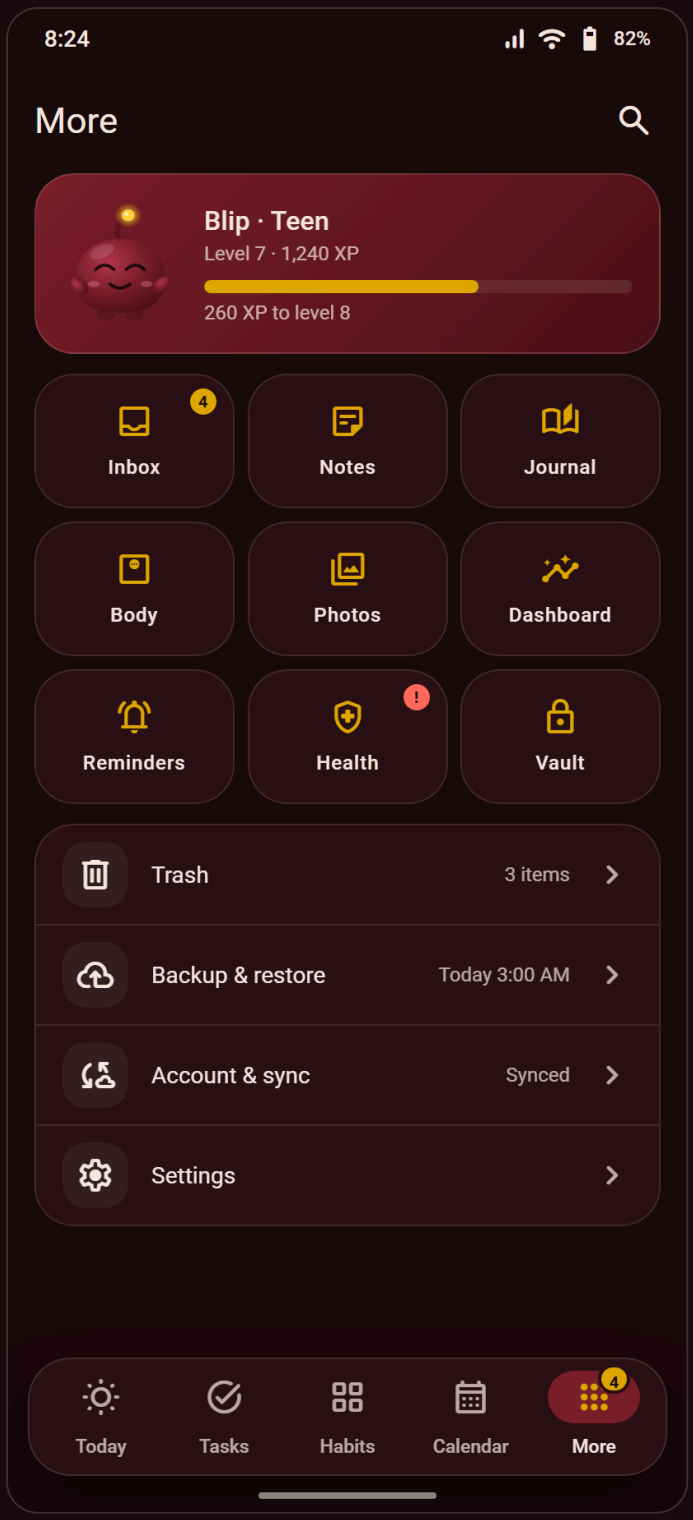

`?s=quiet-hours`

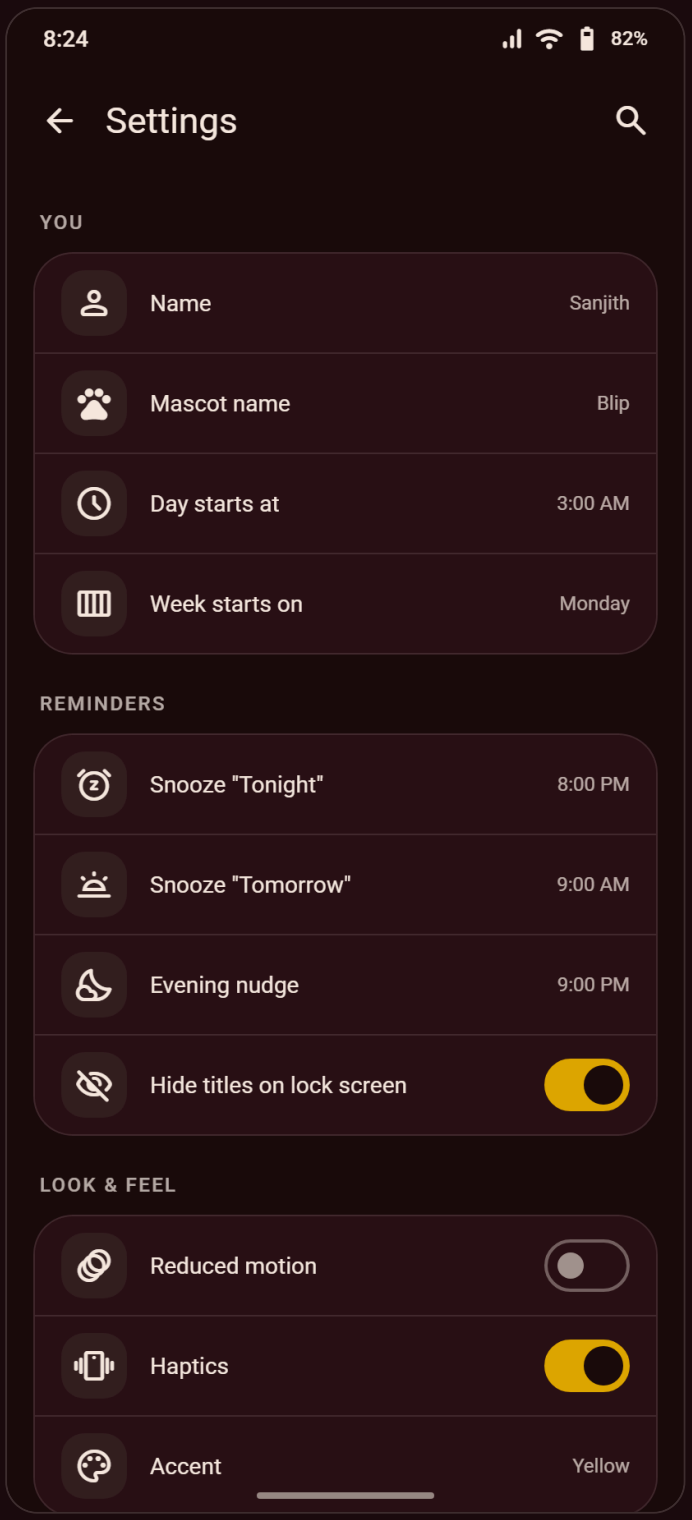

Quiet Hours, in-call rule and fatigue protection settings.

- Quiet Hours card: switch, FROM/TO mono times, weekday circles
- ALARM bypass, during calls
- Fatigue: max per hour stepper, grouping window, ignore-downgrade switch

Motion Switch thumb grows + slides 250 ms.

More (hub) · Settings

More (hub) P 17, 21

`?s=more`

Hub for everything not in the 4 main tabs.

- Mascot card: stage, level, XP bar
- 3×3 tile grid (Inbox badge, Health alert)
- List: Trash, Backup, Account & sync, Settings

Motion Tiles pop staggered 40 ms.

Settings P 27

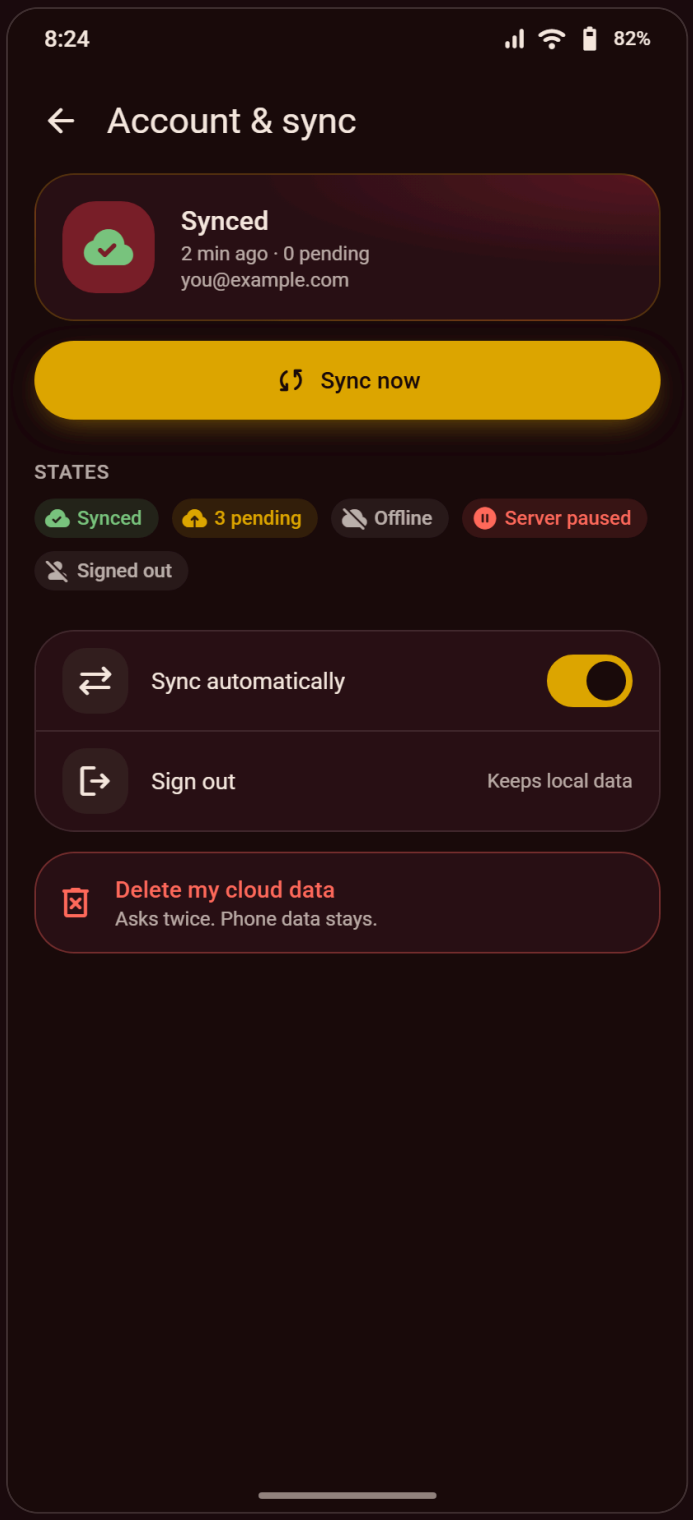

`?s=settings`

Every default from context.md section 13 is editable.

- Grouped cards: You, Reminders, Look & feel, Privacy
- Rows: icon tile, label, value or switch

Motion Switches animate 250 ms.

Account & sync · Backup & restore

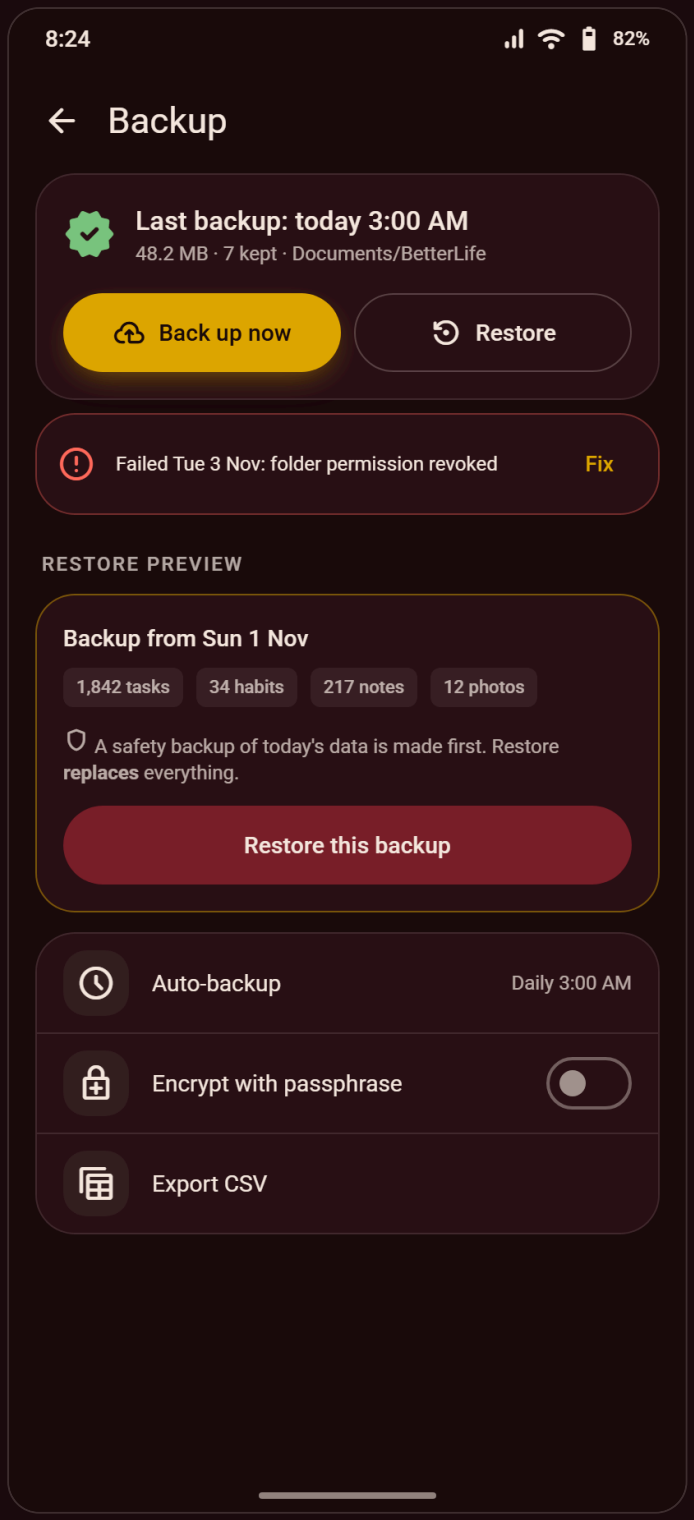

Account & sync P S1, S2

?s=sync

Account and sync status; never blocks the app.

- Status hero
- Sync now
- All sync states as chips
- Auto sync, Sign out
- Delete my cloud data (asks twice)

Motion Sync icon spins while syncing.

Backup & restore P 13, 29

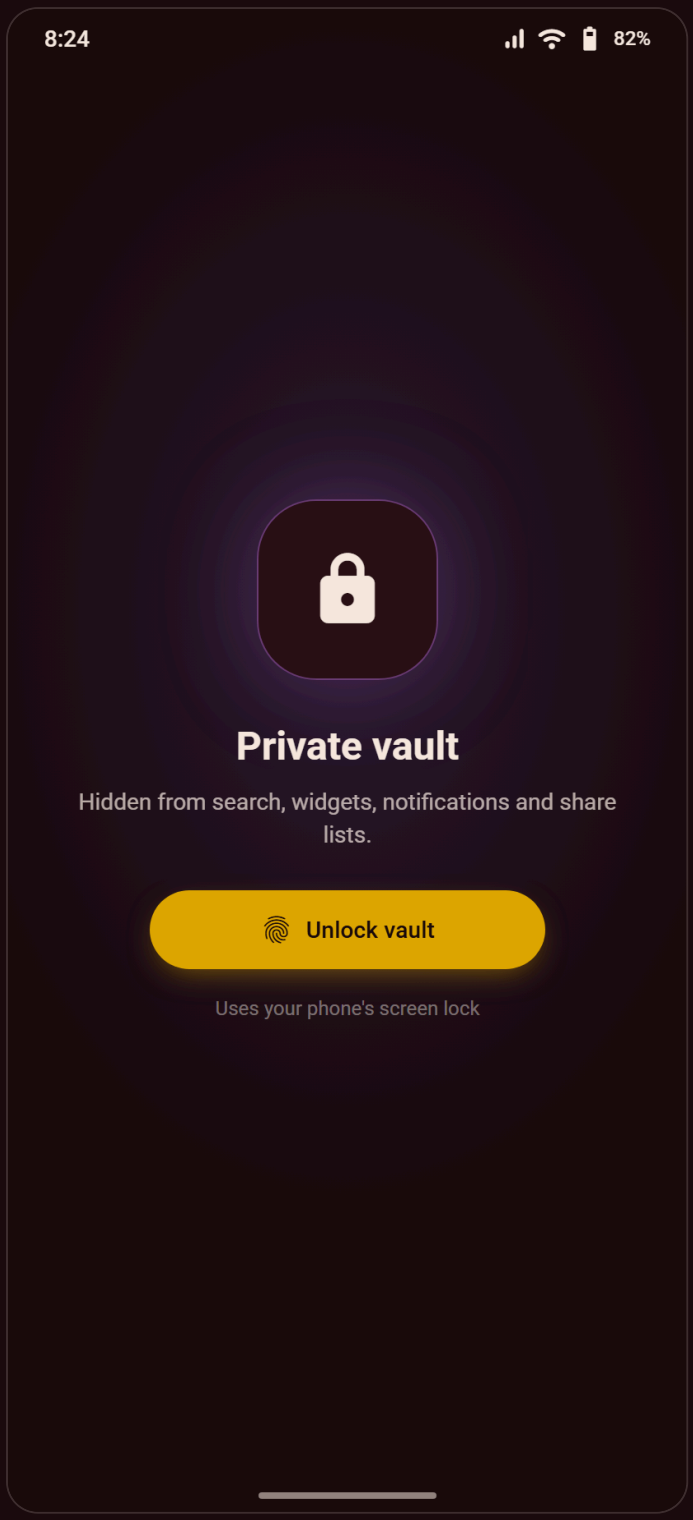

?s=backup

Backup status and restore preview.

- Last backup card with actions
- Failed backup row + Fix
- Restore preview: counts, safety-backup note, REPLACES warning
- Auto-backup, encryption, CSV

Motion Progress bar while backing up.

Private vault (second lock)

Private vault (second lock) P 28

`?s=vault`

Private vault behind a second lock.

- Lock tile with violet glow
- Title + what it hides
- Unlock vault

Motion Tile pops; unlock zooms in 300 ms.

Notes · Empty state (mascot)

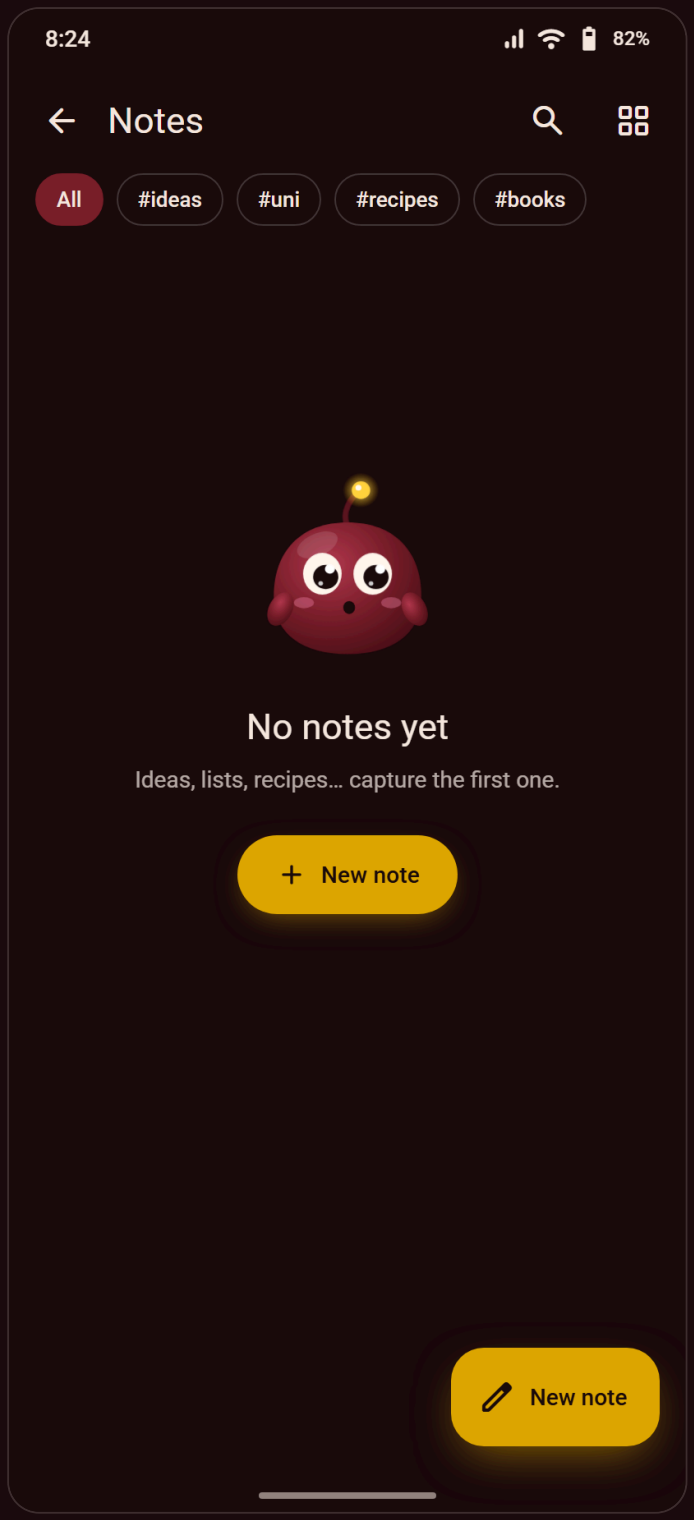

Notes P 21

`?s=notes`

Notes in a 2-column masonry with tags and pinned.

- Tag filter chips
- Note cards with colour top stripe, preview, tag
- Extended FAB New note

Motion Cards bounce in.

Empty state (mascot) P 27

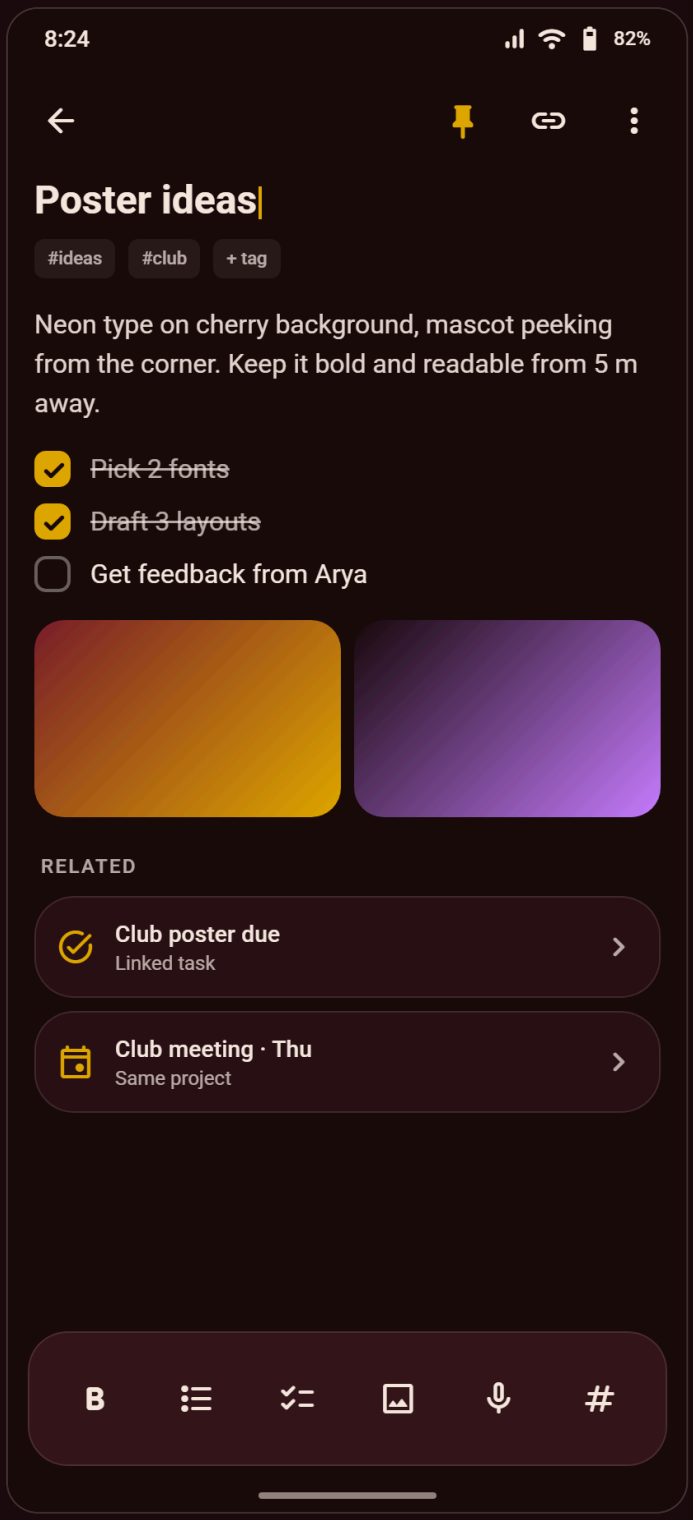

`?s=notes-empty`

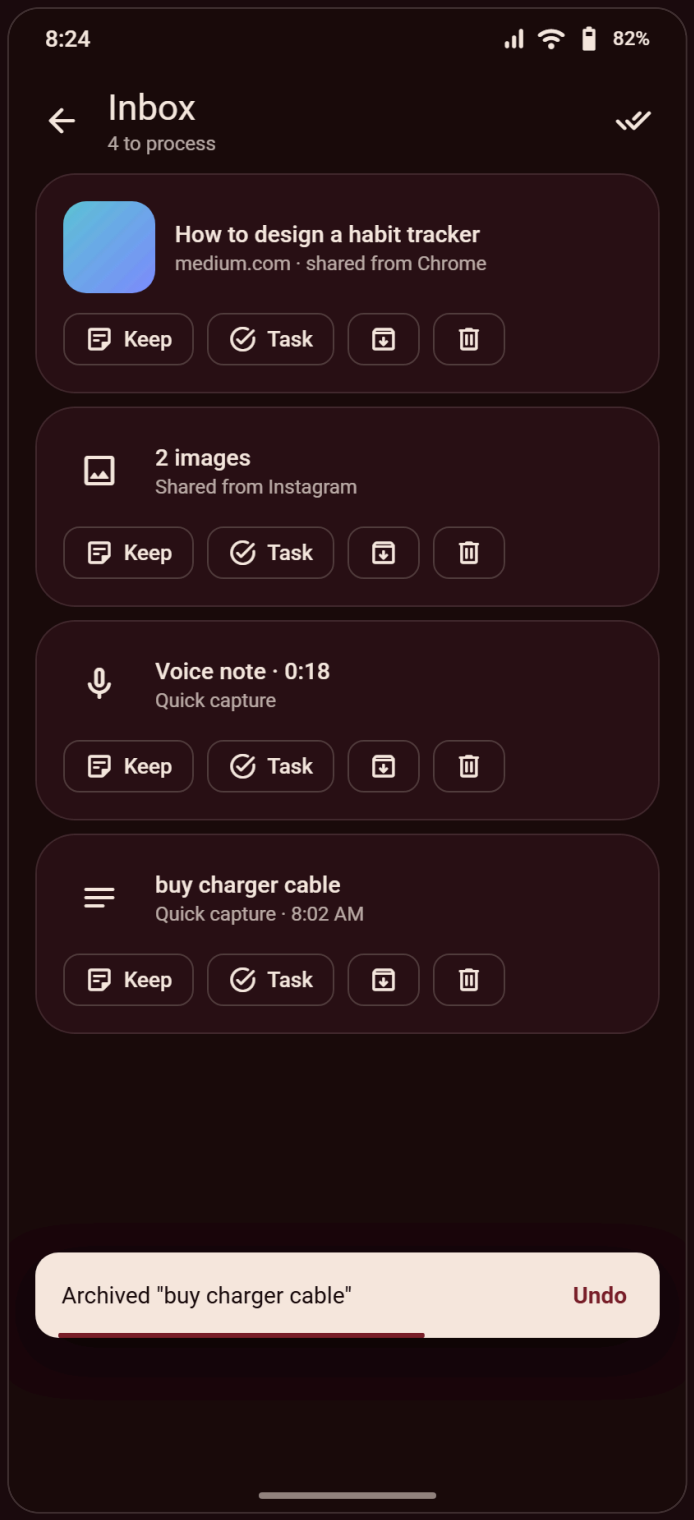

Empty state pattern: mascot, title, one friendly line, one action.

- Curious mascot
- Title
- Line
- Primary button

Motion Mascot idles (blink every 4 s).

Note editor · Inbox (process captures)

Note editor P 21, 23

`?s=note-editor`

Note with checklist, photos, links and related items.

- Pin, link, more
- Title, tags
- Body, checklist
- Photo tiles
- Related (max 5)
- Floating formatting toolbar

Motion Checklist item tick pops.

Inbox (process captures) P 21, 22

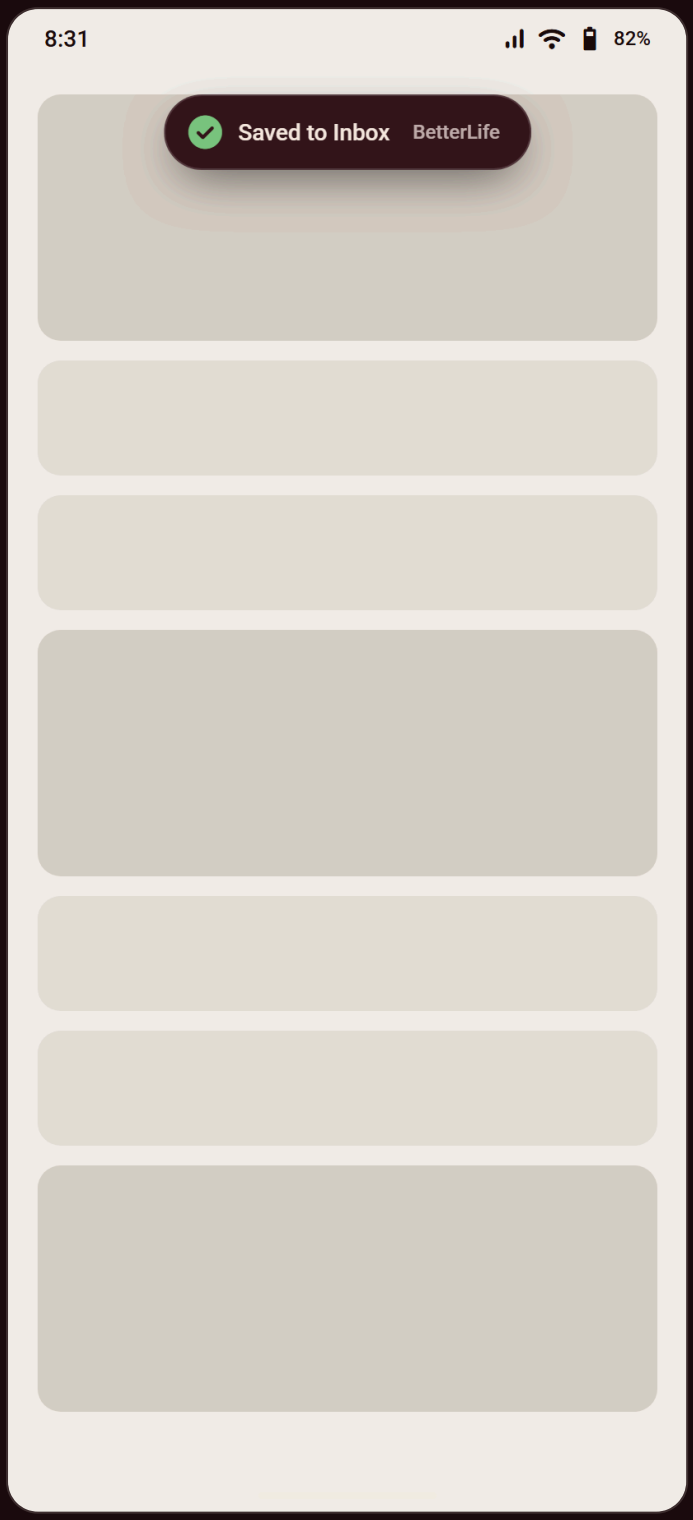

`?s=inbox`

Process captures: Keep as note, Turn into task, Archive, Delete.

- Capture cards: preview / type icon, title, source
- Action chips row
- Undo snackbar

Motion Processed card slides out left 250 ms, list closes the gap.

Share-to-app: "Saved to Inbox" · Trash (30-day)

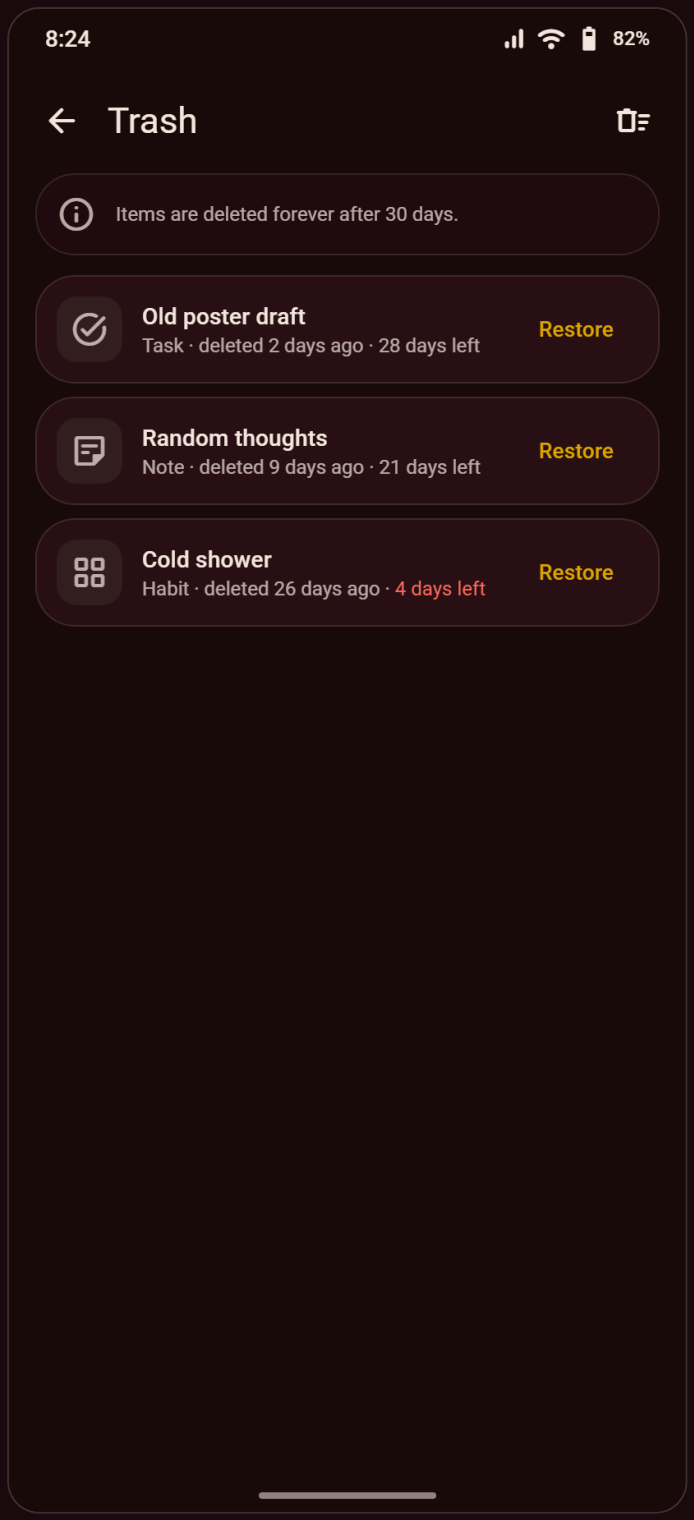

Share-to-app: "Saved to Inbox" P 22

?s=share-saved

Share sheet result: saved without unlocking and without showing content.

- Toast pill over the source app: check + "Saved to Inbox"

Motion Toast drops in 420 ms, leaves after 2 s.

Trash (30-day) P 21

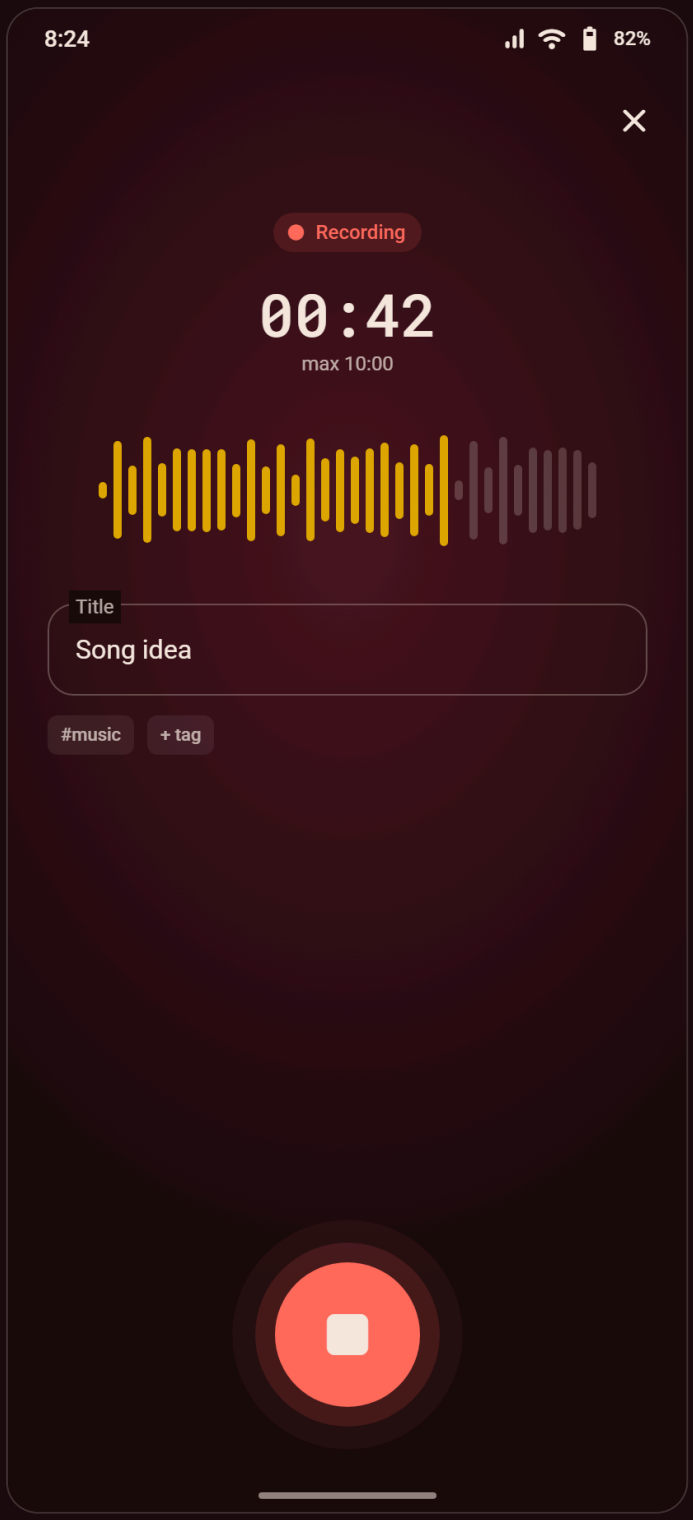

?s=trash

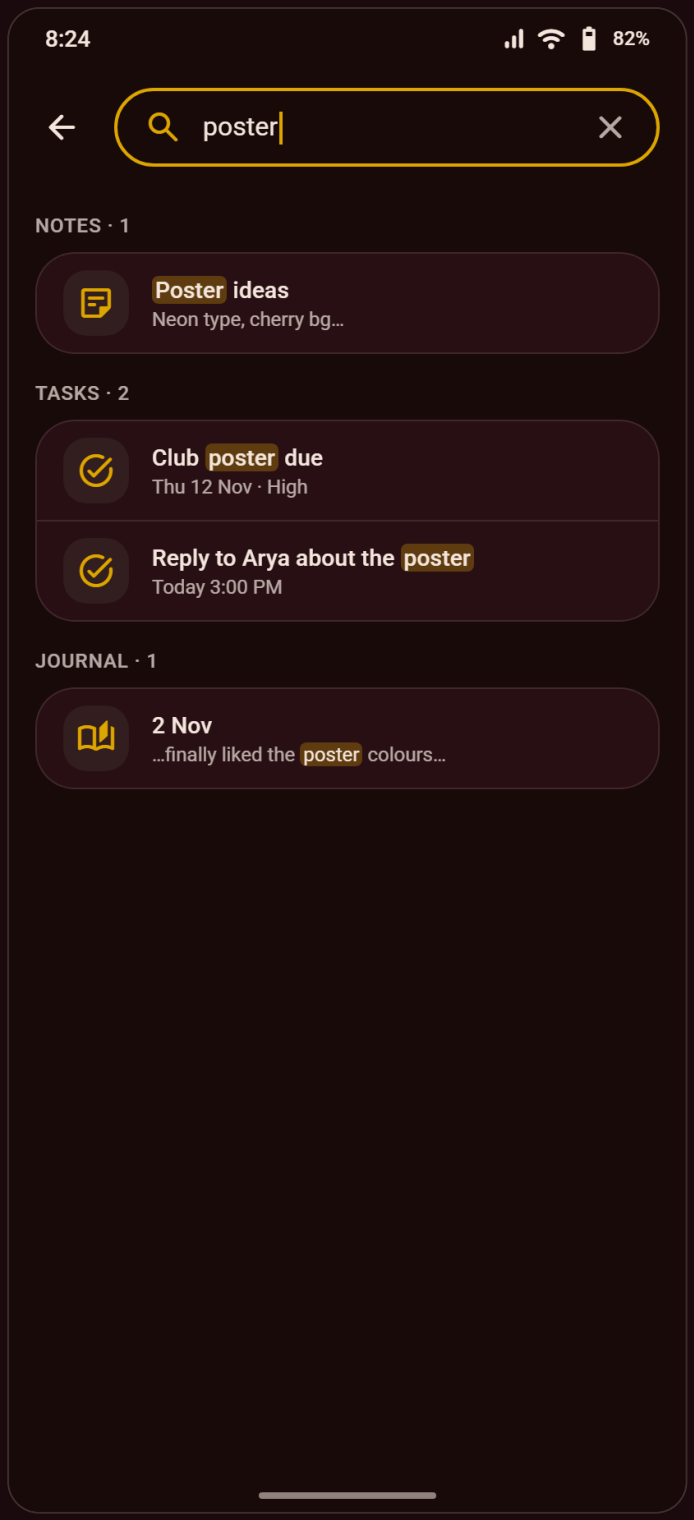

30-day Trash with Restore.

- Info card
- Rows: type icon, title, type + age, days left (red under 7), Restore

Motion Restored row slides out.

Voice note recorder · Global search

Voice note recorder P 22

`?s=voice`

Voice note recorder (no transcription).

- Recording status chip
- Mono timer + max
- Live waveform bars
- Title + tags
- Delete, Stop (88 dp red), Pause

Motion Bars follow the level; stop button has a soft pulse ring.

Global search P 23

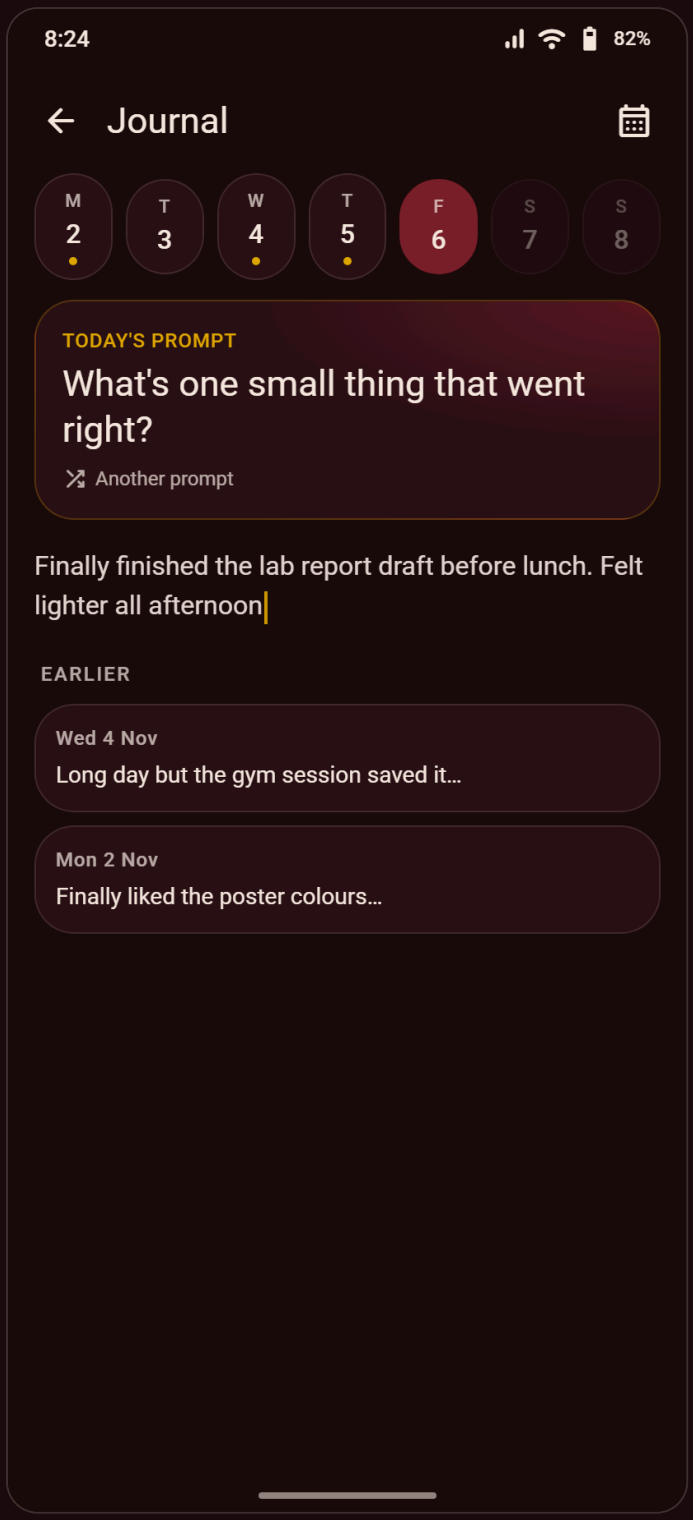

`?s=search`

Global search grouped by type with highlighted matches.

- Pill search field
- Group headers with counts
- Result rows with yellow highlight

Motion Results fade in as you type (debounced).

Journal

Journal P 23

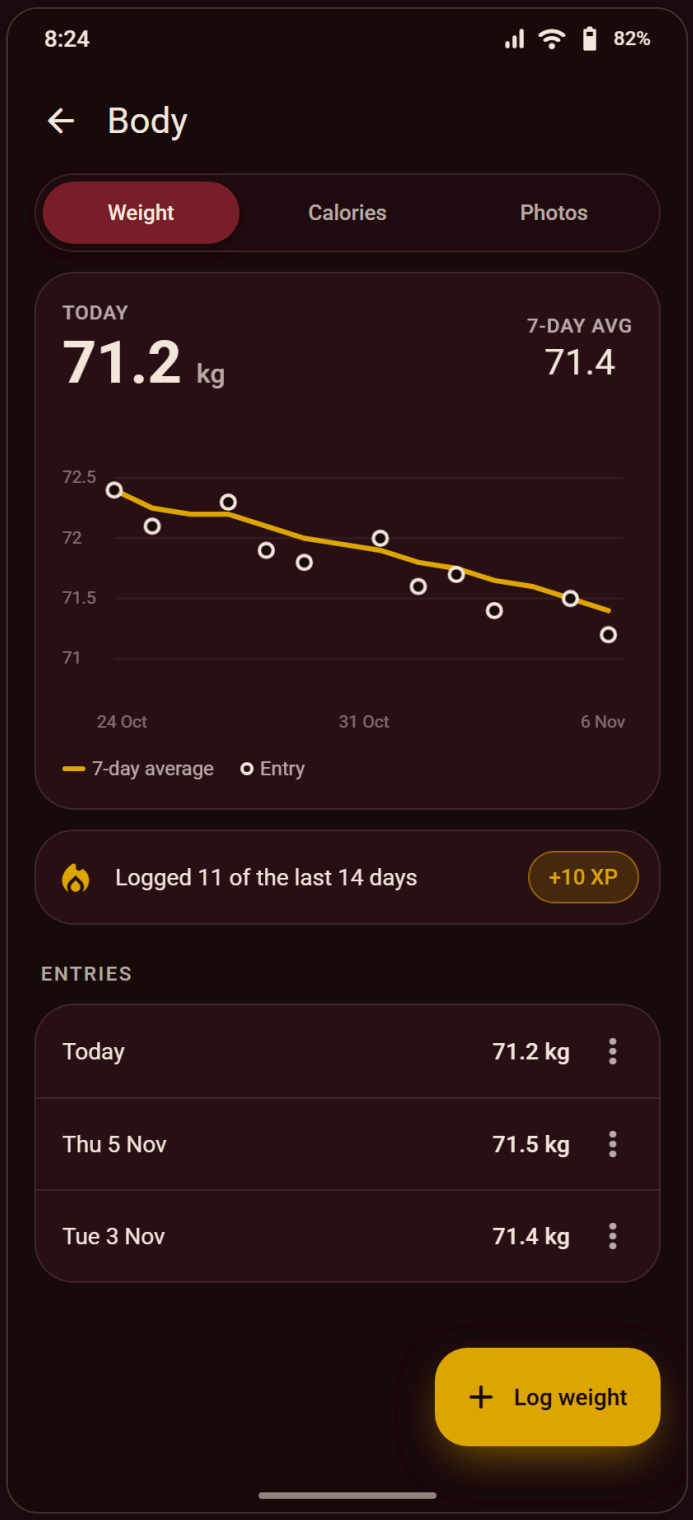

`?s=journal`

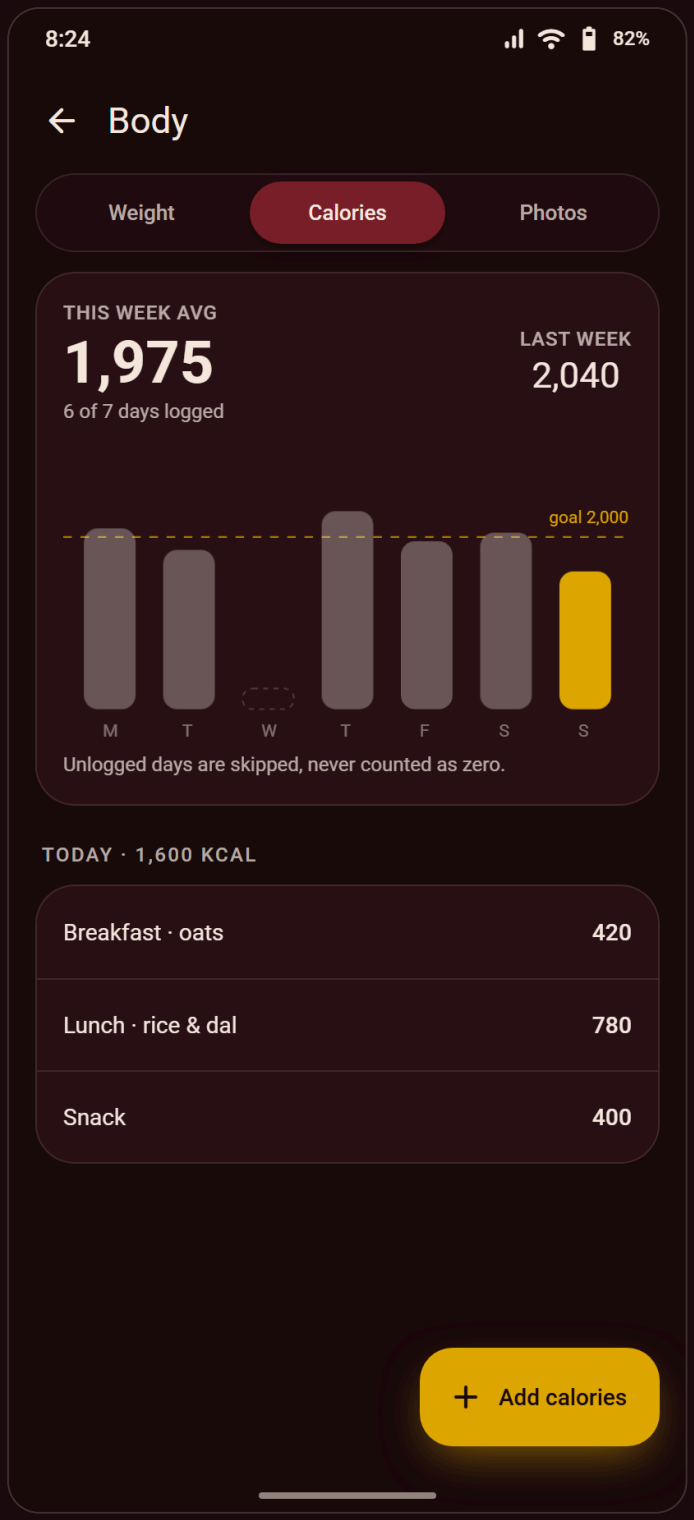

One entry per day with an optional prompt.

- Week strip with dots on days with entries
- Prompt card + "another prompt"
- Entry text
- Earlier entries

Motion Prompt shuffles with a fade.

Weight (7-day trend) · Calories (daily + weekly)

Weight (7-day trend) P 24

`?s=body-weight`

Weight with 7-DAY moving average trend; neutral wording only.

- Weight / Calories / Photos tabs
- Today value + 7-day avg
- Canvas chart: points + yellow trend, gaps not zero-filled
- Logging-consistency card (rewards logging, never the number)
- Entries list, FAB

Motion Trend line draws 1.4 s; points pop.

Calories (daily + weekly) P 24

`?s=body-calories`

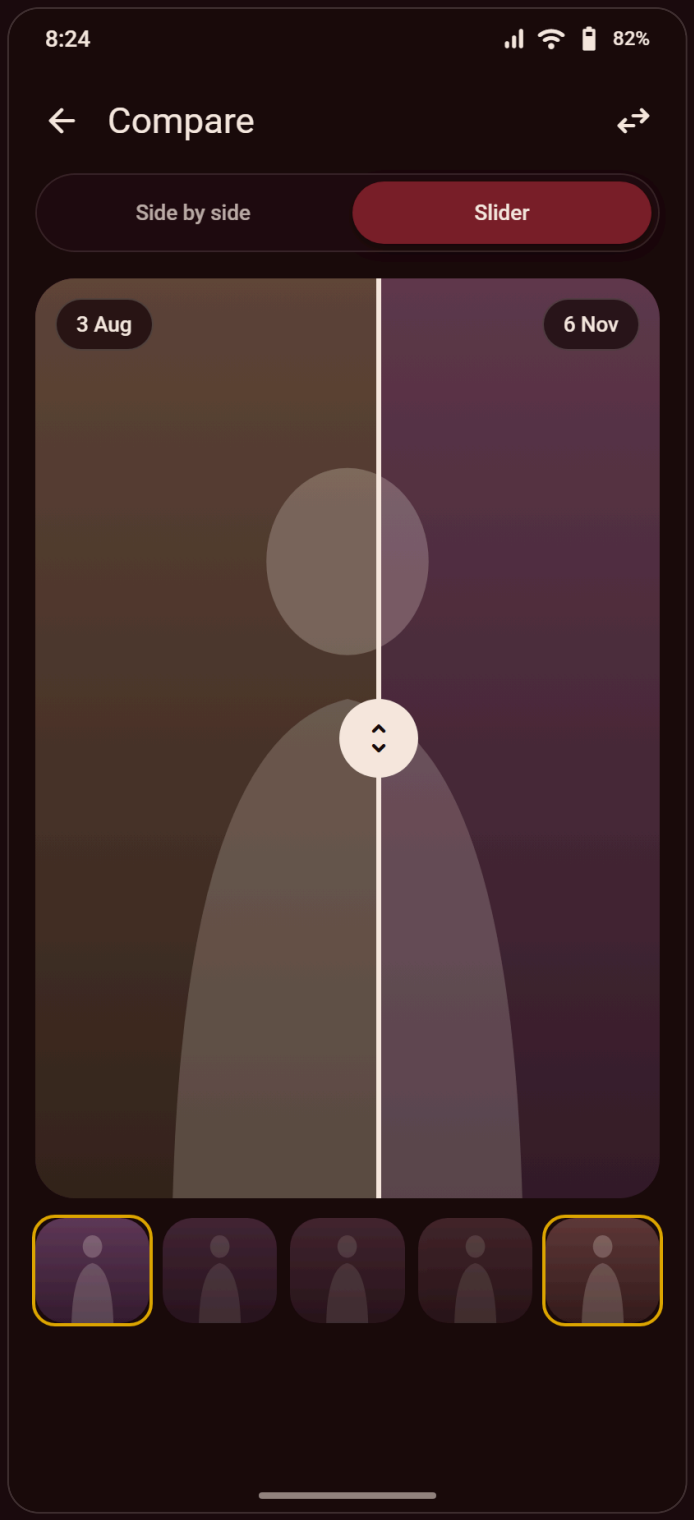

Daily bars, weekly average, optional goal line.

- Week avg + "n of 7 days logged" + last week
- Bars (unlogged = dashed outline, never zero)
- Dashed goal line
- Today entries

Motion Bars grow from the bottom with overshoot, 50 ms stagger.

Progress photos timeline · Photo compare slider

Progress photos timeline P 25

`?s=body-photos`

Private weekly progress photos.

- Privacy note
- Week groups with 3-up thumbnails, empty slot = dashed add
- FAB Take photo

Motion Thumbnails fade in as Coil loads them.

Photo compare slider P 25

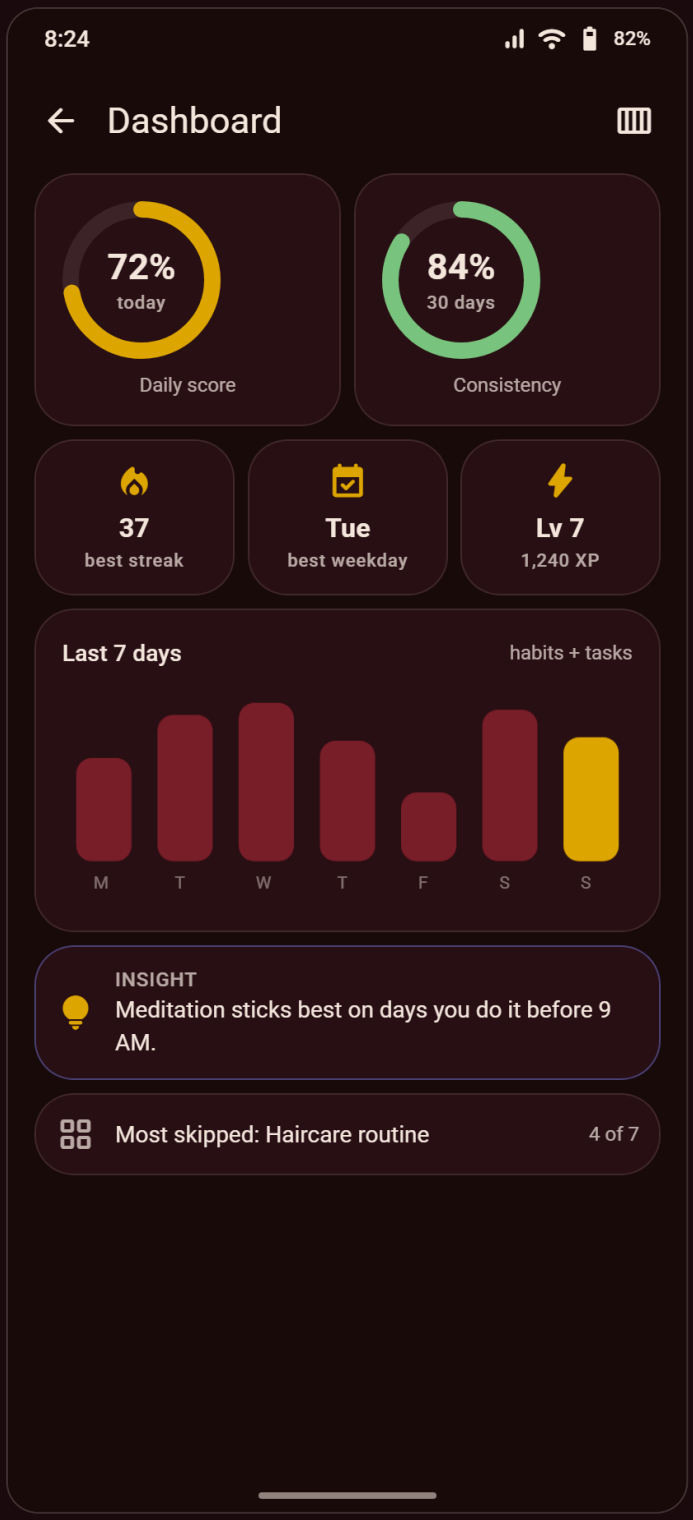

`?s=body-compare`

Before / after compare: side by side or slider.

- Mode tabs
- Slider with handle + date chips
- Picker strip (selected outlined)

Motion Handle follows the finger 1:1; release settles with a spring.

Dashboard · Weekly report card

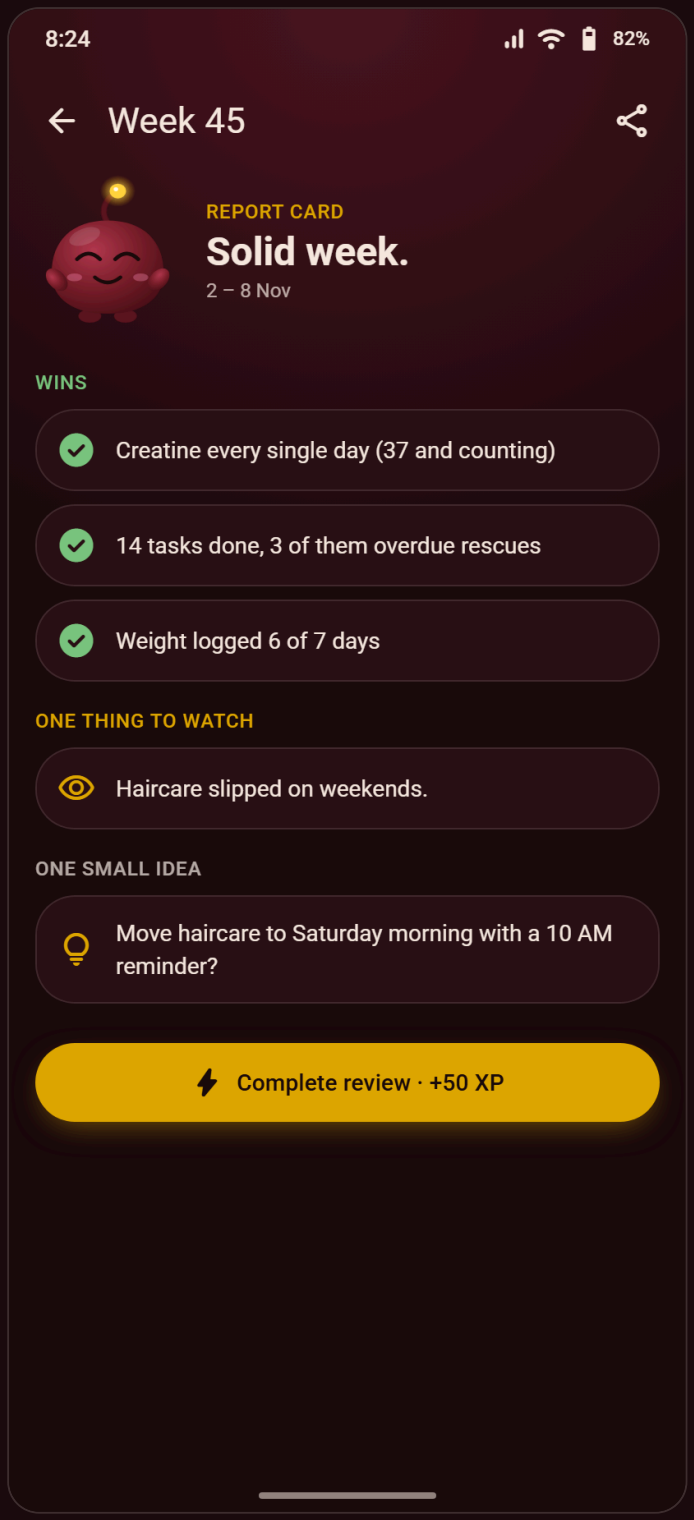

Dashboard P 26

`?s=dashboard`

Daily score, consistency, best weekday, XP, insight.

- Two ring cards
- Three stat tiles
- Last-7-days bars
- One insight per day
- Most skipped habit

Motion Rings + bars animate in.

Weekly report card P 26

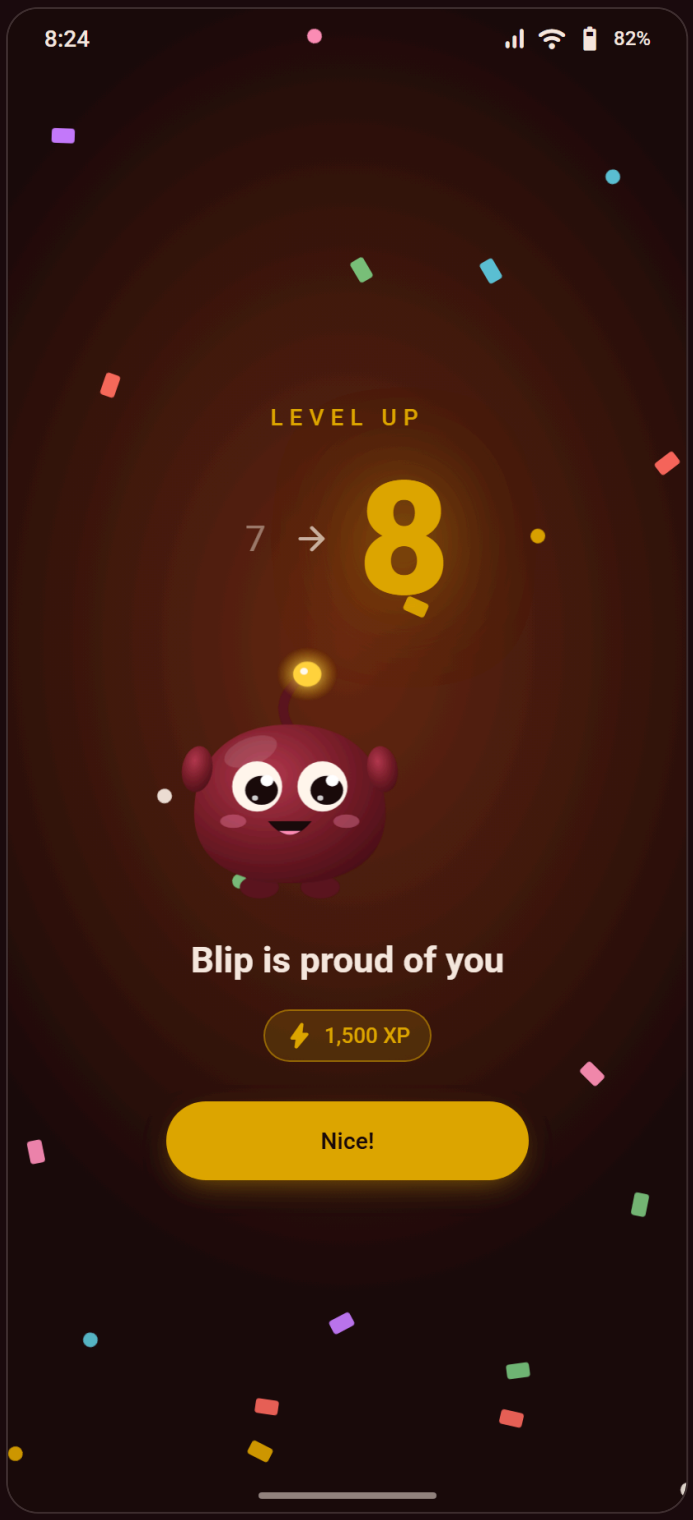

`?s=report-card`

Weekly report card: wins first, one weak spot, one idea.

- Mascot + title
- WINS (green check)
- ONE THING TO WATCH
- ONE SMALL IDEA
- Complete review +XP

Motion Sections reveal staggered.

Level up · Mascot moods & evolution

Level up P 26

`?s=level-up`

Level-up moment.

- LEVEL UP label
- Old → new level (huge yellow)
- Cheering mascot
- XP chip, button

Motion Number pops with glow; confetti.

Mascot moods & evolution P 16, 27

`?s=evolution`

Mascot stages (never go down) and moods.

- 5 stages: Pod, Baby, Teen, Adult, Legend; locked ones greyed
- Progress to next stage
- Mood grid

Motion Each mood has its own loop (see Mascot page).

Year in review

Year in review P 27

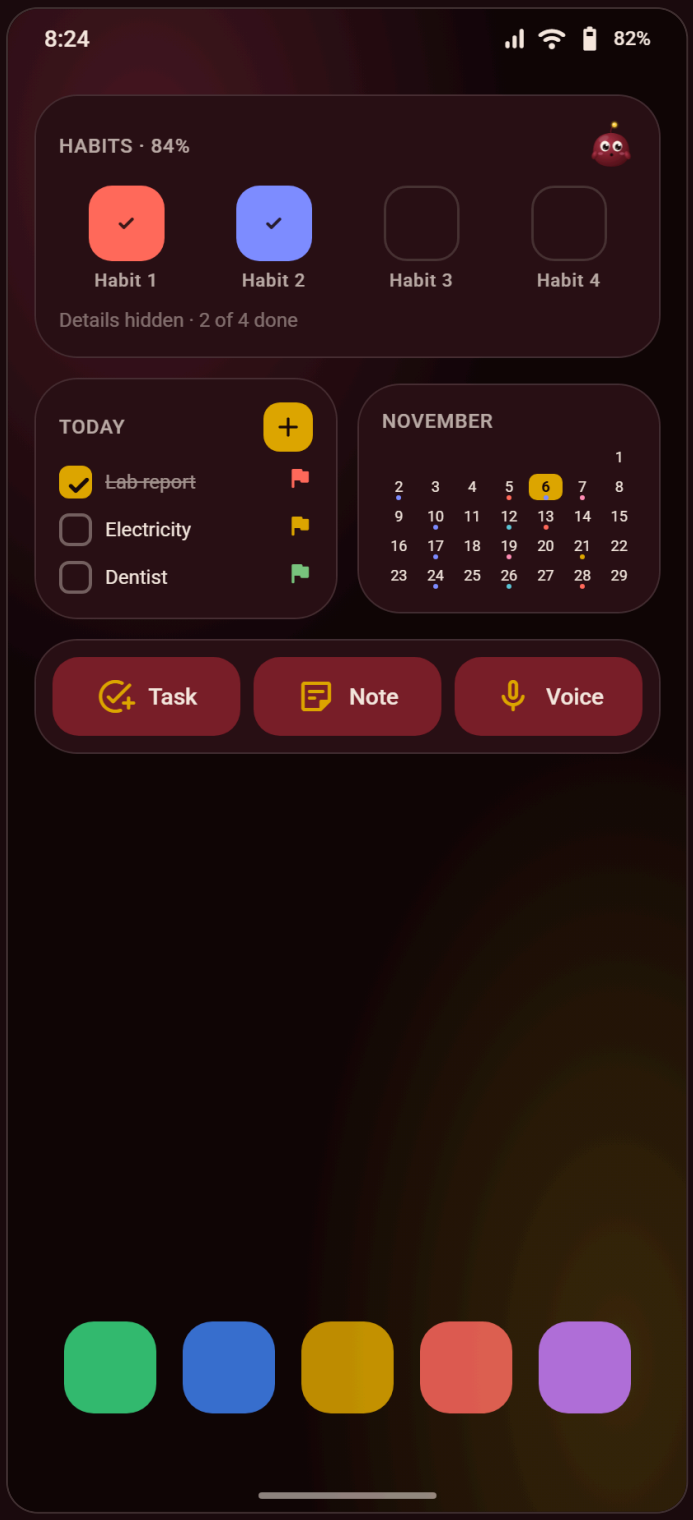

`?s=year-review`

Year in review (no network).

- Big editorial headline
- Stat tiles
- Consistency per habit bars
- Mascot milestone

Motion Story-style reveal, one block at a time.

Home-screen widgets · Quick-add dialog (from widget)

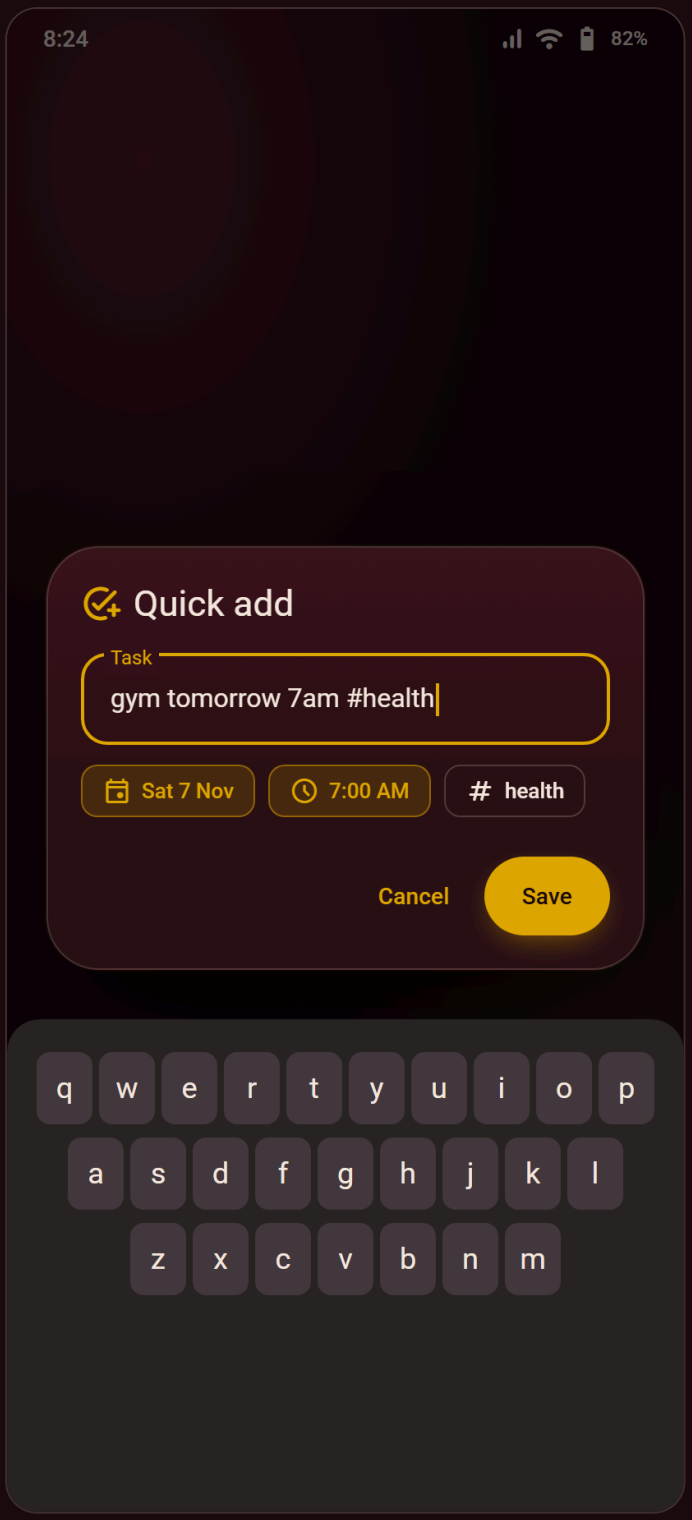

Home-screen widgets P 19, 20, 22

`?s=widgets`

Glance widgets on the home screen with privacy (details hidden) ON.

- Habit widget: consistency, tappable boxes
- Task widget with + (opens quick-add dialog)
- Calendar widget month grid with dots
- Quick-capture widget

Motion Glance cannot animate; state changes swap instantly.

Quick-add dialog (from widget) P 20

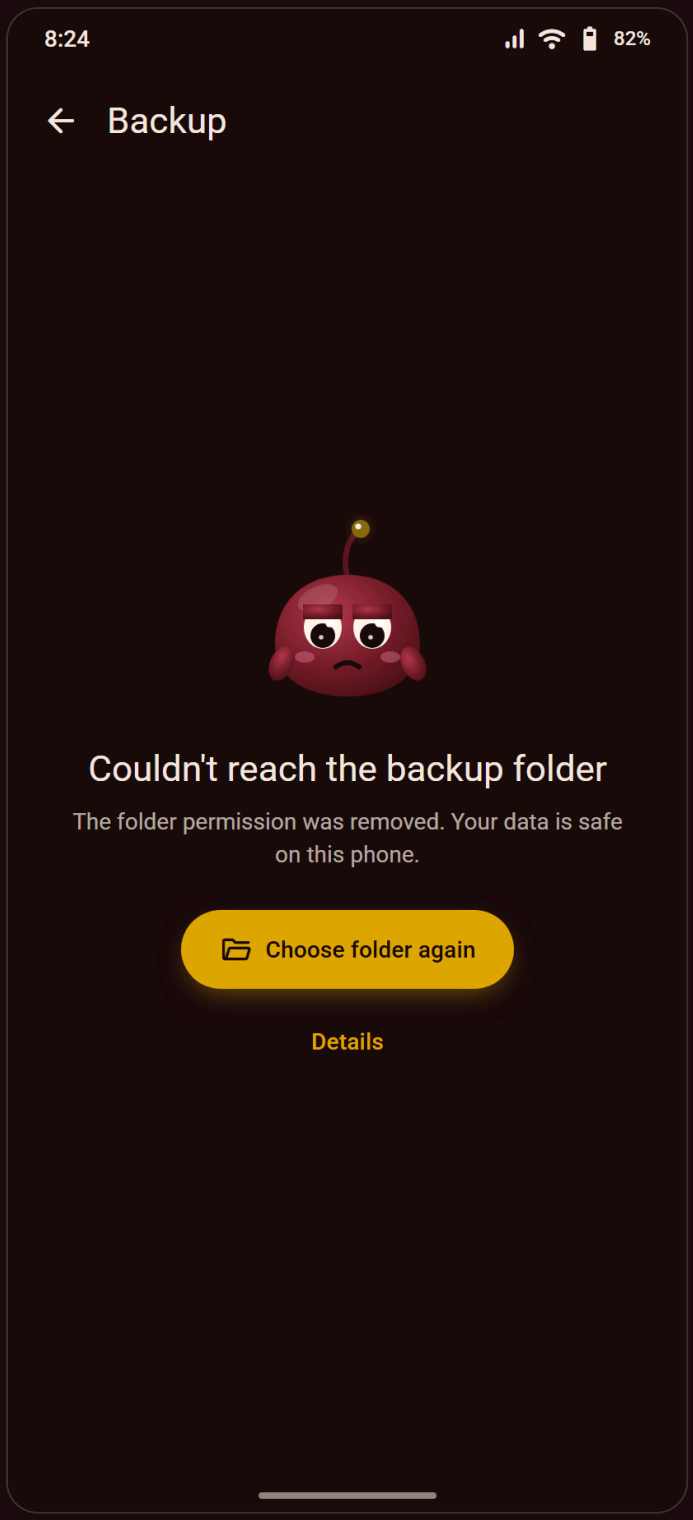

`?s=quickadd-dialog`

Quick-add dialog Activity over the home screen.

- Dialog card: title, field, parser chips, Cancel / Save
- Keyboard

Motion Dialog scales in; chips pop as parsed.

Error state · Offline / sync paused banner

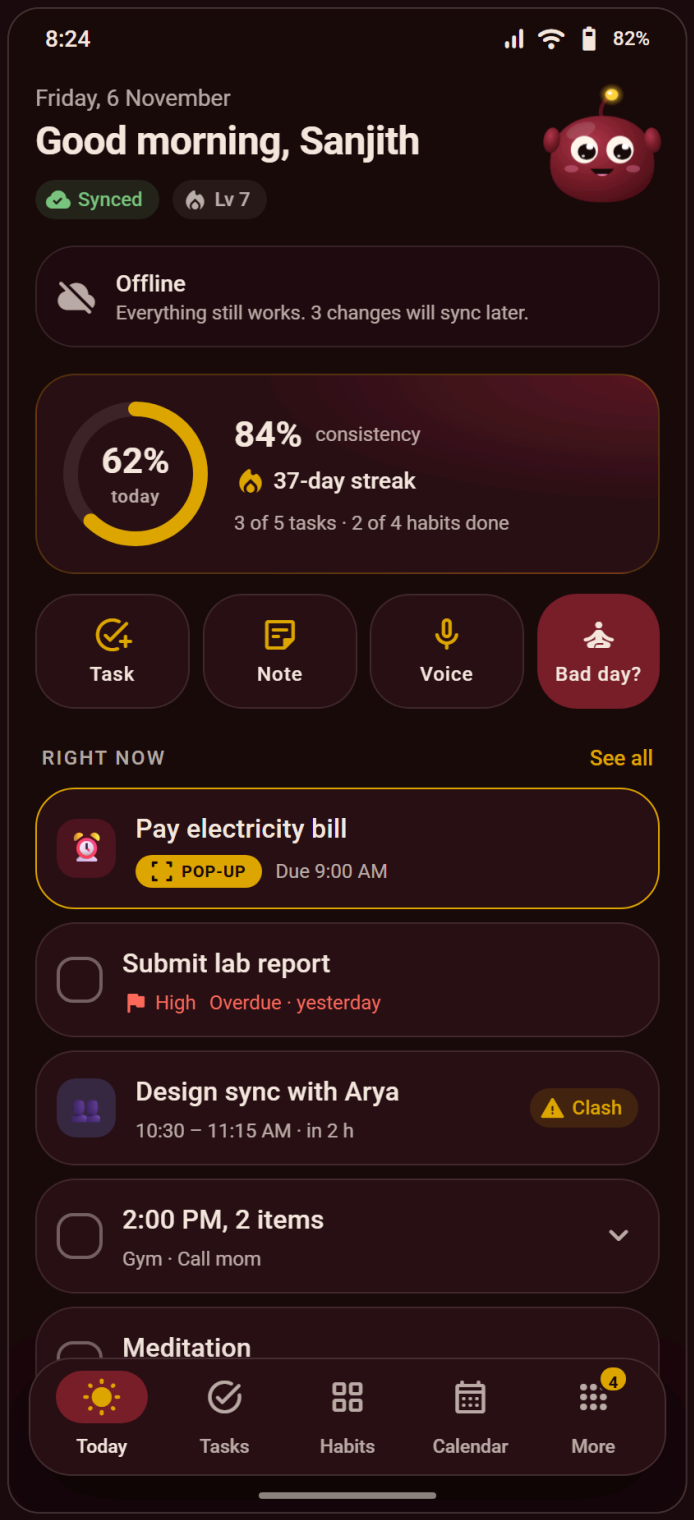

Error state P 27

?s=error-state

Error pattern: what happened, that data is safe, one fix.

- Disappointed mascot (never blames)
- Title
- Plain reason + reassurance
- Primary fix, Details

Motion None beyond the mascot idle.

Offline / sync paused banner P S2

?s=offline-state

Offline banner pattern; app keeps working.

- Sunken banner with icon, title, line

Motion Banner expands 250 ms.
